Subject: **Phase I Environmental Site Assessment**
68 Willow Road
Menlo Park, California 94025
AEI Project No. 517912

Dear Jimmy Keane:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or jhertz@aeiconsultants.com.

Sincerely,

Justin Hertz

Justin Hertz
Business Development Manager
AEI Consultants

PROJECT SUMMARY

68 Willow Road, Menlo Park, San Mateo County, California 94025
AEI Project No. 517912

REC: Recognized Environmental Condition
CREC: Controlled Recognized Environmental Condition
HREC: Historical Recognized Environmental Condition
OEC: Other Environmental Concerns (business environmental risks & de minimis conditions)
SDG: Significant Data Gap

Report Section		REC	CREC	HREC	OEC	SDG	Recommended Action

Regulatory Database	October 8, 2025
Site Visit	October 16, 2025
Interview(s)	Property Owner: N/A Key Site Manager: October 16, 2025
EP Declaration	October 24, 2025
Environmental Lien Search (if conducted by AEI)	N/A
Report Viability per ASTM E1527-21	April 6, 2026

The dates listed are required for Users who are using the report in connection with CERCLA liability protections. The User may have their own criteria when the report is being used for business risk purposes, and not CERCLA liability protections.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Prince Street Partners to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 68 Willow Road, Menlo Park, San Mateo County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	68 Willow Road, Menlo Park, San Mateo County, California 94025
Property ID (APN or Block/Lot)	062423020
Location	South side of Willow Road
Site and Building Information	
Approximate Site Acreage/Source	2.501/Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1955/Assessor
Building Square Footage (SF)/Source	23,400/Assessor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	None identified
Use/Occupancy of Basement or Subgrade Area(s)	N/A
Number of Units	One
Additional Improvements	Paved circumferential driveway with parking spots and landscaped areas with an outdoor recreational patio area with a fountain
Property Type	Office
On-site Occupant(s)	Robinhood (financial services)
Current On-site Operations/Use	Offices
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	HWTS; FINDS; ECHO; E MANIFEST; RCRA NonGen/NLR; HAZNET

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; refer to Section 1.6.1	Topographical Maps
1939-1948	Agricultural land	Aerial photographs; topographical map
1955-Present	Developed with a portion of the current commercial office building in 1955, with the entirety of the building present by 1991 (68 Willow Road). Occupied by various commercial office tenants including American Hardware Mutual Insurance (1957-1986), Price Waterhouse Technology Center (1992-2000); Applied Decision Analysis Inc. (2005); Willow Garage (2009-2017); Bootup World (2015); Cuckoos Nest (2016); and Robinhood (2020-Present)	Aerial photographs; city directories; topographical maps; agency records; previous reports; site observations; interview

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Willow Road followed by: Residences (841 and 845 Willow Road, and 200 Waverley Street)	None identified
Northeast	Riverwood Investment Service (70 Willow Road)	None identified
East	San Fransciquito Creek followed by Palo Alto Avenue followed by: Residences (436 and 480 Palo Alto Avenue)	None identified
South	Standford Healthcare Design (66 Willow Place)	Yes; refer to Section 5.1
West	Willow Place followed by: TA Private Equity (64 Willow Place)	Yes; refer to Section 5.1

Findings and Opinions

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the current ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the current ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) include, but are not limited to, de minimis conditions and/or business environmental risks such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the ASTM Standard. These may also affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Based on a review of aerial photographs, there is potential that the subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. The routine application of pesticides and fertilizers is not considered a release subject to CERCLA response costs. No evidence of spilling, dumping, emitting, and/or mishandling of pesticides and/or fertilizers was identified, and thus the former agricultural uses do not represent a REC. AEI understands that the subject property is slated for redevelopment for commercial/industrial uses. Sampling for pesticides/fertilizers and/or other compliance measures pertaining to past agricultural uses may be required by regulatory agencies prior development of the property; assessment of compliance with regulatory requirements is beyond the scope of this investigation.
- According to Prince Street Partners, demolition of the subject property building is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property building, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-21, of 68 Willow Road, Menlo Park, San Mateo County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

RECOMMENDATIONS

AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 68 Willow Road, Menlo Park, San Mateo County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the security-sensitive nature of operations within the subject property building, limited access was provided to the interior of the building. Additionally, specific rooms and areas were prohibited from being photographed. Based on the nature of occupancy of the subject property building (offices), lack of hazardous substances reported within the building and information provided by the building manager, the limited access is not expected to significantly alter the findings of this assessment.
- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.
- The Menlo Park Building Department and Menlo Park Planning Department were contacted for information on the subject property in order to identify historical tenants/use, property development, and/or hazardous substance/petroleum product handling. Due to the time frame of this assessment, some records were not available for review. However, based on the quality of information obtained from other online sources and the previous reports, this limitation is not expected to significantly alter the findings of this assessment.
- A search of historical city directories was not conducted for the adjoining properties at 436 and 480 Palo Alto Avenue. Based on the quality of information obtained from other sources and the residential nature of occupancy of the site, this limitation is not expected to alter the overall findings of this assessment.

1.6 Data Failure and Data Gaps

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	As noted in Section 3.0, the earliest historical resource obtained during this assessment indicated that the subject property was developed agriculturally. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
No data on occupant listing and address	Aerial photographs, Sanborn fire insurance maps, city directories, historical topographic maps, agency records, previous reports, interview

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of Prince Street Partners. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns.

Reliance is provided in accordance with Prince Street Partners and AEI's contract and Terms and Conditions dated October 4, 2025. The limitation of liability defined in the contracted terms is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

Property Information	
Site Address(es)	68 Willow Road, Menlo Park, San Mateo County, California 94025
Property ID (APN or Block/Lot)	062423020
Location	South side of Willow Road
Site and Building Information	
Approximate Site Acreage/Source	2.501/Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1955/Assessor
Building Square Footage (SF)/Source	23,400/Assessor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	None identified
Use/Occupancy of Basement or Subgrade Area(s)	N/A
Number of Units	One
Additional Improvements	Paved circumferential driveway with parking spots and landscaped areas with an outdoor recreational patio area with a fountain
Property Type	Office
On-site Occupant(s)	Robinhood (financial services)
Current On-site Operations/Use	Offices
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	HWTS; FINDS; ECHO; E MANIFEST; RCRA NonGen/NLR; HAZNET

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	California Water Service
Sewage Disposal/Treatment	California Water Service

Utility source/system information listed in the table above is provided by Gloria Arteaga, Property Manager, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a residential and commercial area of Menlo Park, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Willow Road followed by: Residences (841 and 845 Willow Road, and 200 Waverley Street)	None identified
Northeast	Riverwood Investment Service (70 Willow Road)	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
East	San Fransciquito Creek followed by Palo Alto Avenue followed by: Residences (436 and 480 Palo Alto Avenue)	None identified
South	Standford Healthcare Design (66 Willow Place)	Yes; refer to Section 5.1
West	Willow Place followed by: TA Private Equity (64 Willow Place)	Yes; refer to Section 5.1

2.4 PHYSICAL SETTING

Geologic Unit	Rock Stratigraphic Unit Era: Cenozoic System: Quaternary Series: Quaternary Code: Q (decoded above as Era, System & Series) Geologic Age Identification Category: Stratifed Sequence Source: USGS Digital Data Series
Soil Series	Soil Component Name: Botella Soil Surface Texture: Clay Loam Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures. Soil Drainage Class: Not hydric Source: U.S. Department of Agriculture's (USDA), National Cooperative Soil Survey (NCSS)
Groundwater Flow Direction	East Source: Topographic map interpretation
Estimated Depth to Groundwater	85 to 93 feet bgs Source: SLIC case data for a nearby site at 345 Middlefield Road, obtained via GeoTracker
Surface waters on the subject property or adjoining properties	San Fransciquito Creek located adjoining to the east
Additional Notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, historical topographic maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; refer to Section 1.6.1	Topographical Maps
1939-1948	Agricultural land	Aerial photographs; topographical map
1955-Present	Developed with a portion of the current commercial office building in 1955, with the entirety of the building present by 1991 (68 Willow Road). Occupied by various commercial office tenants including American Hardware Mutual Insurance (1957-1986), Price Waterhouse Technology Center (1992-2000); Applied Decision Analysis Inc. (2005); Willow Garage (2009-2017); Bootup World (2015); Cuckoos Nest (2016); and Robinhood (2020-Present)	Aerial photographs; city directories; topographical maps; agency records; previous reports; site observations; interview

Based on a review of aerial photographs, there is potential that the subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. The routine application of pesticides and fertilizers is not considered a release subject to CERCLA response costs. No evidence of spilling, dumping, emitting, and/or mishandling of pesticides and/or fertilizers was identified, and thus the former agricultural uses do not represent a REC. AEI understands that the subject property is slated for redevelopment for commercial/industrial uses. Sampling for pesticides/ fertilizers and/or other compliance measures pertaining to past agricultural uses may be required by regulatory agencies prior development of the property; assessment of compliance with regulatory requirements is beyond the scope of this investigation.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2022, non-inclusive):

Year(s)	Subject Property Description	Adjoining Property Descriptions
1939, 1943, 1948	Agricultural land	NORTH: Agricultural land NORTHEAST: Agricultural land EAST: San Francisquito Creek followed by a roadway followed by residences SOUTH: Agricultural land WEST: Agricultural land
1956	A portion of the current commercial building and parking lot	NORTH: Roadway followed by agricultural land NORTHEAST: What appears to be a portion of the current commercial buildings

Year(s)	Subject Property Description	Adjoining Property Descriptions
		EAST: No significant changes SOUTH: Current commercial building WEST: Vacant land
1958, 1963, 1968	No significant changes	NORTH: Roadway followed by one of the current residences and agricultural or vacant land NORTHEAST: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1974, 1982	No significant changes	NORTH: No significant changes NORTHEAST: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: Current commercial building
1991, 1998, 2005	Current commercial building (includes an addition to the original structure)	NORTH: Roadway followed by a commercial building and one of the current residences NORTHEAST: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
2010, 2014, 2018, 2022	No significant changes	NORTH: Roadway followed by the current residences NORTHEAST: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

Subject property:

- Agricultural land - refer to Section 3.0

Adjoining properties:

- No potential environmental concerns identified

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed (1904-1978, non-inclusive):

Year(s)	Subject Property Description (Listed Address)	Adjoining Property Descriptions
1904, 1908, 1924, 1947, 1948,	No coverage	NORTH: No coverage NORTHEAST: No coverage EAST: San Francisquito Creek followed by

Year(s)	Subject Property Description (Listed Address)	Adjoining Property Descriptions
1949, 1956, 1969		Palo Alto Avenue followed by residences SOUTH: No coverage WEST: No coverage

Subject property:

- No potential environmental concerns identified

Adjoining properties:

- No potential environmental concerns identified

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1957-2022, non-inclusive. N/A [East adjoining addresses not researched; see Section 1.5.]

Refer to the appendices for a complete list of historical subject property tenants identified by EDR.

The first listing for the subject property appeared in 1957. No potential tenants of concern were identified based on AEI's review of the historical city directories.

The following table summarizes the results of the city directory search for the subject property.

Subject Property

Year(s)	Address - Occupant Listed
1957, 1963, 1969, 1973, 1978, 1981, 1986	68 Willow Road - Am Hdw Mut Ins Co (American Hardware Mutual Insurance Company)
1992, 1995, 2000	68 Willow Road - PRICE WTRHS TECH CT (Price Waterhouse Technology Center)
2005	68 Willow Road - Applied Decision Analysis Inc.
2010, 2014	68 Willow Road - Address not listed
2017	68 Willow Road - Willow Garage Inc.
2022	68 Willow Road - Included: Willow Garage Inc; Yotascale Inc; Unravel Data Systems Inc; TechWadi Inc; SynergySuite Restaurant Management Software; Silicon Valley Social Venture Fund; Reform Industries; Post-Lean Institute; Orbiion Space Tech Inc; Open Perception Software Development; Mentor Cloud Platform; MariaDB Corp; Mactores Software Development; London House Capital Wealth Management; Lombardstreet Ventures Investing; Intermodal Transportation Data; Interana Analytics; Gimmko Technologies Staffing; Farmers Insurance; Eastlink Capital Venture Capital; Cygnett Hotels & Resorts; Cuckoos Nest Club; CenTrak Healthcare Location System; BootUP Venture Capital; Blacksands Inc. Cyber Security; Axwave Software Development; Anthropocene Institute Networker; Amazon Consulting (refer to the appendices for the complete listing of city directories for the subject property in 2022)

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

The table below summarizes the search of historical city directories conducted for the adjoining properties. Refer to the appendices for a complete list of historical adjoining occupants identified during the review of city directories obtained from EDR.

Adjoining Properties

Direction	Address(es)	Potential Listings of Concern
North	200 Waverley Street 841-845 Willow Road	None identified
Northeast	70 Willow Road	None identified
East	426-480 Palo Alto Avenue	N/A [addresses not researched; see Section 1.5]
South	66 Willow Place	None identified
West	64 Willow Place	None identified

Subject property:

- No potential environmental concerns identified

Adjoining properties:

- No potential environmental concerns identified

3.4 Historical Topographic Maps

AEI reviewed historical topographic maps of the subject property and surrounding area. A search was made of the EDR collection of topographic maps. Historical topographic maps were reviewed for the following years (1897-2021, non-inclusive):

Year(s)	Subject Property Description	Adjoining Property Descriptions
1897, 1899, 1902, 1943, 1947	No features depicted	NORTH: No features depicted NORTHEAST: No features depicted EAST: Small stream/creek SOUTH: No features depicted WEST: No features depicted
1948	No significant changes	NORTH: No significant changes NORTHEAST: No significant changes EAST: Small stream/creek followed by shading indicating a built of area (or urban development) SOUTH: No significant changes WEST: No significant changes
1953	Shading (grey) indicating a built-up area (or urban development)	NORTH: Roadway EAST: Small stream SOUTH: No features depicted WEST: No features depicted
1961, 1968, 1973	What appears to be the current (or a portion of the current) commercial building	NORTH: Road followed by no features depicted and an area of shading indicating a built-up area (or urban development) NORTH: Building EAST: No significant changes

Year(s)	Subject Property Description	Adjoining Property Descriptions
		SOUTH: Commercial building WEST: Shading indicating a built-up area (or urban development)
1994, 1999	Shading (grey) indicating a built-up area (or urban development)	NORTH: Roadway followed by shading (indicating built up area or urban development) NORTHEAST: Shading (indicating built-up area or urban development) EAST: Small stream/creek followed by Palo Alto Avenue beyond which no features are depicted SOUTH: Shading (indicating built up area or urban development) WEST: Shading (indicating built up area or urban development)
2012, 2015, 2018, 2021	No features depicted	NORTH: Roadway beyond which no features are depicted NORTHEAST: No features depicted EAST: Small stream/creek followed by Palo Alto Avenue beyond which no features are depicted SOUTH: No features depicted WEST: No features depicted

Subject property:

- No potential environmental concerns identified

Adjoining properties:

- No potential environmental concerns identified

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Mateo County Environmental Health Services (SMEHS)	October 8, 2025	Online	Dan Rompf, Hazardous Material Inspector	Records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
April 28, 2025	68 Willow Road LLC	Subsurface Drilling Permit Application	Soil boring permits for a geotechnical survey

Review of information on file for the subject property at the SMEHS did not reveal evidence of RECs.

4.2 Fire Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Fire Protection District (MPFPD)	October 16, 2025	Online	Michelle Kneier, CMC, Clerk of the Board	No hazardous substances records on file. Records discussed below.

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
September 17, 2018	Not Reported	Certificate	UL Certificate
July 9, 2020	Not Reported	Permit	Fire alarm update
August 19, 2020	Not Reported	Permit	Fire system renovation
January 12, 2021	Not Reported	Permit	Sprinkler system update
February 17, 2021	Not Reported	Permit	Fire system renovation (Resubmittal)

Review of information on file for the subject property at the MPFPD did not reveal evidence of RECs.

EDR Lightbox Fire & Emergency Incident Data

On March 17, 2019, a building fire was reported at the subject property and responded to by the Menlo Park Fire Department. The property was noted to be office use. The use of Class B foams/AFFF was not noted. Based on the provided information, this fire incident is not expected to represent evidence of a REC.

4.3 Building Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Building Department (MPBD)	October 15, 2025	Online	N/A	Records discussed below. Response pending, refer to Section 1.5
EDR Lightbox Building Permits	October 8, 2025	N/A	N/A	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1955	Haas and Hymie	Permit for a new office building for American Hardware Mutual Insurance Co
1957	Not provided	Building addition
1973	American Hardware Mutual Insurance Co.	Reroofing
1978	American Hard Mutual Insurance Co.	Building additions
1979	Not provided	Foundation investigation for building additions
1995	Price Waterhouse	Temporary furniture storage shed
2006	Not provided	Solar panels
2016	Not provided	Installation of kitchen grease trap
2020	Not Reported	22,527 square feet commercial tenant improvement to an existing one-story office building. These improvements include connecting the building entrance to the public sidewalk.

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the MPBD.

Records Summary - EDR Lightbox Building Permits

Year(s)	Owner/Applicant	Description of Permit and Building Use
2006	Marin Solar Vance Brown Builders	Solar electric grid, tied An interior alteration to a commercial structure
2007	Vance Brown Builders Vance Brown Builders	A commercial exterior alteration including a trash enclosure Installation of new fiber optic cable, including new utility pole
2009	Qualogy Construction Inc. Qualogy Construction Inc.	A commercial tenant improvement for a cafe A commercial alteration to move wall in CEO's office
2015	Not Reported	EV Charger, one station for a commercial building

Year(s)	Owner/Applicant	Description of Permit and Building Use
	Craft Builders Inc.	Install new bar area in an existing kitchen in an office building for employees of tenants only.
2021	Josh Alfaro	This project is to install 2 dual-head electric vehicle chargers in the existing parking lot.
	Nathan Dudley	Remove most of the interior except for structural elements and select interior part

Evidence indicating current or prior use or storage of hazardous substances was not identified in the building permits available via EDR Lightbox.

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Planning Department (MPPD)	October 15, 2025	Online	N/A	Response pending, refer to Section 1.5

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Mateo County Assessor's Office	October 15, 2025	Online	N/A	Information obtained is discussed below

Records Summary

APN	062423020
Acreage	2.501 acres
Construction Date	1955
Building Square Footage	23,400 square feet
Current Owner	Not provided by the Assessor (68 Willow Owner LLC according to EDR Lightbox)
Additional Information	None

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	October 15, 2025	Online	N/A	No subject property records on file
SWRCB GeoTracker PFAS Map	October 15, 2025	Online	N/A	No subject property records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	October 15, 2025	Online	N/A	Records discussed below
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	October 15, 2025	Online	N/A	Records discussed, refer to Section 5.1

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA DTSC EnviroStor	October 15, 2025	Online	N/A	No subject property records on file
CalEPA Regulated Site Portal	October 15, 2025	Online	N/A	Records discussed below
Bay Area Air Quality Management District (BAAQMD)	October 8, 2025	Online	Rochele Henderson, Public Records Section	No subject property records on file

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	October 15, 2025	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	October 15, 2025	NPMS Public Map Viewer	No

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining properties and/or nearby sites of concern that were determined to warrant additional discussion, if any, are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Property	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	0.5			
Federal CERCLA removals/orders sites	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generators (LQG, SQG, VSQG)	SP/ADJ			
Federal RCRA NonGen/NLR sites	SP/ADJ	✔	✔	
Federal IC/EC sites	SP			
Federal ERNS sites	SP			
State/tribal "Superfund" equivalent sites	1.0			
State/tribal hazardous waste facilities	0.5			
State/tribal landfill and solid waste disposal facilities	0.5			
State/tribal leaking storage tanks	0.5			
State/tribal registered storage tanks	SP/ADJ			

Database	Search Distance (Miles)	Subject Property	Adjoining Property	Other Nearby Sites of Concern
State/tribal voluntary cleanup sites	0.5			
State/tribal IC/EC registries	SP			
State/tribal brownfield sites	0.5			
Orphans	N/A			
Additional Environmental Record lists	SP/ADJ	✔	✔	

Facility Name	68 WILLOW ROAD LLC
Address	68 WILLOW ROAD, MENLO PARK, CA 94025
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	HWTS; FINDS; ECHO; E MANIFEST; RCRA NonGen/NLR; HAZNET
Comments	The subject property is listed as a FINDS and ECHO site. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. Details provided for the RCRA Non-Generator (NONGEN)/ No Longer Regulated (NLR) listing identified the site as "not a generator, verified" in 2020. If provided, include: The NAICS Description provided for the business is "All Other Waste Management Services". No violations were identified in connection with the RCRA listing. According to the regulatory database, the subject property is identified in the Hazardous Waste Tracking System (HWTS) and HAZNET databases in association with generating 0.05 tons of asbestos containing waste in 2020. Information on the EPA website indicates that the facility is currently in compliance with no outstanding violations. Based on the nature of these listings and lack of violations, they are not considered evidence of a REC.

Facility Name	PACIFIC BELL
Address	66 WILLOW PLACE, MENLO PARK, CA 94025
Distance & Direction	Adjoining to the South
Hydrologic Position	Higher-gradient
Databases Listed	RCRA NonGen / NLR; FINDS; ECHO
Comments	This property is listed as a FINDS and ECHO site in association with the 1984 listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO. The facility was listed as a RCRA Non-Generator (NONGEN)/No Longer Regulated (NLR) in the year 1997. Additional details provided indicate the facility formerly generated small and large quantities of hazardous wastes in the years 1996 and 1981. No violations were identified in connection with the RCRA listing. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	SUNSET MENLO PARTNERS, II, LLC
Address	64 WILLOW PLACE, MENLO PARK, CA 94025
Distance & Direction	Adjoining to the East

Hydrologic Position	Lower-gradient
Databases Listed	PFAS ECHO; RCRA NonGen / NLR; E MANIFEST
Comments	This adjoining property was identified in the EDR PFAS ECHO database. This database includes facility operations that may potentially handle PFAS. Information is typically derived from NAICS/SIC codes and is based on general information regarding site operations. No known releases have been identified in association with this facility. As such, evidence of PFAS contamination has not been identified to originate at this facility at this time. If the groundwater beneath the subject property is slated for beneficial uses, additional investigations may be deemed warranted at that time. However, the subject property does not currently utilize groundwater beneath the subject property for beneficial uses. As such, additional investigations do not appear warranted at this time. Details provided for the RCRA Non-Generator (NONGEN)/No Longer Regulated (NLR) listing identified the site as "not a generator, verified" in 2024. The NAICS Description provided for the business is "Petroleum Lubricating Oil and Grease Manufacturing". No violations were identified in connection with the RCRA listing. The EPA established a national system for tracking hazardous waste shipments electronically (E MANIFEST). This listing is presumed related to the previously discussed RCRA Non-Generator (NONGEN)/No Longer Regulated (NLR). Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

5.2 Vapor Migration

A vapor encroachment condition (VEC) is the presence or likely presence of Chemical(s) of Concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property.

AEI conducted a limited screening for potential VECs that may affect the subject property. The VEC screening focused on the current and historical usage of the subject property and also utilized the aforementioned regulatory agency database report provided by EDR to evaluate identified Chemicals of Concern (COCs), including petroleum hydrocarbons.

Determination of AOC

To identify the area of concern (AOC) for contaminated sites with non-petroleum hydrocarbon COCs, AEI utilized the approximate minimum search distance defined by the current ASTM E2600 of 1,760 feet (1/3 mile) from the subject property boundary for COC-contaminated sites. For sites contaminated with petroleum hydrocarbon COCs, AEI utilized the AOC approximate minimum search distance of 528 feet (1/10 mile). The AOC was adjusted accordingly based on review of physical setting characteristics, known release information, property and land features, groundwater flow direction, and soil type, et al.

ASTM's Vapor Encroachment guidance indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or downgradient radius distances can be significantly reduced. AEI calculated the reduced AOC distances when considering groundwater flow direction by utilizing the following default distances, which were determined using the Buonicore Methodology:

Non-petroleum hydrocarbon COCs:

- 1,760 feet in the upgradient direction
- 365 feet in the cross-gradient direction
- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if Light, Non-Aqueous Phase Liquid, (LNAPL, i.e. floating product) is suspected:

- 528 feet in the upgradient direction
- 165 feet in the cross-gradient direction
- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if LNAPL is *not* suspected:

- 528 feet in the upgradient direction
- 95 feet in the cross-gradient direction
- 30 feet in the downgradient position

Additional adjustment of the AOC may be conducted based on AEI's professional judgment.

Conclusions

Source	VEC Identified	VEC Not Identified	Comments
Subject Property		✔	N/A
Adjoining and/or Nearby Site(s)		✔	N/A

5.3 Per- and Polyfluoroalkyl Substances (PFAS)

As defined in Section 3.2.36 of the current ASTM Standard E1527, hazardous substance means "those substances defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts." Hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA are outside of the scope of the current ASTM Standard E1527.

On July 8, 2024, the Final EPA rule became effective that designates perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) as CERCLA hazardous substances. Per the current ASTM Standard E1527, once this rule went into effect, these substances are evaluated within the scope of this standard, and a release or likely release of PFOA and/or PFOS is considered a REC.

Other than PFOA/PFOS, compounds classified as PFAS are not currently classified as hazardous substances under CERCLA, and thus the potential presence of PFAS (other than PFOA/PFOS) is outside of the scope of the current ASTM Standard E1527, and does not constitute a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change.

AEI's research of potential PFAS contamination focuses on the release/likely release of PFOA/PFOS. However, if additional information pertaining to other PFAS is identified, AEI will also assess/discuss these compounds, as deemed applicable/appropriate within the scope of this investigation.

It should be noted that AEI's screening of PFOA/PFOS and other PFAS is based solely on review of the resources cited within this report. Identification, or lack thereof, is not a warranty that PFOA/PFOS or other PFAS contamination is present or absent at a site. Additionally, it should be noted that given the evolving nature of science and regulatory oversight of PFOA/PFOS and other PFAS, additional sources of contamination may exist at the subject property, adjoining properties and/or other nearby sites that were not identified by the limited data and screening tools cited within this report.

5.3.1 Potential On-Site PFAS Sources/Concerns

AEI researched the standard historical and regulatory sources cited within this report to determine if a release or likely release of PFOA/PFOS has occurred at the subject property.

A voluntary industry phaseout of PFOA and PFOS was first implemented in the late 1990s and was fully implemented for PFOS by 2002 and PFOA by 2015. Although PFOA and PFOS have been generally phased out since 2015, studies have found that precursor PFAS in wastewater treatment systems may form PFOA and PFOS. As such, even after 2015, the presence of PFAS in wastewater discharges is considered a likely source of PFOA and PFOS contamination.

Potential Source	Yes	No
Past or present industrial operations that potentially included the use of PFAS (if "yes" see *Potential PFAS Sources from Industrial Uses* section/table below)		✔
The use or discharge of AFFF (if "yes" see *Potential Sources of AFFF* section/table below)		✔
Electroplating (1950s-present) NOTE: Electroplating (specifically hard chromium plating) is an industrial activity where PFAS-containing mist suppressants may have been used		✔
Agricultural uses, specifically 1970s-present that included application of biosolids/WWTP sludge that potentially contained PFAS		✔
Wastewater treatment plant (WWTP) (1960s-present)		✔
Landfill operations / waste disposal areas (1960s-present)		✔
Mining / quarrying / oil production		✔
Commercial carwash (1989-2010)		✔
Dry cleaner and/or commercial laundry (1970s-2010)		✔

AEI did not identify any obvious potential sources of PFAS contamination originating from on-site operations/sources.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 Interviews

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 Interview with Owner

Name	68 Willow Owner LLC (according to EDR's Lightbox); contact information not provided to AEI
Date Interviewed	N/A
Method of Contact	N/A
Year First Associated w/Property	N/A
Notes	Not interviewed; refer to Section 1.5
Interview Summary	N/A

6.1.2 Interview with Key Site Manager

Name	Mrs. Gloria Arteaga, Property Manager, Premia
Date Interviewed	October 16, 2025
Method of Contact	In Person
Year First Associated w/Property	2021
Notes	Interviewed; see below
Interview Summary	According to Ms. Arteaga, the property has been used as a business/ commercial office building. She was not aware of how or what the property was used for in the past. She stated that there are future plans to redevelop the property for residential townhomes.

Mrs. Gloria Arteaga was asked if they were aware of any of the following:

	Yes	No
Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.		✔
Any knowledge of previous environmental investigations conducted on site.		✔
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.		✔
Any known plans for site redevelopment or change in site use.	✔	
Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.		✔
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.		✔
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		✔
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.		✔
Comments: See Interview Summary in table above.		

6.1.3 Past Owners, Operators, and Occupants

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property. AEI requested this contact information on the Pre-Survey Questionnaire (PSQ); contact information was not provided to AEI. As such, interviews with past owners, operators and occupants were not reasonably ascertainable.

6.1.4 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).	Information not provided

Question	Response/ Comment
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided
Purpose/reason for conducting Phase I ESA:	Information not provided; AEI assumes the purpose is to qualify for an LLP to CERCLA liability

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by Mrs. Gloria Arteaga, Property Manager and by Prince Street Partners during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (68 Willow Road, Menlo Park, San Mateo County, California 94025), prepared by AEI Consultants Inc. (November 13, 2019)

Pertinent information obtained during the 2019 Phase I ESA is incorporated throughout this report as applicable.

This report describes the subject property generally consistent with current conditions with the following exceptions: the building was occupied by The Nest Cafe and BootUp Ventures, a company that leases office space to start-up companies.

AEI did not identify any RECs, CRECs, or HRECs. AEI identified the following OECs:

- "AEI observed interior areas of the subject property building in order to identify the presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage.

However, several water stained ceiling tiles were observed in the common hallway areas. Based upon our observations, AEI recommends replacing stained ceiling tiles and confirming that the source of water intrusion has been addressed.

- Due to the age of the subject property building(s), there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.
- Due to the age of the subject property building(s), there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/ renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62."

AEI recommended no further investigation for the subject property at the time.

Phase I Environmental Site Assessment Report (68 Willow Road, Menlo Park, California), prepared by Partner Engineering & Science, Inc. (Partner) (June 28, 2021)

This report describes the subject property generally consistent with current conditions. According to Mr. Craig Reyes, Facility Manager with Robinhood, Robinhood took occupancy of the building circa December 2020 following an extensive interior remodel of the building.

Based on building record and/or city directories, the following tenants (and approximate time of occupancy) were identified by Partner on the subject property: American Hardware Mutual Insurance (1957-1986); Price Waterhouse Technology Center (1992-2000); Applied Decision Analysis Inc. (2005); Willow Garage (2009-2017); Bootup World (2015); Cuckoos Nest (2016); and Robinhood (2020-Present). According to the internet, Willow Garage was a robotics research lab and technology incubator devoted to developing hardware and open source software for personal robotic applications. Bootup World appeared to have used the building for office space and appears to be in the business of assisting start-up companies succeed in the Silicon Valley. Cuckoos Nest appears to have been affiliated with Bootup World. Both Bootup World and Cuckoos Nest also appeared to have operated a restaurant in the building based on building records.

Partner did not identify any RECs, CRECs, HRECs, or environmental issues. Based on the conclusions of their assessment, Partner recommended no further investigation at that time.

Environmental Lien and AUL Report (68 Willow Road, Menlo Park, California), prepared by AFX Research LLC (November 8, 2019)

No environmental liens or AULs were identified for the subject property.

Copies of reports summarized above, if limited by electronic file size restrictions and/or other electronic restrictions, may not be appended to this AEI report.

Note: As some of the above documentation was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the information contained therein is beyond the scope of this assessment.

6.4 Environmental Lien and AUL Search Information Reports

To meet the requirements of 40 CFR 312.20 and 312.25, a search for the existence of environmental liens and AULs that are filed or recorded against the subject property must be conducted. The current ASTM Standard E1527 recognizes two acceptable methods to meet this requirement:

- **Method 1** consists of a review of title documents by the User (or a title professional engaged by the User) for environmental liens and AULs.

  Note: this method must be completed by the User (or a title professional engaged by the User), and thus cannot be completed by AEI.

  Refer to Section 6.2 User Provided Information for information (if any) provided by the User via the User Questionnaire.

- **Method 2** consists of obtaining and relying on title search information reports designed to search for environmental liens and AULs.

  Note: these reports are not included within the scope of the current ASTM E1527 Standard. Thus, these reports can only be obtained by a consultant if explicitly added to the agreed upon scope of work between the consultant and the client.

The inclusion of a title search information report designed to search for environmental liens and AULs was not part of AEI's approved scope of services.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	October 16, 2025
AEI Site Assessor(s)	Jason Fuller
Property Escort(s)/ Relationship(s) to Property	Mrs. Gloria Arteaga, Property Manager
Units/Areas Observed	Representative interior common areas such as: • Main lobby • Management offices • Corridors • Restrooms • Electrical/ mechanical rooms • Fire protection control room Exterior areas: • Surrounding landscaped area • Parking lot • Fountain pump room • Recreation/ outdoor break area • Breaker/ power distribution closet
Area(s) not accessed and reason(s)	Refer to Section 1.5 for discussion of limiting conditions
Other Physical Constraints	None
General Observations	The property consists of a one-story commercial office building

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use (including drums, totes, and intermediate bulk containers)		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	✔
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Wells		
Septic Systems or Cesspools		
Biomedical Wastes		
Other		

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformer

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/ No)	Non-PCB Label (Yes/ No)
Pad-Mounted	1	PG&E	Unknown	No	Yes

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

According to Pacific Gas & Electric (PG&E), no PCB-containing materials have been used in the manufacturing of transformers since 1969. In 1990, PG&E implemented a remediation program to remove and/or replace all PCB-containing transformers. According to PG&E, over 99% of transformers considered to be PCB-containing that existed prior to 1990 have been removed or replaced. AEI did not observe evidence of spills, staining, or leaks on or around the transformer. Based on this information, the on-site transformer is not considered a REC.

7.1.2 Drains, Sumps, and Clarifiers

Three storm drains were observed in the north side Willow Road of the subject property, landscaped area in the north of the building, and in the outdoor recreational area. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not considered evidence of a REC.

7.1.3 Other

Evidence of a plugged boring was observed on the southern side of the subject property. During AEI's review of agency records, a Subsurface Drilling Permit application was on file with the San Mateo County Environmental Health Services. Refer to Section 4.1 for further discussion.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Transformers

Pole-mounted transformer was observed on an adjoining property during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformer. Based on the good condition of the equipment, the transformer is not a REC.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.

Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to the client, demolition of the subject property building is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. AEI understands that demolition of the subject property building is planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 Naturally-Occurring Radon

Radon is a naturally-occurring, odorless, and invisible radioactive gas. According to the United States EPA, radon is the second leading cause of lung cancer. Natural radon levels vary and are closely related to geologic formations, soils, and foundation construction. Radon may enter buildings through basement sumps or other openings such as cracks and other holes in foundations.

US EPA Map

In 1993 the United States EPA prepared a map to assist national, state, and local organizations to target their resources and to implement radon-resistant building codes. The Map of Radon Zones should not be used to determine if individual buildings need to be tested. The map identifies counties of the US with the greatest potential for elevated indoor radon levels based on indoor radon measurement data, geology, soil parameters, and foundation types. The map divides the country into three radon zones based on potential radon accumulation, but is not to be considered predictive of radon accumulation.

The 1993 EPA map identifies the following three radon zones:

- Zone 1 - Average indoor radon levels may be greater than 4.0 pCi/L
- Zone 2 - Average indoor radon levels may be between 2.0 and 4.0 pCi/L
- Zone 3 - Average indoor radon levels may be less than 2.0 pCi/L

It is important to note that elevated levels of radon can be found in all three zones, and the EPA and other agencies recommend site-specific testing to determine radon levels at a specific property.

It should also be noted that EPA's 1993 Map of Radon Zones was based on limited data collected prior to 1993 and therefore may be supplemented with available state-developed or other data to further understand the radon potential for a specific area.

According to the US EPA, the assigned radon zone level for the County is Zone 2, which predicts an average indoor screening level between 2.0 pCi/L and 4.0 pCi/L, which is below or at the action level of 4.0 pCi/L assigned by the US EPA.

California Department of Health Services Radon Database

According to additional data obtained from California Department of Health Services Radon Database, of 153 tests conducted in the subject property zip code (94025) in 2016, 25 of the tests were above 4.0 pCi/L. While a relatively small percentage of the test results exceeded the EPA threshold, the majority of the locations sampled were below 4.0 pCi/L.

Radon sampling would be necessary to determine site-specific radon conditions. Radon sampling was not requested as part of this assessment.

8.4 Suspect Mold or Microbial Growth Conditions

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

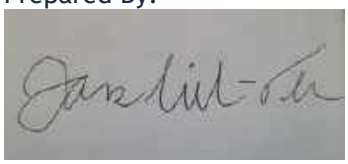

AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of suspect mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

CA RGA LUST---------- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 06/26/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
US GEOLOGICAL SURVEY	***345 MIDDLEFIELD RD***	***NW 1/4 - 1/2 (0.378 mi.)***	***R76***	***232***
Site ID: 0904273				
EPA Id: CA2470090364				

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there are 2 CA RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/21/2025 has revealed that there are 9 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 4 CA UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 41 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 06/23/2025 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 20 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	03-03-2021
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 05/17/2021. Observed plastic carboys containers of hazardous waste without plugs for unused cap openings (bldg 15, rm 1118, 2063, 2053). These must be plugged for the container to be considered closed. Please apply appropriate plugs for these caps and verify with inspector within 30 days.

Site Name:	US GEOLOGICAL SURVEY
Violation Date:	03-03-2021
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 05/17/2021. Facility may be meeting the accumulation threshold requirement but is unable to demonstrate compliance at this time. Please develop procedures to track the time each container of "satellite" waste spends in labs and at the facility overall. Provide copies of these procedures to the inspector within 30 days. Also, ensure that the "satellite" containers are under the control of the operator of the process generating the waste and in the line of sight of the operator to ensure that the operator controls all access to and management of the accumulated waste.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 22226
Site Name: CPA FIRE STATION 1
Violation Date: 12-06-2022
Citation: HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293
Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.
Violation Notes: Returned to compliance on 12/04/2024. DUSTO visual inspection reports indicate the date of last SB989 Secondary Containment testing as occurring on 12/21/2021. Review of prior test reports indicate the last date of SB989 testing as occurring on 12/17/2020. Ensure that the DUSTO visual inspections are correctly filled out, including the correct date of last testing for SB989 Secondary Containment testing.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 22226
Site Name: CPA FIRE STATION 1
Violation Date: 12-17-2020
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30

PALO ALTO FIRE STATION #1 (Continued) **S103880916**

	days.
Violation Notes:	Returned to compliance on 12/21/2021. DUSTO was unaware of rule change requiring inspection at least every thirty days, was conducting inspections 1 time per month, exceeding the 30 day window3/26-4/29, 5/26-6/27 and 8/27-9/28 in 2020. Discussed with DUSTO need to inspect at least every 30 days, which may precipitate more than one inspection in one month during the year.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	UST
Violation Source:	CERS,
Site ID:	22226
Site Name:	CPA FIRE STATION 1
Violation Date:	12-21-2021
Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	Returned to compliance on 12/21/2021. The diesel float and chain mechanism was adjusted by the service technician, tested and functioned as required. No further action is needed.

Violation Date:	12-05-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 12/05/2019. Spill bucket was filled without inspector onsite, and upon arrival noted to have lost liquid. Swivel adaptor was tightened and bucket refilled. Bucket held water for one hour without loss upon retest. NO RESPONSE REQUIRED, VIOLATION WAS ABATED DURING THE INSPECTION.

Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 12/27/2023. The facility failed to retain copies of their Spill Containment testing report from 2022.

Eval Notes: CPA FIRE STATION 1 On site to witness Overfill Prevention Equipment Inspection with John Puumalai of JP Petroleum Service Inc. Mr. Puumalai's certifications were verified. Inspection began on 10/11/2024 and concluded today with delivery of this report. Shutoff percentage for the overfill prevention valves were calculated using a manufacturer worksheet and manufacturer tank charts. Based on measurements and calculations, overfill prevention valves provide shutoff at the following heights: 1,000 gallon 87 tank: full volume = 1,002. Mechanical overfill prevention valve is set to shut off at 54.5" or 912 gallons =91.0% 1,000 gallon diesel tank: full volume = 1,002. Mechanical overfill prevention valve is set to shut off at 83.0" or 890 gallons =88.8% Mechanical overfill prevention valves were tested to show functionality. Submit a copy of the overfill prevention equipment inspection test report to our office within 30 days of the test date.

Dwr Groundwater Subbasin Name:	Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community:	Not reported
CA Enviroscreen 3 Score:	31-35%
CA Enviroscreen 4 Score:	15-20%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Previous fuel leak case closed on 10/31/2000. Responsible party chose to retain 8 wells and continued groundwater monitoring through 2010. All wells were destroyed in 2010. Groundwater concentrations were <50 micrograms per liter (ug/L) Total Petroleum Hydrocarbons as gasoline (TPHg), <0.50 ug/L benzene, <1.0 ug/L toluene, <1.0 ug/L ethylbenzene, <1.0 ug/L xylenes, and <1.0 MTBE at that time. February 2011 Tank Removal: Paradiso Mechanical, Inc. (Paradiso) removed three 12,000-gallon gasoline USTs, three hydraulic lifts, product dispensers, and associated piping. Conestoga-Rovers & Associates (CRA) collected nine soil samples from the bottom of the UST

SHELL - 355 ALMA (Continued) **U001595839**

excavation at depths of 15 to 16 fbg. TPHg and BTEX were not detected in any of the soil samples. January 2012 Phase I Environmental Site Assessment (Phase I ESA): Romig Engineers, Inc. conducted a Phase I ESA and advanced nine soil borings (RB-1 through RB-9). A maximum concentration of TPHg at 3,800 milligrams per kilogram (mg/kg) was detected in soil boring RB-5 at 29.5 to 30 fbg. Benzene was only detected in one soil boring, RB-5, at 39.5 to 40 fbg, at a concentration of 0.011 mg/kg. Maximum concentrations of MTBE and tertiary-butyl alcohol (TBA) were detected in soil boring RB-2 at 35 to 35.5 fbg, at 4.6 mg/kg and 2.5 mg/kg, respectively. Grab groundwater samples were collected from first-encountered groundwater in soil borings RB-5 and RB-9. A maximum concentration of TPHg at 1,600 ug/L was detected in boring RB-5. Up to 12 ug/L of benzene, 600 ug/L of MTBE, and 190 ug/L of TBA were detected in first encountered groundwater from RB-5. April 2012 The fuel leak case was re-opened based on information provided to DEH in a meeting on March 15, 2012. A plan was discussed to remove the residual contamination by excavation. Erler & Kalinowski, Inc. (EKI) prepared a Soil Management Plan (SMP) to facilitate the development of the site during excavation activities. For off-site disposal pre-characterization, EKI advanced 4 depth-discrete soil borings (B-1 through B-4) and 16 composite samples (C-0-3 through C-33-38 and D-0-3 through D-28-33) and collected first-encountered grab groundwater from soil borings B-2 through B-4. Up to 406 mg/kg TPHg was detected in soil samples. No benzene, MTBE, or TBA was detected in any of the soil borings. Up to 13,400 ug/L TPHg was detected in grab groundwater from soil boring B-4. Up to 0.61 ug/L benzene was detected in soil boring B-2, and up to 1,390 ug/L of MTBE was detected in soil boring B-3. No TBA was detected in any of the grab groundwater samples. November 2013 Excavation Report: EKI submitted an excavation report summarizing excavation activities for the development of a two-story subgrade parking structure with an overlying four-story commercial building. Excavation activities occurred from August 7, 2012 through January 3, 2013. The excavation was to an approximate depth of 34 feet across the entire site and removed approximately 26,000 bank cubic yards of soil. No confirmation soil sampling was conducted. Due to the proximity of groundwater, a barrier will be installed prior to construction of the two-story underground parking garage. The site will be developed with first floor commercial with residential units above.

Waste Description:	1,4-Dichlorobenzene
Waste Code:	D028
Waste Description:	1,2-Dichloroethane
Waste Code:	D029
Waste Description:	1,1-Dichloroethylene
Waste Code:	D030
Waste Description:	2,4-Dinitrotoluene

SRI INTERNATIONAL (Continued) **1000120184**

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D034
Waste Description: Hexachloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

SRI INTERNATIONAL (Continued) **1000120184**

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P003
Waste Description: 2-Propenal (Or) Acrolein

Waste Code: P005
Waste Description: 2-Propen-1-Ol (Or) Allyl Alcohol

Waste Code: P011
Waste Description: Arsenic Oxide As2o5 (Or) Arsenic Pentoxide

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P014
Waste Description: Benzenethiol (Or) Thiophenol

Waste Code: P018
Waste Description: Brucine (Or) Strychnidin-10-One, 2,3-Dimethoxy-

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P024
Waste Description: Benzenamine, 4-Chloro- (Or) P-Chloraniline

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P037
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2aalpha, 3beta, 6beta, 6aalpha, 7beta, 7aalpha)- (Or) Dieldrin

Waste Code: P041

SRI INTERNATIONAL (Continued) **1000120184**

Waste Description:	Diethyl-P-Nitrophenyl Phosphate (Or) Phosphoric Acid, Diethyl 4-Nitrophenyl Ester
Waste Code:	P048
Waste Description:	2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-
Waste Code:	P054
Waste Description:	Aziridine (Or) Ethyleneimine
Waste Code:	P064
Waste Description:	Methane, Isocyanato- (Or) Methyl Isocyanate
Waste Code:	P067
Waste Description:	1,2-Propylenimine (Or) Aziridine, 2-Methyl-
Waste Code:	P068
Waste Description:	Hydrazine, Methyl- (Or) Methyl Hydrazine
Waste Code:	P069
Waste Description:	2-Methyllactonitrile (Or) Propanenitrile, 2-Hydroxy-2-Methyl-
Waste Code:	P072
Waste Description:	Alpha-Naphthylthiourea (Or) Thiourea, 1-Naphthalenyl-
Waste Code:	P075
Waste Description:	Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts
Waste Code:	P076
Waste Description:	Nitric Oxide (Or) Nitrogen Oxide No
Waste Code:	P077
Waste Description:	Benzenamine, 4-Nitro- (Or) P-Nitroaniline
Waste Code:	P078
Waste Description:	Nitrogen Dioxide (Or) Nitrogen Oxide No2
Waste Code:	P081
Waste Description:	1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)
Waste Code:	P082
Waste Description:	Methanimine, N-Methyl-N-Nitroso- (Or) N-Nitrosodimethylamine
Waste Code:	P087
Waste Description:	Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide
Waste Code:	P089
Waste Description:	Parathion (Or) Phosphorothioic Acid, O,O-Diethyl-O-(4-Nitrophenyl) Ester
Waste Code:	P093
Waste Description:	Phenylthiourea (Or) Thiourea, Phenyl-
Waste Code:	P095
Waste Description:	Carbonic Dichloride (Or) Phosgene
Waste Code:	P098

SRI INTERNATIONAL (Continued) **1000120184**

Waste Description:	Potassium Cyanide (Or) Potassium Cyanide K(Cn)
Waste Code:	P101
Waste Description:	Ethyl Cyanide (Or) Propanenitrile
Waste Code:	P102
Waste Description:	2-Propyn-1-Ol (Or) Propargyl Alcohol
Waste Code:	P104
Waste Description:	Silver Cyanide (Or) Silver Cyanide Ag(Cn)
Waste Code:	P105
Waste Description:	Sodium Azide
Waste Code:	P106
Waste Description:	Sodium Cyanide (Or) Sodium Cyanide Na(Cn)
Waste Code:	P108
Waste Description:	Strychnidin-10-One, & Salts (Or) Strychnine, & Salts
Waste Code:	P112
Waste Description:	Methane, Tetranitro- (R) (Or) Tetranitromethane (R)
Waste Code:	P113
Waste Description:	Thallic Oxide (Or) Thallium Oxide Tl2o3
Waste Code:	P116
Waste Description:	Hydrazinecarbothioamide (Or) Thiosemicarbazide
Waste Code:	P119
Waste Description:	Ammonium Vanadate (Or) Vanadic Acid, Ammonium Salt
Waste Code:	P120
Waste Description:	Vanadium Oxide V2o5 (Or) Vanadium Pentoxide
Waste Code:	P205
Waste Description:	Zinc, Bis(Dimethylcarbamodithioato-S,S')-, (Or) Ziram
Waste Code:	U001
Waste Description:	Acetaldehyde (I) (Or) Ethanal (I)
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)
Waste Code:	U003
Waste Description:	Acetonitrile (I,T)
Waste Code:	U004
Waste Description:	Acetophenone (Or) Ethanone, 1-Phenyl-
Waste Code:	U006
Waste Description:	Acetyl Chloride (C,R,T)
Waste Code:	U007
Waste Description:	2-Propenamide (Or) Acrylamide
Waste Code:	U008

SRI INTERNATIONAL (Continued) **1000120184**

Waste Description:	2-Propenoic Acid (I) (Or) Acrylic Acid (I)
Waste Code:	U009
Waste Description:	2-Propenenitrile (Or) Acrylonitrile
Waste Code:	U012
Waste Description:	Aniline (I,T) (Or) Benzenamine (I,T)
Waste Code:	U018
Waste Description:	Benz[A]Anthracene
Waste Code:	U019
Waste Description:	Benzene (I,T)
Waste Code:	U020
Waste Description:	Benzenesulfonic Acid Chloride (C,R) (Or) Benzenesulfonyl Chloride (C,R)
Waste Code:	U022
Waste Description:	Benzo[A]Pyrene
Waste Code:	U029
Waste Description:	Methane, Bromo- (Or) Methyl Bromide
Waste Code:	U031
Waste Description:	1-Butanol (I) (Or) N-Butyl Alcohol (I)
Waste Code:	U033
Waste Description:	Carbon Oxyfluoride (R,T) (Or) Carbonic Difluoride
Waste Code:	U037
Waste Description:	Benzene, Chloro- (Or) Chlorobenzene
Waste Code:	U039
Waste Description:	P-Chloro-M-Cresol (Or) Phenol, 4-Chloro-3-Methyl-
Waste Code:	U041
Waste Description:	Epichlorohydrin (Or) Oxirane, (Chloromethyl)-
Waste Code:	U044
Waste Description:	Chloroform (Or) Methane, Trichloro-
Waste Code:	U045
Waste Description:	Methane, Chloro- (I,T) (Or) Methyl Chloride (I,T)
Waste Code:	U046
Waste Description:	Chloromethyl Methyl Ether (Or) Methane, Chloromethoxy-
Waste Code:	U048
Waste Description:	O-Chlorophenol (Or) Phenol, 2-Chloro-
Waste Code:	U050
Waste Description:	Chrysene
Waste Code:	U051
Waste Description:	Creosote

SRI INTERNATIONAL (Continued) **1000120184**

Waste Code: U052
Waste Description: Cresol (Cresylic Acid) (Or) Phenol, Methyl-

Waste Code: U053
Waste Description: 2-Butenal (Or) Crotonaldehyde

Waste Code: U055
Waste Description: Benzene, (1-Methylethyl)- (I) (Or) Cumene (I)

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U061
Waste Description: Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Chloro- (Or) Ddt

Waste Code: U067
Waste Description: Ethane, 1,2-Dibromo- (Or) Ethylene Dibromide

Waste Code: U068
Waste Description: Methane, Dibromo- (Or) Methylene Bromide

Waste Code: U069
Waste Description: 1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate

Waste Code: U070
Waste Description: Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene

Waste Code: U071
Waste Description: Benzene, 1,3-Dichloro- (Or) M-Dichlorobenzene

Waste Code: U072
Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U077
Waste Description: Ethane, 1,2-Dichloro- (Or) Ethylene Dichloride

Waste Code: U078
Waste Description: 1,1-Dichloroethylene (Or) Ethene, 1,1-Dichloro-

Waste Code: U079
Waste Description: 1,2-Dichloroethylene (Or) Ethene, 1,2-Dichloro-,(E)-

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U081
Waste Description: 2,4-Dichlorophenol (Or) Phenol, 2,4-Dichloro-

Waste Code: U084
Waste Description: 1,3-Dichloropropene (Or) 1-Propene, 1,3-Dichloro-

Waste Code: U088
Waste Description: 1,2-Benzenedicarboxylic Acid, Diethyl Ester (Or) Diethyl Phthalate

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis,

SRI INTERNATIONAL (Continued) **1000120184**

(E)-

Waste Code: U092
Waste Description: Dimethylamine (I) (Or) Methanamine, N-Methyl- (I)

Waste Code: U094
Waste Description: 7,12-Dimethylbenz[A]Anthracene (Or) Benz[A]Anthracene, 7,12-Dimethyl-

Waste Code: U095
Waste Description: [1,1'-Biphenyl]-4,4'-Diamine, 3,3'-Dimethyl- (Or) 3,3'-Dimethylbenzidine

Waste Code: U096
Waste Description: Alpha,Alpha-Dimethylbenzylhydroperoxide (R) (Or) Hydroperoxide, 1-Methyl-1-Phenylethyl- (R)

Waste Code: U097
Waste Description: Carbamic Chloride, Dimethyl- (Or) Dimethylcarbamoyl Chloride

Waste Code: U098
Waste Description: 1,1-Dimethylhydrazine (Or) Hydrazine, 1,1-Dimethyl-

Waste Code: U101
Waste Description: 2,4-Dimethylphenol (Or) Phenol, 2,4-Dimethyl-

Waste Code: U102
Waste Description: 1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

Waste Code: U105
Waste Description: 2,4-Dinitrotoluene (Or) Benzene, 1-Methyl-2,4-Dinitro-

Waste Code: U106
Waste Description: 2,6-Dinitrotoluene (Or) Benzene, 2-Methyl-1,3-Dinitro-

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U109
Waste Description: 1,2-Diphenylhydrazine (Or) Hydrazine, 1,2-Diphenyl-

Waste Code: U110
Waste Description: 1-Propanimine, N-Propyl-(I) (Or) Dipropylamine (I)

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U113
Waste Description: 2-Propenoic Acid, Ethyl Ester (I) (Or) Ethyl Acrylate (I)

Waste Code: U115
Waste Description: Ethylene Oxide (I,T) (Or) Oxirane (I,T)

Waste Code: U116
Waste Description: 2-Imidazolidinethione (Or) Ethylenethiourea

SRI INTERNATIONAL (Continued) **1000120184**

Waste Code:	U117
Waste Description:	Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)
Waste Code:	U119
Waste Description:	Ethyl Methanesulfonate (Or) Methanesulfonic Acid, Ethyl Ester
Waste Code:	U121
Waste Description:	Methane, Trichlorofluoro- (Or) Trichloromonofluoromethane
Waste Code:	U122
Waste Description:	Formaldehyde
Waste Code:	U123
Waste Description:	Formic Acid (C,T)
Waste Code:	U125
Waste Description:	2-Furancarboxaldehyde (I) (Or) Furfural (I)
Waste Code:	U127
Waste Description:	Benzene, Hexachloro- (Or) Hexachlorobenzene
Waste Code:	U128
Waste Description:	1,3-Butadiene, 1,1,2,3,4,4-Hexachloro- (Or) Hexachlorobutadiene
Waste Code:	U129
Waste Description:	Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane
Waste Code:	U130
Waste Description:	1,3-Cyclopentadiene, 1,2,3,4,5,5-Hexachloro- (Or) Hexachlorocyclopentadiene
Waste Code:	U131
Waste Description:	Ethane, Hexachloro- (Or) Hexachloroethane
Waste Code:	U132
Waste Description:	Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-
Waste Code:	U133
Waste Description:	Hydrazine (R,T)
Waste Code:	U134
Waste Description:	Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)
Waste Code:	U135
Waste Description:	Hydrogen Sulfide (Or) Hydrogen Sulfide H2s
Waste Code:	U136
Waste Description:	Arsinic Acid, Dimethyl- (Or) Cacodylic Acid
Waste Code:	U138
Waste Description:	Methane, Iodo- (Or) Methyl Iodide
Waste Code:	U140
Waste Description:	1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)
Waste Code:	U141

SRI INTERNATIONAL (Continued) **1000120184**

Waste Description:	1,3-Benzodioxole, 5-(1-Propenyl)- (Or) Isosafrole
Waste Code:	U144
Waste Description:	Acetic Acid, Lead(2+) Salt (Or) Lead Acetate
Waste Code:	U146
Waste Description:	Lead Subacetate (Or) Lead, Bis(Acetato-O)Tetrahydroxytri-
Waste Code:	U147
Waste Description:	2,5-Furandione (Or) Maleic Anhydride
Waste Code:	U149
Waste Description:	Malononitrile (Or) Propanedinitrile
Waste Code:	U151
Waste Description:	Mercury
Waste Code:	U152
Waste Description:	2-Propenenitrile, 2-Methyl- (I,T) (Or) Methacrylonitrile (I,T)
Waste Code:	U153
Waste Description:	Methanethiol (I,T) (Or) Thiomethanol (I,T)
Waste Code:	U154
Waste Description:	Methanol (I) (Or) Methyl Alcohol (I)
Waste Code:	U156
Waste Description:	Carbonochloridic Acid, Methyl Ester, (I,T) (Or) Methyl Chlorocarbonate (I,T)
Waste Code:	U157
Waste Description:	3-Methylcholanthrene (Or) Benz[J]Aceanthrylene, 1,2-Dihydro-3-Methyl-
Waste Code:	U160
Waste Description:	2-Butanone, Peroxide (R,T) (Or) Methyl Ethyl Ketone Peroxide (R,T)
Waste Code:	U161
Waste Description:	4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-
Waste Code:	U162
Waste Description:	2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)
Waste Code:	U163
Waste Description:	Guanidine, N-Methyl-N'-Nitro-N-Nitroso- (Or) Mnng
Waste Code:	U164
Waste Description:	4(1h)-Pyrimidinone, 2,3-Dihydro-6-Methyl-2-Thioxo- (Or) Methylthiouracil
Waste Code:	U165
Waste Description:	Naphthalene
Waste Code:	U168
Waste Description:	2-Napthalenamine (Or) Beta-Naphthylamine

SRI INTERNATIONAL (Continued) **1000120184**

Waste Code: U169
Waste Description: Benzene, Nitro- (Or) Nitrobenzene (I,T)

Waste Code: U170
Waste Description: P-Nitrophenol (I,T) (Or) Phenol, 4-Nitro-

Waste Code: U171
Waste Description: 2-Nitropropane (I,T) (Or) Propane, 2-Nitro- (I,T)

Waste Code: U174
Waste Description: Ethanamine, N-Ethyl-N-Nitroso- (Or) N-Nitrosodiethylamine

Waste Code: U181
Waste Description: 5-Nitro-O-Toluidine (Or) Benzenamine, 2-Methyl-5-Nitro

Waste Code: U188
Waste Description: Phenol

Waste Code: U189
Waste Description: Phosphorus Sulfide (R) (Or) Sulfur Phosphide (R)

Waste Code: U190
Waste Description: 1,3-Isobenzofurandione (Or) Phthalic Anhydride

Waste Code: U193
Waste Description: 1,2-Oxathiolane, 2,2-Dioxide (Or) 1,3-Propane Sultone

Waste Code: U196
Waste Description: Pyridine

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U209
Waste Description: 1,1,2,2-Tetrachloroethane (Or) Ethane, 1,1,2,2-Tetrachloro-

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U214

SRI INTERNATIONAL (Continued) **1000120184**

Waste Description:	Acetic Acid, Thallium(1+) Salt (Or) Thallium(I) Acetate
Waste Code:	U215
Waste Description:	Carbonic Acid, Dithallium(1+) Salt (Or) Thallium(I) Carbonate
Waste Code:	U216
Waste Description:	Thallium Chloride Tlcl (Or) Thallium(I) Chloride
Waste Code:	U218
Waste Description:	Ethanethioamide (Or) Thioacetamide
Waste Code:	U219
Waste Description:	Thiourea
Waste Code:	U220
Waste Description:	Benzene, Methyl- (Or) Toluene
Waste Code:	U221
Waste Description:	Benzenediamine, Ar-Methyl- (Or) Toluenediamine
Waste Code:	U223
Waste Description:	Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)
Waste Code:	U225
Waste Description:	Bromoform (Or) Methane, Tribromo-
Waste Code:	U226
Waste Description:	Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform
Waste Code:	U227
Waste Description:	1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-
Waste Code:	U228
Waste Description:	Ethene, Trichloro- (Or) Trichloroethylene
Waste Code:	U236
Waste Description:	2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue
Waste Code:	U238
Waste Description:	Carbamic Acid, Ethyl Ester (Or) Ethyl Carbamate (Urethane)
Waste Code:	U239
Waste Description:	Benzene, Dimethyl- (I,T) (Or) Xylene (I)
Waste Code:	U240
Waste Description:	2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D
Waste Code:	U246
Waste Description:	Cyanogen Bromide (Cn)Br
Waste Code:	U247
Waste Description:	Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Methoxy- (Or) Methoxychlor

SRI INTERNATIONAL (Continued) **1000120184**

Waste Code: U279
Waste Description: U279

Waste Code: U353
Waste Description: Benzenamine, 4-Methyl- (Or) P-Toluidine

Waste Code: U395
Waste Description: Diethylene Glycol, Dicarbamate (Or) Ethanol, 2,2'-Oxybis-, Dicarbamate

Waste Code: U404
Waste Description: U404

Name: SRI INTERNATIONAL
Address: 333 RAVENSWOOD AVE
City,State,Zip: MENLO PARK, CA 94025
Site ID: 70840
CERS ID: 10154001
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 70840
Site Name: SRI INTERNATIONAL
Violation Date: 02-24-2021
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: RCRA Large Quantity Generator - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 07/16/2021. Observed open containers of volatile substances being evaporated in hoods in labs LB293, LB360, and LB276. This constitutes illegal disposal of a hazardous waste. Cease these activities in these specific situations and provide special training in this aspect of hazardous waste handling at least to those in these labs and as needed based on your own assessment of this practice at SRI. Provide inspector with corrective action verification within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HWLQG
Violation Source: CERS,

Site ID: 70840
Site Name: SRI INTERNATIONAL
Violation Date: 02-24-2021
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations, Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator Total time hzardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with sections 66265.171, 66264.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 07/16/2021. Facility may be meeting this requirement but is unable to demonstrate compliance at this time. Please develop procedures to track the time each container of "satellite" waste spends in labs and at the facility overall. Provide copies of these procedures to the inspector within 30 days.

Site Name: SRI INTERNATIONAL
Violation Date: 03-06-2018
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 04/18/2019. During the 2-11-18 inspection, several open hazardous waste containers - HPLC solvent filter - were observed. Within 30 days, please provide procedures for handling these filters, which are hazardous waste when discarded.

	Section(s) Multiple
Violation Description:	RCRA Large Quantity Generator - Release/Leaks/Spills - General
Violation Notes:	Returned to compliance on 04/26/2021. Spills or leaks were observed in several labs and lab storage areas: LB293 (trimethylsilyl trifluoromethanesulfonate bottle with wet-looking residue), LB218 (white powder on floor of right cabinet below hood in the right front corner), LB204 (mercaptothiazoline bottle with wet-looking residue), LA145 (stain down front of cabinet and onto floor), PN360 (leaking ethylene glycol). Spills must be cleaned up immediately. Clean these spills up as soon as possible and provide inspector photo verification within 30 days. Ensure all staff are trained to cleanup spills of hazardous materials or hazardous waste immediately.

Violation Date:	02-24-2021
Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 07/16/2021. Housekeeping could be improved. In lab LB287 under hood cabinet labeled "Toxic" observed dusty bottles of NaOH, electrical cords, various equipment, and debris; LA209 observed shaker table coated with residue - the next user will not know whether the residue is hazardous. Chemical storage could be improved. Chemicals should generally not be stored in fume hoods as it can interfere with the flow of air and incompatibles can produce a dangerous reaction. It appears that incompatible storage may be occurring as multiple hazard class labels were observed on single chemical cabinets in labs LB218-corrosive, flammable liquid, poison, and dangerous when wet; LB204-flammable solid and toxic;

SRI INTERNATIONAL (Continued) **1007294586**

LB287-flammable, corrosive, poison and another flammable sticker on the wall behind the cabinet. Cabinet labeling could be improved. Some old labels remain on cabinets or are partially ripped off (LB287). One cabinet in LB204 had 2 flammable solid labels and one flammable label. One flammable [Truncated]

Violation Date: 03-06-2018
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 03/06/2018. During 12-21-17 inspection several labs were inactive with no obvious activity but no posted notice on the lab door (as required) to indicate the lab was undergoing closure. Laboratory occupants are required to prepare a checklist (found on the SRI EH&S website) of events, time schedules, and people involved with the move and to consult EH&S early in the planning process. Labs N228, N226, and PS168 appeared to have begun closure but no notice was posted on the lab door. During the 12-21-17 inspection, many old chemicals were observed in upper cabinets in PN208. The lab occupant indicated that he had "inherited" these chemicals, which were the responsibility of another scientist who was not present. Most of the bottles were bar-coded indicating registration in the SRI chemical database. The lack of awareness of what is stored in the lab is a hazard in case of an accident. During the 1-11-18 inspection, B016 appeared to have begun closure but no notice was posted [Truncated]

Violation Description:	RCRA Large Quantity Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 03/19/2018. During the 2-11-18 inspection, chemicals were stored in a waste-like manner in B-218, B-246, and possibly other labs in the same building. Many of the bottles are unlabeled, stored under other supplies, on their sides, or upside down. The manner of storage does not indicate these chemicals represent valued product, in fact many chemicals appear to be abandoned. During the 12-21-17 inspection, many old chemicals were observed in upper cabinets in PN208. The lab occupant indicated that he had "inherited" these chemicals, which were the responsibility of another scientist who occupied a different lab space. It was unclear whether the chemicals (some of them expired and on site for up to 20+ years) had been abandoned, are waste, or are re-usable product. According to 22 CCR 66261.2, a material is a waste if it poses a threat to the environment or human health and it meets either, or both, of the following: 1) it is mislabeled or not adequately labeled, unless the [Truncated]

Eval Notes: Inspection conducted during Covid-19 pandemic. SRI manages waste in all labs and other locations under "satellite" requirements. Based on the last biennial report, hazardous waste includes the following in decreasing volume: non-halogenated solvents, lab debris contaminated with non-halogenated solvents, lab-pack chemicals from lab shutdowns, aqueous corrosives, halogenated solvents, silicon powder, spent corrosives (etchants), organic lab debris, ignitables from pharmaceutical lab, contaminated containers. They also generate notable quantities of lamps and ewaste.

Eval Notes: Recent changes in business have reduced the number of researchers and caused a greater turn over in scientists. It appears that some inspected labs with open containers and old chemicals may be vacant. Responsible parties for remaining chemicals and abandoned experiments were not clear from SRI staff responses. SRI has a form for documenting proper lab clearance. These forms were not provided for labs observed to be vacated or for which an assigned researcher could not be found. Recommend adding a lab closure/transfer/clearance section to the hazardous waste management training describing procedures for safe decommissioning of chemicals and equipment, official forms, and accountability. SRI conserves resources by sharing chemicals (expired and otherwise) among researchers. Reusable chemicals are stored in plastic bins in individual labs and identified by interested researchers through the facility's inventory system. To ensure communication of these chemicals availability, [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste

HEWLETT PACKARD LYTTON AVE (Continued) **1005441344**

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U003
Waste Description: Acetonitrile (I,T)

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Feature Description:	The Citizens Committee Of San Francisco Offered To Procure For The War Department A One Year Lease Rent Free, Of Approximately 25,000 Acres Of Land In The Vicinity Of Palo Alto, California, For Army Training Purposes. Construction Of Camp Fremont Began Before Leases Were Acquired On 25 July 1917. The Site Consisted Of Four Major Units: Camp Fremont; The Base Hospital And A Remount Depot; Rifle Range, Artillery Range, Machine Gun And Pistol Range; And Maneuvering Area. According To The Completion Report Of Camp Fremont Dated 31 May 1919, Two-Hundred And Thirty Eight Leases, Licenses, Or Right-Of-Way

CAMP FREMONT (Continued) **1024903357**

Easements Were Made With Multiple Landowners Covering Approximately 67,391.98 Acres In Menlo Park And Palo Alto. Camp Fremont Was One Of Sixteen Mobilization Camps Put Up To Train A National Army For World War I. The Main Purpose Of The Camp During World War I Was To Build Fighting Teams For A Military Expedition To France And Included Bayonet Practice, Hand Grenade Training, Rifle Practice, Trench Warfare, And Gas Chamber Practice. A Rifle Range, Machine Gun Range, Pistol Range, Grenade Course And Bayonet Range Were Built And Used Extensively In Division Training. A Notice Of Cancellation Of Certain Leases Was Issued On 30 December 1918 And Implemented 31 January 1919. The Proceedings Of The Board Of Claims Convened At Camp Fremont On 27 February 1919. The Claims That Arose Out Of The Occupancy Of Lands For Camp Fremont Cantonment Site Were Heard And Reported Upon By 27 February 1919. Camp Fremont Closed Officially In August 1919.

Feature Description: The War Department Acquired 128.15 Acres From Wells Fargo Bank & Union Trust Company In Two Fee Acquisitions Using A Declaration Of Taking Filed 11 August 1943 For 127.23 Acres And A Declaration Of Taking Filed 4 April 1944 For .92 Acres. A Leasehold Agreement For 11.94

DIBBLE GENERAL HOSPITAL (Continued) **1024903729**

Acres Was Signed With Claude T. Lindsay, A Private Individual, On 15 February 1945. Total Acreage Acquired For The Site Was 140.09 Acres Plus A Permitted Easement To Run A Sewer Line .75 Mile To Connect With The Sewer Line For The Palo Alto Veterans Association Hospital. The Site Was Used As A 2,700-Bed Army General Hospital During World War Ii. There Were 115 Buildings Constructed On The Site By The End Of 1943. On 31 October 1945, The General Services Administration (Gsa) Terminated 7.52 Lease Acres And Returned The Land To The Owner, Claude T. Lindsay. On 31 July 1946, 127.27 Fee Acres And 4.42 Lease Acres Were Transferred To The Federal Public Housing Authority (Fpha). On 5 August 1946, The Remaining 0.88 Fee Acres Were Disposed To The War Assets Administration (Waa). The Fpha Returned The 4.42 Lease Acres Back To The Owner, Claude T. Lindsay. On 7 May 1947, Fpha Declared A Total Of 41.607 Fee Acres To Waa. The Remaining 85.644 Fee Acres Were Utilized By Fpha For Student/Veterans Housing Purposes At Leland Stanford Jr. University (Stanford Village) Beginning 15 March 1946.
The Waa Disposed Of A Total Of 42.533 Acres As Follows: On 21 November 1947, Waa Quitclaimed 0.88 Acres To The San Mateo County Missionary Church Extension Society Of The Methodist Church. On 29 September 1948, Waa Quitclaimed Two Parcels Containing 5.237 Acres And 5.646 Acres, Respectively, To Sequoia Union High School District, Redwood City, Ca. On 29 July 1948, Waa Quitclaimed 2.76 Acres To The Menlo Park Sanitary District. On 2 May 1949, Waa Quitclaimed 25.21 Acres To The City Of Menlo Park. On 19 April 1949, Waa Quitclaimed 0.91 Acres And 1.89 Acres, Respectively, To The City Of Menlo Park.

Comments: The Groundwater Monitoring Report 1st Quarter 2015 presents the groundwater monitoring event that was conducted on the site on March 4, 2015 which was fourth event since the groundwater monitoring wells were installed in April and May 2014 and completed one annual cycle of monitoring events. Tetrachloroethylene was detected in four of the six monitoring wells at concentrations ranging from 0.7 to 43

TOWN & COUNTRY CLEANERS (Continued) **1006012242**

micrograms per liter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 05/12/2015
Comments: The Investigation of Buildings 3 and 4 report documents the information that was obtained on the construction and ventilation of Buildings 3 and 4 at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 10/22/2014
Comments: Soil gas probes were installed and sampled by the mobile lab. The work was performed as outlined in the Technical Memorandum, Work Plan for Groundwater Monitoring and Work Plan Addendum for Soil Gas Sampling approved by DTSC on February 7, 2014.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal

TOWN & COUNTRY CLEANERS (Continued) **1006012242**

environmental programs.
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/26/2025

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

Data Release Frequency: Semi-Annually

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

SAN FRANCISO COUNTY:

SAN FRANCISCO MAHER: Maher Ordinance Property Listing
A listing of properties that fall within a Maher Ordinance, for all of San Francisco. The Maher Ordinance requires San Francisco Department of Public Health (DPH) oversight for the characterization and mitigation of hazardous substances found in soil, soil vapor, and groundwater in areas designated within the Maher map. The Maher map includes areas with current or historical industrial use or zoning; areas within 100 feet of current or historical underground tanks; filled former Bay, marsh, or creek areas; or areas within 150 feet of a current or former elevated highway. City of San Francisco Planning.

Date of Government Version: 07/13/2025
Date Data Arrived at EDR: 07/14/2025

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

517912
68 WILLOW ROAD
MENLO PARK, CA 94025

TARGET PROPERTY COORDINATES

Latitude (North):	37.452101 - 37° 27' 7.56''
Longitude (West):	122.166065 - 122° 9' 57.83''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	573761.1
UTM Y (Meters):	4145149.5
Elevation:	57 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005384 PALO ALTO, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

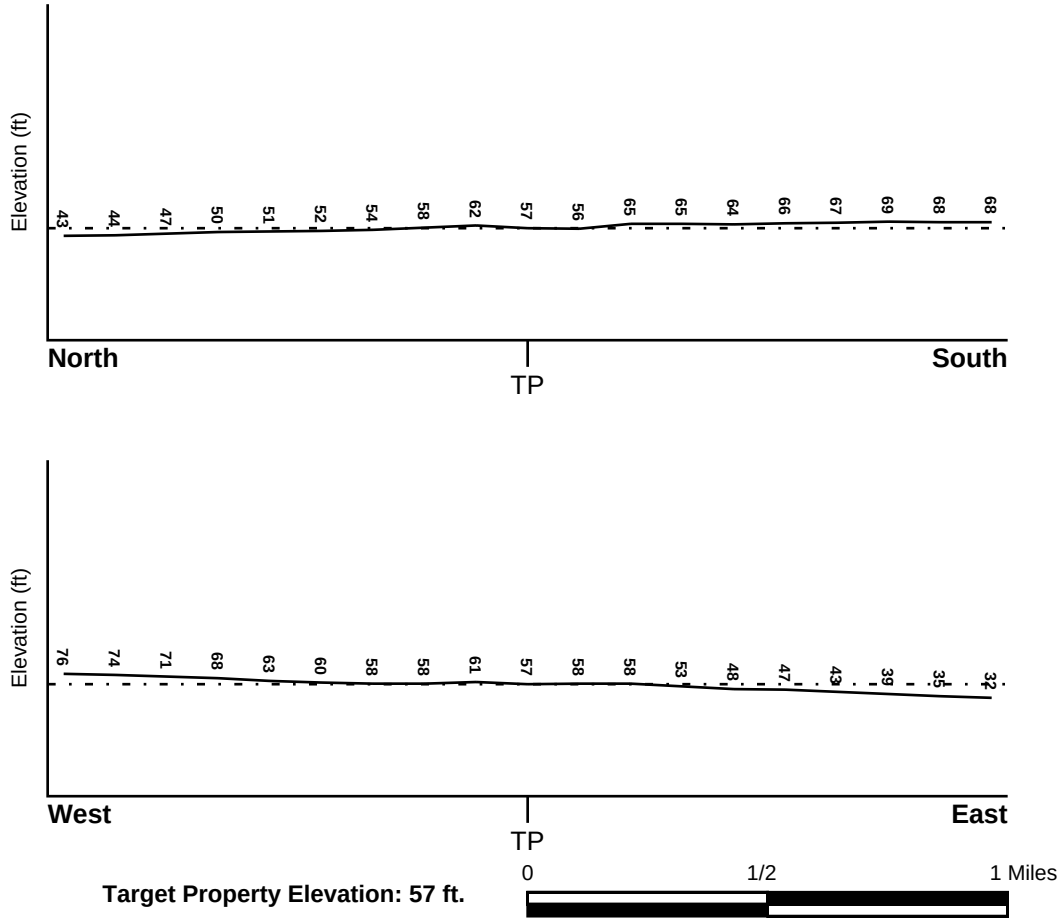

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06081C0308E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06081C0309E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
PALO ALTO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
E13	1/4 - 1/2 Mile SW	E
F17	1/2 - 1 Mile WSW	E

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
2G	1/2 - 1 Mile NNE	Not Reported
3G	1/2 - 1 Mile WNW	E
4G	1/2 - 1 Mile WNW	Not Reported
5G	1/2 - 1 Mile WSW	NE
6G	1/2 - 1 Mile WSW	E
7G	1/4 - 1/2 Mile SW	E

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

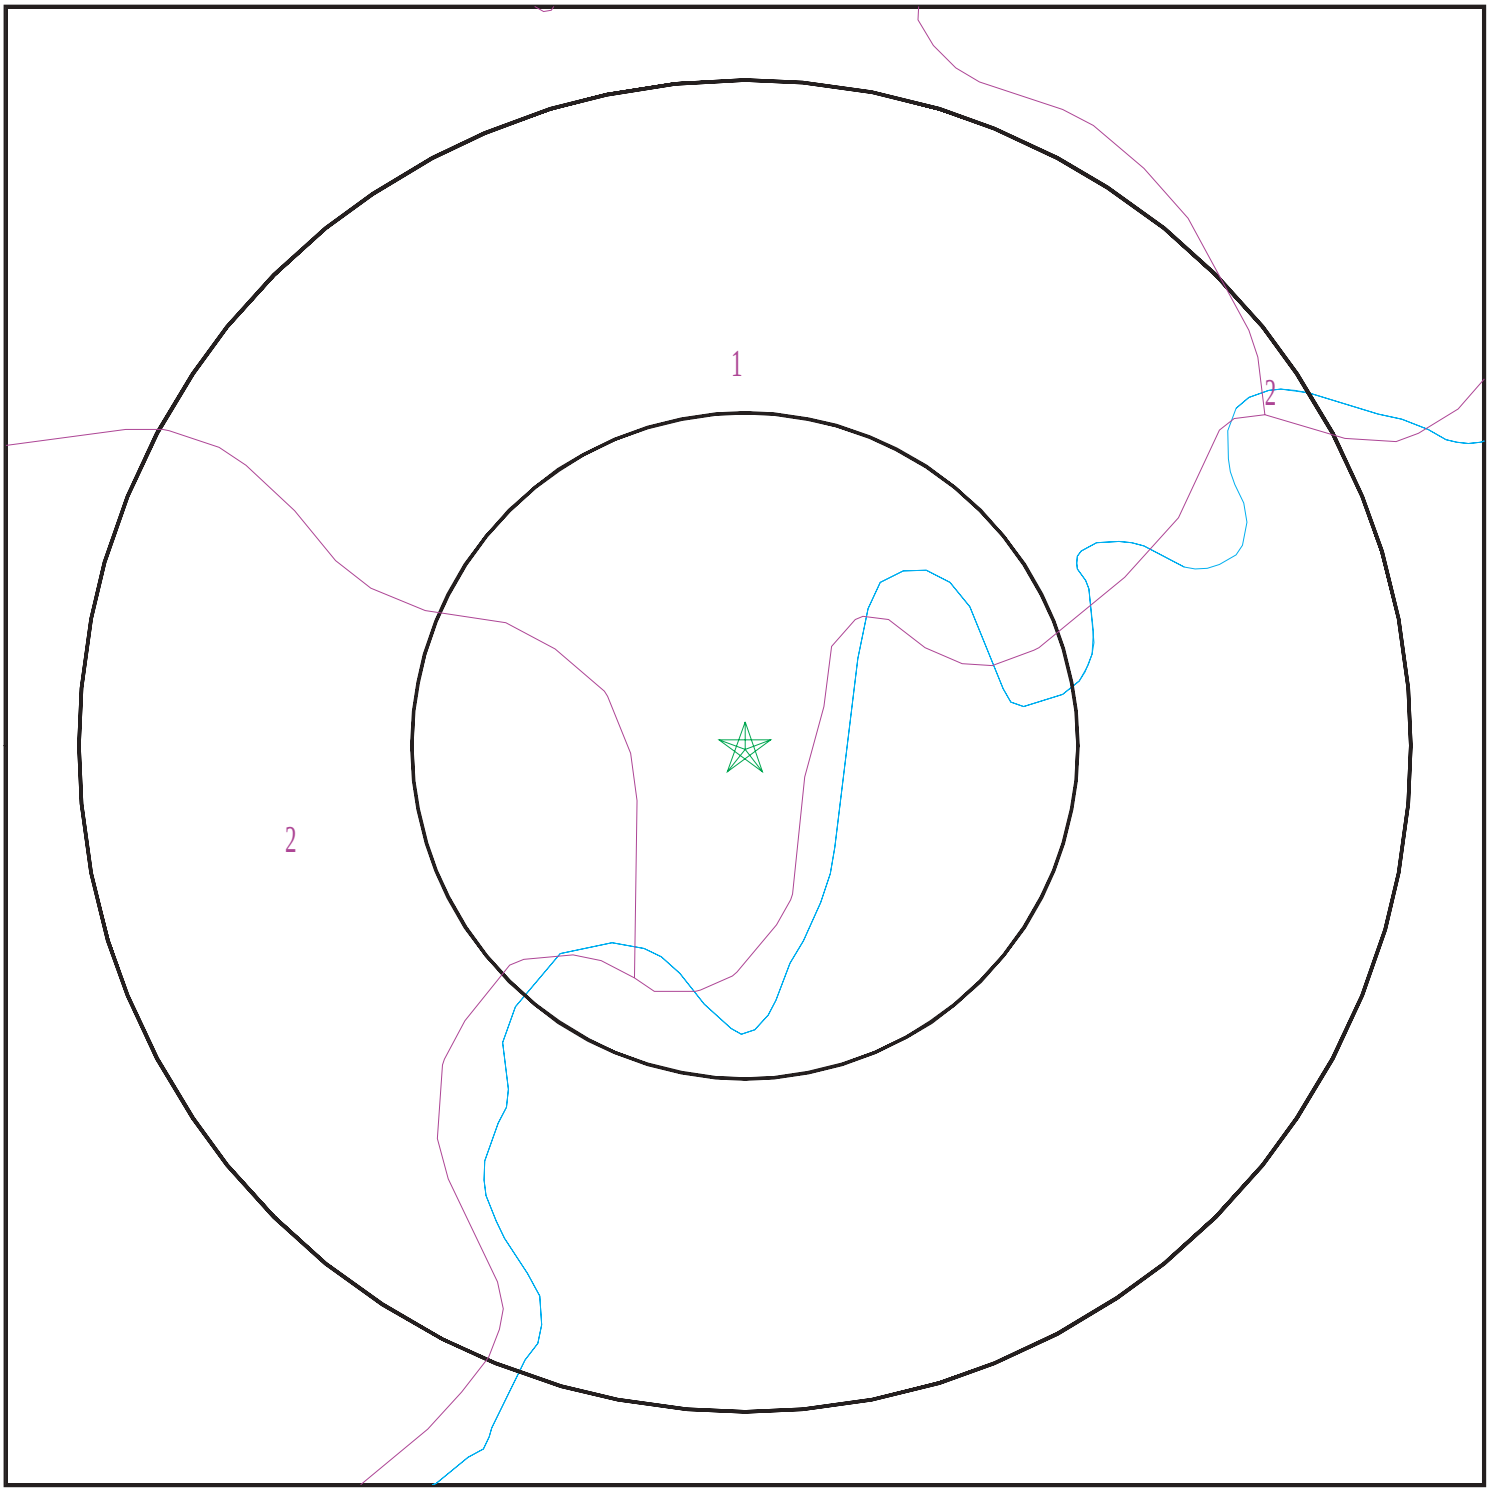

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Botella

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	16 inches	59 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

Hello,

The records request you submitted is complete.

The inquiry for 68 Willow Road is complete and attached in PDF file. Please note groundwater protection and site remediation files can now be found on Geotracker site. For inspection reports, you can use this site to search: Inspection Report Search.

If you have any further questions, please contact Hazardous Material Inspector Dan Rompf at (650) 339-0327 or Maria Gomez-Casillas at (650) 339-6182 for septic and wells issues.

Thank you,

San Mateo County Environmental Health

SUBSURFACE DRILLING PERMIT APPLICATION

Allow three (3) full working days for processing a complete permit application which includes payment (one permit per parcel). Drilling **start date & time** must be scheduled with County staff at (650) 464-0047 or drilling@smcgov.org **at least 2 full working days (i.e. 48 hours) in advance.**
Visit smchealth.org/ehfees for Groundwater Protection Program fees.

PURPOSE OF APPLICATION ☐ Groundwater Monitoring/Vapor Well Installation ☒ Construct Soil Borings (variance request if to be left open >24 hrs)
☐ Groundwater Monitoring/Vapor Well Destruction Extension of Permit # _____
No. of Wells _____ No. of Borings 4 Well/Boring Names B-1, B-2, B-3, B-4

PURPOSE OF DRILLING ☐ Environmental ☒ Geotechnical LEAD AGENCY ☐ County GPP (permit approval is not to be considered work plan approval) ☐ RWQCB/DTSC/USEPA (Provide approval letter) ☐ None (i.e. voluntary)

SITE / DRILLING INFORMATION

Agency Case # _____ Assessor's Parcel # (required) 062-423-020 (one per permit)
Drilling Location Address: 68 Willow Road City: Menlo Park Zip: 94025
To Be Constructed In: ☐ Public Property ☒ Private Property ☐ Refuse
Maximum Proposed Depth (wells/borings) 45 feet (feet) Drilling Method: Hollow Stem Augers
Boring Diameter: 8-inch Casing Diameter: _____ Filter Pack Interval: _____ Screen Interval: _____
Destruction Method: ☐ Pressure Grouting (provide well construction logs and grout calcs)
(6 gallons water max/94 lb cement, up to 5% bentonite) ☐ Overdrilling (guide rods for total depth prior to starting required)

WELL/BORING OWNER (Well/boring owner name or contact person should match signature)

Name: 68 Willow Road LLC Contact Person: Gloria Arteaga
Address: c/o Premia Engineering 801 Hamilton St. City, State, Zip: Redwood City, CA 94063
Telephone: (650) 395 9377 Email: gloria@premiallc.com
It is my responsibility to notify the County of any known changes in the purpose of this well/boring from that which is indicated on this application, to submit indication of annual usage of wells to the County, and to maintain the well in good condition. *(Letter signed by well/boring owner/contact person, containing above language and attesting to knowledge of all permit requirements and conditions, may be substituted for signature.)*
Well/Boring Owner's/Contact Person's Signature: _____ Date: _____

PROPERTY OWNER (Name as appears on assessor's roles should match signature)

Approved (_X_) W/Constructions Fire PC #:mpr20-0252 Scope: Building-TI Review

Reviewed by: William Saxton (650) 688-1462

Proposed is renovation to an existing commercial building the project is to comply with the 2019 CA Building / Fire Codes and local amendments. The following plan review comments are applicable to this submittal:

1. Alterations to the building that impact the Fire Alarm and/or Fire Suppression Systems shall require a deferred submittal with a minimum of two sets of plans and with specifications provided to the MPFD for review and approval prior to initiating work that would impact those systems. Only a qualified C-16 contractor working on a fire suppression system or C-10 licensed contractor working on a fire detection system can complete necessary work on those systems.
2. **Address markers.** All buildings shall have a permanently posted address, which shall be placed at each driveway entrance and be visible from both directions of travel along the road. Permanent addresses on new construction and substantial remodels shall be internally or externally illumined from dusk to dawn. Addresses shall be posted at the beginning of construction and shall be maintained thereafter. The address shall be visible and legible from the road on which the address is located. Address signs along one-way roads shall be visible from both the intended direction of travel and the opposite direction.
3. The building Fire Sprinkler System shall be maintained operational at all times during alteration. When the renovation requires modification of a portion of a fire protection system, the remainder of the system shall be kept in service. CFC Section 3304.5, & NFPA 241 Section 10.8.
4. Sprinkler system to comply with NFPA 13 (2016 edition). Fire alarm system to comply with NFPA 72 (2016 edition). As amended by MPFPD.
5. A 2A10BC (minimum) Fire Extinguisher shall be located at or near exits and shall be placed so that the travel distance to a fire extinguisher shall not to exceed 75 feet. Verify with Fire Inspector at time of rough inspection to assist with placement of extinguisher(s).
6. Exit signs, emergency lighting, address posting, fire lane, marking, fire extinguishers and Knox Box location to be field verified by Fire Inspector.
7. A final inspection by the Fire Prevention Division is required.
8. Approved plans, approval letter and permit must be on site at the time of inspection.

Upon completion of work and prior to closing ceiling, **contact Fire Inspector Bob Blach of**

the Menlo Park Fire Protection District at 650-688-8430 to schedule a final inspection. 48 HOURS NOTICE IS REQUIRED FOR ALL INSPECTIONS.

Nothing in this review is intended to authorize or approve any aspects of the design or installation which do not strictly comply with all applicable codes and standards. Menlo Park Fire Protection District is not responsible for inadvertent errors or omissions pertaining to his review and/or subsequent field inspection(s) i.e., additional comments may be added during subsequent drawing review or field inspection. Please call with any questions.

CENTRAL STATION - FIRE
FIRE ALARM SYSTEM CERTIFICATE
(NFPA 72)

THIS CERTIFIES that the *Alarm Service Company* is included by UL LLC in its Directory as qualified to use the *UL Listing Mark* in connection with the certificated *Alarm System*. This Certificate is the *Alarm Service Company*'s representation that the *Alarm System* including all connecting wiring and equipment has been installed and will be maintained in compliance with requirements established by UL. This Certificate does not apply in any way to the installation of any additional signaling systems, such as; fire, smoke, waterflow, burglary, holdup, medical emergency, or otherwise, that may be connected to or installed along with the Certificated *Alarm System*. This Certificate does not apply in any way to the communication channel between the protected property and any facility that monitors signals from the protected property unless the use of a UL listed or Classified Alarm Transport Company is specified on the Certificate.

LIMITATION OF LIABILITY: UL LLC makes no representations or warranties, express or implied, that the Alarm System will in all cases prevent any loss by fire, smoke, water damage, burglary, hold-up or otherwise, or that the Alarm System will in all cases provide the protection for which it is installed or intended. By the Alarm Service Company providing this Certificate and the Protected Property acceptance of this Certificate, the Alarm Service Company and the Protected Property acknowledge and agree that UL does not assume or undertake to discharge any liability of the Alarm Service Company or any other party. UL is not an insurer and assumes no liability which may result directly or indirectly from inspection of the equipment, failure of the equipment, failure to conduct inspections, incorrect certification, nonconformity with requirements, failure to discover nonconformity with requirements, cancellation of the Certificate or withdrawal of the Alarm Service Company from inclusion in ULs Directory prior to the expiration date appearing on this Certificate.

OPERATIONAL REQUIREMENTS: The *Alarm Service Company* bears the responsibility for the correctness of the installation; maintenance of the system documentation; periodic system inspection and testing; maintaining and providing any necessary repairs. All operations and maintenance shall be conducted in the manner prescribed by the NFPA standard referenced. All required service is to be provided for in an appropriate contract. System documentation is defined to include any "As Built Drawings"; the records of any "Acceptance Testing"; and the records of all periodic system testing and maintenance.

SYSTEM DESCRIPTION: This system is installed and operated in accordance with standard NFPA 72,2010 edition.

Reviewed by: William Saxton (650) 688-1462

The plans were review using NFPA 13 2016 Edition and local amendments. The following plan review comments are applicable to this submittal:
Weld inspection required call Bob Blach 650-688-8430

1. All hangers, seismic bracing and branch line restraints in the area of work shall comply with 2016 NFPA 13 requirements. Current sprinkler system 5-year test certification required at time of inspection.
2. MPFD requires that the sprinkler system provide coverage for all combustible or noncombustible concealed spaces greater than 6" spacing. For drop ceiling or hard lid ceiling with concealed spaces at or greater than 6 inches shall require sprinkler coverage added
3. Hydro test of 50 psi over static pressure required for 20 heads or greater added.
4. All piping shall be hung from structural members if the members are wood they shall be at least 3" inch width and thickness. For Pipe 2 ½ inches or greater they shall be hung from 4-inch width and thickness.
5. Monitoring shall be in accordance with NFPA 72. The monitored account shall be UL Certificated.
6. Provide extra fire sprinklers in spare head box.
7. Excessive/major field changes require As-built shop drawings to be resubmitted for approval. Plan review fees shall apply.
8. Longitudinal & Lateral Bracing to comply to CFC and NFPA 13 2016 edition, Sections 9.3.5.4, 9.3.5.5, & 9.3.5.6, However Section 9.3.5.5.10 allows use of 6" Rods, used for piping hangers, be used for required lateral bracing on the Feed Main only. Please note the 2016 edition for NFPA 13 has amended use of this exception to only permit this application on the feed main, therefore all cross mains shall require installation of lateral sway bracing per NFPA 13 Section 9.3.5.5.1.
9. All additional sprinklers (one for one is allowed) all other sprinklers shall be added from feed or cross mains or the applicant shall provide hydraulic calculation to justify flow and pressure.
10. A set of approved plans, approval letter and job card shall be on the site for inspections.

Upon completion of work and prior to closing ceiling, **contact Fire Inspector Bob Blach of the Menlo Park Fire Protection District at 650-688-8430 to schedule a final inspection.** 48 HOURS NOTICE IS REQUIRED FOR ALL INSPECTIONS.

Nothing in this review is intended to authorize or approve any aspects of the design or installation which do not strictly comply with all applicable codes and standards. Menlo Park Fire Protection District is not responsible

for inadvertent errors or omissions pertaining to his review and/or subsequent field inspection(s) i.e., additional comments may be added based on subsequent reviews or field inspection findings. Call if there are questions.

The project is to comply with the 2019 CA Building / Fire Codes and local amendments, 2016 NFPA 72. The following plan review comments are applicable to this submittal:
PRINT OUT AND HAVE ON SITE AT TIME OF INSPECTION UPDATED STATE FIRE MARSHAL LISTINGS FOR ALL DEVICES.

1. The applicant shall provide the inspector a print out of the 100% pretest at the beginning of inspection.
2. Comply with the 2019 CBC Section 907.2.2 regarding fire alarm notification.
3. A durable map shall be provided at the Remote Annunciator indicating the location of the FACP & essential fire services (roof access sprinkler riser location).
4. Verify door leading to FACU is identified with the proper signage.
5. The instructions to silence and reset the Fire Alarm shall be located at the FACP.
6. The applicant shall provide a copy of the U.L Certification at the FACP.
7. Verify Knox box at the main building entrance with FACP keys serving system.
8. All fire alarm system devices to have U.L. & CA State Fire Marshal listing.
9. Verify FACP batteries with their installation date.
10. Verify a map is located at the FACP locating C.B. for the panel, any remote annunciator or sub-panel location.
11. Verify that the C.B. at the C.B. panel is identified and has locking device.
12. DACT A System Employing a DACT shall complete operation within required 90 seconds, employ one telephone line (Number). In addition, one of the following transmission means shall be employed:
    a. 2nd phone line (number)
    b. A cellular Telephone connection
    c. One-Way Radio System
    d. One way private radio alarm signal
    e. Private microwave radio system
    f. Two-way RF multiples system
    g. Transmission means complying with Section 26.6.3.1

    DACT shall call a second DARC line when the signal transmission sequence to the first line is unsuccessful.
13. **A final inspection is required with all corrections completed.**

14. Approved plans, approval letter and permit must be on site at the time of inspection.

Upon completion of work and prior to occupancy, **contact Deputy Fire Marshal Bob Blach of the Menlo Park Fire Protection District at 650-688-8430 to schedule a final inspection.** 48 HOURS NOTICE IS REQUIRED FOR ALL INSPECTIONS.

Comments:

Complaint received was specific to cigarette butts being disposed of on dry grass in front of the entrance to the building, and to the rear of the building, near the creek, there is a break area with park benches, cigarette butts were disposed of inside tree trunks.

Upon inspection cigarette butts were found in both locations, a large amount. See attached photos.

Non combustible ash trays shall be provided in appropriate locations (CFC Sec. 310.6)

Ash receptacles may be placed within 5 feet of an entrance to a building. (MC Sec. 7.30.026 6d)

Violations require immediate correction.

Should the property remain in violation after the expiration of the compliance deadline including, but not limited to, criminal prosecution, civil injunction, administrative abatement, administrative citations, revocation of permits, recordation of the notice of violation, and/or withholding of future related municipal permits.

Subject: Fire Prevention Contact Us - New Form Submission for Menlo Park California Fire District

7-30-026 Ld

A new submission has been received for Fire Prevention Contact Us

First Name: Nancy
Last Name: Wagner
Email Address: [redacted]
Phone:
Questions: The office building at 68 Willow Place has Cigarette butts on the dry grass by the entrance, and cigarettes littering the ground near the creek and in unsafe tree trunk "ash trays" which do not contain the cigarette butts and can cause a fire or blow into the creek. The employees are smoking and just tossing their butts on the ground. The business needs to provide some approved butt disposal containers and educate the staff about not using the earth as an ashtray. As we have more tech workers in Menlo Park who smoke, it would be prudent to remind businesses to provide approved ash trays and demand that the staff use them.

Project: Commercial TI
Address: 68 Willow Rd
City: Menlo Park

Approved (_X_) W/Constructions Fire PC #:mpr20-0252 Scope: Building-TI Review

Reviewed by: William Saxton (650) 688-1462

Proposed is renovation to an existing commercial building the project is to comply with the 2019 CA Building / Fire Codes and local amendments. The following plan review comments are applicable to this submittal:

1. Alterations to the building that impact the Fire Alarm and/or Fire Suppression Systems shall require a deferred submittal with a minimum of two sets of plans and with specifications provided to the MPFD for review and approval prior to initiating work that would impact those systems. Only a qualified C-16 contractor working on a fire suppression system or C-10 licensed contractor working on a fire detection system can complete necessary work on those systems.
2. **Address markers.** All buildings shall have a permanently posted address, which shall be placed at each driveway entrance and be visible from both directions of travel along the road. Permanent addresses on new construction and substantial remodels shall be internally or externally illumined from dusk to dawn. Addresses shall be posted at the beginning of construction and shall be maintained thereafter. The address shall be visible and legible from the road on which the address is located. Address signs along one-way roads shall be visible from both the intended direction of travel and the opposite direction.
3. The building Fire Sprinkler System shall be maintained operational at all times during alteration. When the renovation requires modification of a portion of a fire protection system, the remainder of the system shall be kept in service. CFC Section 3304.5, & NFPA 241 Section 10.8.
4. Sprinkler system to comply with NFPA 13 (2016 edition). Fire alarm system to comply with NFPA 72 (2016 edition). As amended by MPFPD.
5. A 2A10BC (minimum) Fire Extinguisher shall be located at or near exits and shall be placed so that the travel distance to a fire extinguisher shall not to exceed 75 feet. Verify with Fire Inspector at time of rough inspection to assist with placement of extinguisher(s).
6. Exit signs, emergency lighting, address posting, fire lane, marking, fire extinguishers and Knox Box location to be field verified by Fire Inspector.
7. A final inspection by the Fire Prevention Division is required.
8. Approved plans, approval letter and permit must be on site at the time of inspection.

Upon completion of work and prior to closing ceiling, **contact Fire Inspector Bob Blach of the Menlo Park Fire Protection District at 650-688-8430 to schedule a final inspection.** 48

HOURS NOTICE IS REQUIRED FOR ALL INSPECTIONS.

02-Mar-21	BLD2021-00635	Building Permit	This project is to install 2 dual-head electric vehicle chargers in the existing parking lot.	comm/alt - robinhood, EV Chargers	68 WILLOW RD, MENLO PARK CA 94025	Issued

02-Jul-21	BLD2021-00635-REV1	Revision	There is an existing light pole in the way of making the original design work, so we had to rearrange the EV stalls. We have revised sheets A1.01, A1.02 and E5 only. Revisions are clouded.	68 Willow-EV charger revision	68 WILLOW RD, MENLO PARK CA 94025	Approved

P002992-101525 - Public Records Act Request

Message History (2)

On 10/15/2025 6:26:42 PM, City of Menlo Park Public Records Center wrote:

Dear Jason:

Thank you for your interest in public records of the City of Menlo Park. Your request has been received and is being processed. Your request was submitted to this office on 10/15/2025 and given the reference number P002992-101525 for tracking purposes.

If your request is received after business hours or on a weekend or holiday, the next business day will be considered the date of receipt. The 10-day response period starts with the first calendar day after the date of receipt. If the 10th day falls on a weekend or holiday, the next business day is considered the deadline for responding to the request.

Record Requested: AEI Consultants is currently conducting a Phase-1 Environmental Site Assessment for the property: 68 Willow Rd, Menlo Park, CA 94025 /APN: 062-423-020-68. The current ASTM E1527 Standard Practice for Environmental Site Assessments requires a records search be conducted with local regulatory departments for information regarding the subject property. Of particular interest are the following items:

- Available permits, licenses, and certificates of occupancy (including oldest historical records) OR permit summary (date, type of permit, applicant/tenant)

(NOTE: upon review of a permit summary, we may request review of individual permits)

- Construction date(s) [current building(s), and previous building(s) if applicable]
- List of tenants which have occupied the subject property
- Permits of environmental concern (e.g., petroleum storage tanks, septic systems, oil/water separators)
- Oldest and most recent maps and site layout plan of the subject property (if available)
- Records of any major environmental violations or significant complaints registered against the subject property

Please indicate if older historical records have been archived and require additional fees for retrieval.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the City of Menlo Park's Public Records Center.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Prime Finance to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 68 Willow Road, Menlo Park, San Mateo County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	68 Willow Road, Menlo Park, San Mateo County, California 94025
Property ID (APN or Block/Lot)	062-423-020
Location	Southeast corner of the intersection of Willow Road and Willow Place
Property Type	Office
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	2.5/San Mateo County Assessor
Number of Buildings	1
Building Construction Date(s)	1955
Building Square Footage (SF)/Source	27,500/www.loopnet.com
Number of Floors/Stories	1
Basement or Subgrade Area(s)	None identified
Number of Units	Two
Additional Improvements	Asphalt-paved parking areas, an outdoor patio, and associated landscaping
On-site Occupant(s)	Boot Up Ventures and The Nest Cafe
Current On-site Operations/Use	Offices and restaurant
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	HAZNET

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps
1939-1955	Undeveloped land	Aerial photographs
1955	Current building constructed for office use (68 Willow Road)	Agency records, previous report
1955-Present	Current commercial building/offices	Aerial photographs, city directories, previous report, agency records

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northwest	Willow Road beyond which are residences	None identified
Northeast	Office building (70 Willow Road)	Historical Manifest, HAZNET
East	San Francisquito Creek beyond which are residences	None identified
South	Stanford Medicine (66 Willow Place)	RCRA NonGen/NLR, FINDS, ECHO
West	Willow Place beyond which is an office building (64 Willow Place)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- AEI observed interior areas of the subject property building in order to identify the presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. However,

several water stained ceiling tiles were observed in the common hallway areas. Based upon our observations, AEI recommends replacing stained ceiling tiles and confirming that the source of water intrusion has been addressed.

- Due to the age of the subject property building(s), there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.
- Due to the age of the subject property building(s), there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 68 Willow Road, Menlo Park, San Mateo County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 68 Willow Road, Menlo Park, San Mateo County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- The subject property owner and Key Site Manager were not interviewed during this assessment. Based on information obtained from other sources, including a recent interview with Mr. Steve Pierce of Zane MacGregor (Greenheart Land Company), the owner, this limiting condition is not expected to alter the overall findings of this assessment.
- The Menlo Park Fire Protection District and San Mateo County Environmental Health Services were contacted for information on the subject property in order to identify historical tenants, property use and/or hazardous materials handling. Due to the time frame of this assessment, records at these agencies were not available for review. However, according to responses from these agencies for the previous Phase I ESA summarized in Section 6.3, violations and environmental files for the subject property address were not found. Thus, this limitation is not expected to significantly alter the findings of this assessment.

- AEI performed a reconnaissance of the property without an escort. Access to all areas of the building was not granted. Based on the nature of use (offices) and the findings of the previous report discussed in Section 6.3, this limitation is not expected to significantly alter the findings of this assessment.

1.6 DATA FAILURE AND DATA GAPS

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

AEI did not identify evidence of data failure during the course of this assessment.

1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

This Report may be relied upon by Prime Finance, its successors and assigns, rating agencies and bond investors in determining whether to make a loan evidenced by a note ("Property Note") secured by the Property; may be relied upon by any purchaser in determining whether to purchase the Property Note for this transaction from Prime Finance; may be relied upon by any Rating Agency in rating securities issued by Prime Finance and representing the interest in the Property Note; may be included with and referred to in materials offering the Property Note or an interest in the Property Note for sale.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	68 Willow Road, Menlo Park, San Mateo County, California 94025
Property ID (APN or Block/Lot)	062-423-020
Location	Southeast corner of the intersection of Willow Road and Willow Place
Property Type	Office
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	2.5/San Mateo County Assessor
Number of Buildings	1
Building Construction Date(s)	1955
Building Square Footage (SF)/Source	27,500/www.loopnet.com
Number of Floors/Stories	1
Basement or Subgrade Area(s)	None identified
Number of Units	Two
Additional Improvements	Asphalt-paved parking areas, an outdoor patio, and associated landscaping
On-site Occupant(s)	Boot Up Ventures and The Nest Cafe
Current On-site Operations/Use	Offices and restaurant
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	HAZNET

2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Pacific Gas and Electric
Cooling System	Pacific Gas and Electric
Potable Water	City of Menlo Park
Sewage Disposal/Treatment	City of Menlo Park

Utility source/system information listed in the table above is provided by Marc Hachey, unless otherwise noted above.

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed commercial/residential area of Menlo Park, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northwest	Willow Road beyond which are residences	None identified
Northeast	Office building (70 Willow Road)	Historical Manifest, HAZNET

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
East	San Francisquito Creek beyond which are residences	None identified
South	Stanford Medicine (66 Willow Place)	RCRA NonGen/NLR, FINDS, ECHO
West	Willow Place beyond which is an office building (64 Willow Place)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	The subject property is located within the Coast Ranges geomorphic province of California and is mapped by the California Division of Mines and Geology (San Francisco Sheet - 1968) as underlain by Holocene-aged alluvial soil consisting of variable gravel, sand, silt and clay.
Soil Series: Description/Source	Urban land-Still and Elpaloalto complex - this series consists of well-drained, low permeability, fine-grained alluvial soil on 0 to 2 percent slopes/USDA Soil Survey
Groundwater Flow Direction/Source	Northeast/Fuel Leak Site Case Closure, City of Palo Alto Parking Lot R, 528 High Street
Estimated Depth to Groundwater/ Source	Approximately 40 feet bgs/Fuel Leak Site Case Closure, City of Palo Alto Parking Lot R, 528 High Street
Surface waters on the subject property or adjacent sites	None, although the ephemeral San Francisquito Creek forms the eastern property boundary
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps
1939-1955	Undeveloped land	Aerial photographs
1955	Current building constructed for office use (68 Willow Road)	Agency records, previous report
1955-Present	Current commercial building/offices	Aerial photographs, city directories, previous report, agency records

AEI did not identify potential environmental concerns in association with the current or historical use of the subject property.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1939 1943, 1948,	Undeveloped	NORTH: Agricultural land EAST: San Francisquito Creek beyond which appears to be residences SOUTH: Undeveloped WEST: Undeveloped
1956, 1958, 1963, 1968	Developed with what appears to be a portion of the existing commercial building	NORTH: Undeveloped beyond Willow Road and developed with the existing commercial office building to the northeast EAST: No significant changes SOUTH: Developed with the existing commercial office building WEST: No significant changes
1974, 1982	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: Developed with the existing commercial office building

Year(s)	Subject Property Description	Adjacent Site Descriptions
1991, 1998, 2005	The existing building appears as it does today	NORTH: Developed with a former building across Willow Road EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
2009, 2012, 2016	No significant changes	NORTH: Developed similar to today EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the aerial photograph review.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1957 to 2014. The first listing for the subject property appeared in 1957. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1957-1982	68 Willow Road - American Hardware Mutual Insurance Company
1987	68 Willow Road - American Hardware Mutual Insurance Company and Price Waterhouse
1992-2000	68 Willow Road - Price Waterhouse
2005	68 Willow Road - Price Waterhouse and McGraw-Hill Companies
2010	68 Willow Road - Escobita Investments; Greenheart Investments; and Willow Garage Inc.
2014	68 Willow Road - Escobita Investments; App Machine Inc.; Centrak Inc.; Marble Security Inc.; Mokloud Inc.; and Open Perception Inc.

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review.

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Mateo County Environmental Health Services (SMCEHD)	November 7, 2019	Email	Jean De Tar, Office Assistant II	Response pending, refer to Section 1.5

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
California Environmental Protection Agency (CEPA)	November 7, 2019	Online	Not applicable	No subject property records on file

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Fire Protection District (MPFPD)	November 7, 2019	Email	Not applicable	Response pending, refer to Section 1.5

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Building Division (MPBD)	November 7, 2019	Email	Not provided	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1955	Haas and Hymie	Permit for a new office building for American Hardware Mutual Insurance Co
1957	Not provided	Building addition
1973	American Hardware Mutual Insurance Co.	Reroofing
1978	American Hard Mutual Insurance Co.	Building additions
1979	Not provided	Foundation investigation for building additions
1995	Price Waterhouse	Temporary furniture storage shed
2006	Not provided	Solar panels
2016	Not provided	Installation of kitchen grease trap

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the MPBD.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Planning Division (MPPD)	November 7, 2019	Online	Not applicable	No evidence indicating the existence of AULs on file for the subject property

The subject property is zoned C-1 for commercial offices.

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Mateo County Assessor's Office	November 7, 2019	Online	N/A	Information obtained is discussed below

Records Summary

APN	062-423-020
Acreage	2.5 acres
Construction Date	1955
Building Square Footage	27,500 square feet
Current Owner	Not provided
Additional Information	None

4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	November 7, 2017	Online	N/A	No subject property records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	November 7, 2019	Online	N/A	No subject property records on file
CA DTSC EnviroStor	November 7, 2019	Online	N/A	No subject property records on file
Bay Area Air Quality Management District	November 7, 2019	Email	Ms. Rochelle Reed	No subject property records on file

No other agencies were contacted during the course of this assessment.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Division of Oil, Gas and Geothermal Resources (DOGGR)	November 7, 2010	DOGGR Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	November 7, 2019	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted ERIS to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by ERIS into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by ERIS, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjacent site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Listings Within Search Distance	Subject Property	Adjacent Site(s)	Other Nearby Sites of Concern
NPL	1.0	0			
DELISTED NPL	0.5	0			
SEMS/CERCLIS	0.5	0			
SEMS-ARCHIVE/CERCLIS NFRAP	0.5	0			
RCRA CORRACTS	1.0	0			
RCRA-TSDF	0.5	0			
RCRA LQG, SQG, CESQGs, NLR	SP/ADJ	0			
US ENG CONTROLS	SP	0			
US INST CONTROLS	SP	0			
ERNS	SP	0			
STATE/TRIBAL HWS	1.0	0			
STATE/TRIBAL SWLF	0.5	0			
STATE/TRIBAL REGISTERED STORAGE TANKS	SP/ADJ	0			

Database	Search Distance (Miles)	Listings Within Search Distance	Subject Property	Adjacent Site(s)	Other Nearby Sites of Concern
STATE/TRIBAL LUST	0.5	0			
STATE/TRIBAL EC and IC	SP	0			
STATE/TRIBAL VCP	0.5	0			
STATE/TRIBAL BROWNFIELD	0.5	0			
ORPHAN	N/A	0			
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	0	✔	✔	

Facility Name	Willow Garage Inc.
Address	68 Willow Road
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	HAZNET
Comments	Limited detailed information was included for this listing other than the listing being created in 2010 and listing being inactive by 2011. Based on the lack of a documented release, this listings is not expected to represent a significant environmental concern.

Facility Name	Pacific Bell, Zazzle.com Inc., and Baywest Inc.
Address	66 Willow Place
Distance & Direction	Adjacent to the south
Hydrologic Position	Up to cross-gradient
Databases Listed	FINDS, RCRA-Non Gen, and HAZNET
Comments	Limited pertinent information was provided for these listings, other than hazardous water generation for Zazzle, which included the following wastes produced in 2006: 0.2 tons of hydrocarbon solvents; 0.02 tons of unspecified organic liquid mixture; and 0.3 tons of liquids with halogenated organic compounds >= 1,000 Mg/L. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.
Facility Name	IX Lane Publishing Co
Address	70 Willow Road
Distance & Direction	Adjacent to the northeast
Hydrologic Position	Down-gradient
Database Listed	HAZNET, HIST Manifest
Comments	Limited pertinent information was provided for these listings. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Willow Place Investments, LLC	N/A	None	2005	Not interviewed; refer to Section 1.5
Key Site Manager	N/A	N/A	N/A	2019	Not interviewed; refer to Section 1.5

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources (a recent interview Mr. Steve Pierce, of Zane MacGregor).

6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 USER PROVIDED INFORMATION

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided

Question	Response/ Comment
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (68 Willow Road), prepared by AllWest Environmental (October 16, 2019)

This report describes the subject property generally consistent with current conditions. According to this report, the subject property was occupied by BootUp Ventures and The Nest Cafe. The subject property was undeveloped land until construction of the current building started in 1955,

and has been used as general office usage since that time. AllWest identified no Recognized Environmental Condition (REC), Controlled REC (CREC) or Historical REC (HREC) at the subject property. No further assessment was recommended.

A copy of the report is included in the appendices.

Note: If the above documentation was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the information contained therein is beyond the scope of this assessment.

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, AEI contracted AFX to perform an environmental lien search for the subject property.

According to AFX, environmental liens were not identified during the review of historical ownership documentation. A copy of the AFX report is provided in the appendices.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	November 12, 2019
AEI Site Assessor(s)	Marc Hachey
Property Escort(s)/ Relationship(s) to Property	None
Units/Areas Observed	Cafe, kitchen, hallways, some offices, and all exterior areas
Area(s) not accessed and reason(s)	Mechanical rooms, janitorial closets, pool area, some offices
Other Physical Constraints	None

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjacent Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other		

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered

"Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pad-Mounted	1	Pacific Gas and Electric	Unknown	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

7.1.2 Drains, Sumps, and Clarifiers

The on-site kitchen drainage system is equipped with a grease trap. According to historic building permits, the trap was installed in 2016 is periodically cleaned and emptied by an outside service for off-site disposal. Based on the non-hazardous nature of material entering the grease trap, and the periodic clean out, it is not expected to represent a significant environmental concern.

7.2 Adjacent Property Reconnaissance Findings

During the site reconnaissance, AEI did not observe any of the items listed in the above Reconnaissance Findings Summary table.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

8.2 LEAD-BASED PAINT

LBP is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, LCP is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall,

wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

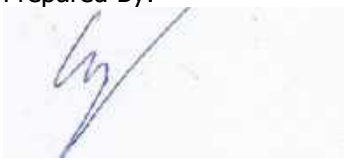

AEI observed interior areas of the subject property building in order to identify the presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. However, several water stained ceiling tiles were observed in the common hallway areas. Based upon our observations, AEI recommends replacing stained ceiling tiles and confirming that the source of water intrusion has been addressed.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

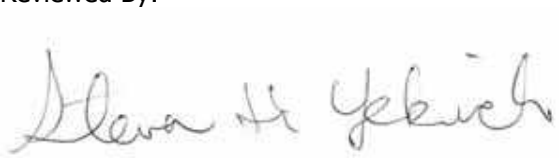

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Date Source: LUST Cleanup Sites from GeoTracker Search; LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download

LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No: 19-066
Local Case No: 06S3W02D05f
Begin Date: 1987-01-22 00:00:00
Lead Agency: SANTA CLARA COUNTY LOP
Local Agency: SANTA CLARA COUNTY LOP
CUF Case: YES
Potential COC: Gasoline
How Discovered: Tank Closure
Stop Method: Close and Replace Tank
Stop Description:
Case Worker: AC
File Location: Stored on Microfiche
Potential Media of Concern: Other Groundwater (uses other than drinking water)
How Discovered Description:
Calwater Watershed Name: Santa Clara - Palo Alto (205.50)
DWR GW Subbasin Name: Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community:
Site History:

Previous fuel leak case closed on 10/31/2000. Responsible party chose to retain 8 wells and continued groundwater monitoring through 2010. All wells were destroyed in 2010. Groundwater concentrations were <50 micrograms per liter (ug/L) Total Petroleum Hydrocarbons as gasoline (TPHg), <0.50 ug/L benzene, <1.0 ug/L toluene, <1.0 ug/L ethylbenzene, <1.0 ug/L xylenes, and <1.0 MTBE at that time. February 2011 Tank Removal: Paradiso Mechanical, Inc. (Paradiso) removed three 12,000-gallon gasoline USTs, three hydraulic lifts, product dispensers, and associated piping. Conestoga-Rovers & Associates (CRA) collected nine soil samples from the bottom of the UST excavation at depths of 15 to 16 fbg. TPHg and BTEX were not detected in any of the soil samples. January 2012 Phase I Environmental Site Assessment (Phase I ESA): Romig Engineers, Inc. conducted a Phase I ESA and advanced nine soil borings (RB-1 through RB-9). A maximum concentration of TPHg at 3,800 milligrams per kilogram (mg/kg) was detected in soil boring RB-5 at 29.5 to 30 fbg. Benzene was only detected in one soil boring, RB-5, at 39.5 to 40 fbg, at a concentration of 0.011 mg/kg. Maximum concentrations of MTBE and tertiary-butyl alcohol (TBA) were detected in soil boring RB-2 at 35 to 35.5 fbg, at 4.6 mg/kg and 2.5 mg/kg, respectively. Grab groundwater samples were collected from first-encountered groundwater in soil borings RB-5 and RB-9. A maximum concentration of TPHg at 1,600 ug/L was detected in boring RB-5. Up to 12 ug/L of benzene, 600 ??ug/L of MTBE, and 190 ug/L of TBA were detected in first encountered groundwater from RB-5. April 2012 The fuel leak case was re-opened based on information provided to DEH in a meeting on March 15, 2012. A plan was discussed to remove the residual contamination by excavation. Erler & Kalinowski, Inc. (EKI) prepared a Soil Management Plan (SMP) to facilitate the development of the site during excavation activities. For off-site disposal pre-characterization, EKI advanced 4 depth-discrete soil borings (B-1 through B-4) and 16 composite samples (C-0-3 through C-33-38 and D-0-3 through D-28-33) and collected first-encountered grab groundwater from soil borings B-2 through B-4. Up to 406 mg/kg TPHg was detected in soil samples. No benzene, MTBE, or TBA was detected in any of the soil borings. Up to 13,400 ug/L TPHg was detected in grab groundwater from soil boring B-4. Up to 0.61 ug/L benzene was detected in soil boring B-2, and up to 1,390 ug/L of MTBE was detected in soil boring B-3. No TBA was detected in any of the grab groundwater samples. November 2013 Excavation Report: EKI submitted an excavation report summarizing excavation activities for the development of a two-story subgrade parking structure with an overlying four-story commercial building. Excavation activities occurred from August 7, 2012 through January 3, 2013. The excavation was to an approximate depth of 34 feet across the entire site and removed approximately 26,000 bank cubic yards of soil. No confirmation soil sampling was conducted. Due to the proximity of groundwater, a barrier will be installed prior to construction of the two-story underground parking garage. The site will be developed with first floor commercial with residential units above.

Site History:

Previous fuel leak case closed on 10/31/2000. Responsible party chose to retain 8 wells and continued groundwater monitoring through 2010. All wells were destroyed in 2010. Groundwater concentrations were <50 micrograms per liter (ug/L) Total Petroleum Hydrocarbons as gasoline (TPHg), <0.50 ug/L benzene, <1.0 ug/L toluene, <1.0 ug/L ethylbenzene, <1.0 ug/L xylenes, and <1.0 MTBE at that time.

February 2011

Tank Removal: Paradiso Mechanical, Inc. (Paradiso) removed three 12,000-gallon gasoline USTs, three hydraulic lifts, product dispensers, and associated piping. Conestoga-Rovers & Associates (CRA) collected nine soil samples from the bottom of the UST excavation at depths of 15 to 16 fbg. TPHg and BTEX were not detected in any of the soil samples.

January 2012

Phase I Environmental Site Assessment (Phase I ESA): Romig Engineers, Inc. conducted a Phase I ESA and advanced nine soil borings (RB-1 through RB-9). A maximum concentration of TPHg at 3,800 milligrams per kilogram (mg/kg) was detected in soil boring RB-5 at 29.5 to 30 fbg. Benzene was only detected in one soil boring, RB-5, at 39.5 to 40 fbg, at a concentration of 0.011 mg/kg. Maximum concentrations of MTBE and tertiary-butyl alcohol (TBA) were detected in soil boring RB-2 at 35 to 35.5 fbg, at 4.6 mg/kg and 2.5 mg/kg, respectively. Grab groundwater samples were collected from first-encountered groundwater in soil borings RB-5 and RB-9. A maximum concentration of TPHg at 1,600 ug/L was detected in boring RB-5. Up to 12 ug/L of benzene, 600 ??ug/L of MTBE, and 190 ug/L of TBA were detected in first encountered groundwater from RB-5.

April 2012

The fuel leak case was re-opened based on information provided to DEH in a meeting on March 15, 2012. A plan was discussed to remove the residual contamination by excavation. Erler & Kalinowski, Inc. (EKI) prepared a Soil Management Plan (SMP) to facilitate the development of the site during excavation activities. For off-site disposal pre-characterization, EKI advanced 4 depth-discrete soil borings (B-1 through B-4) and 16 composite samples (C-0-3 through C-33-38 and D-0-3 through D-28-33) and collected first-encountered grab groundwater from soil borings B-2 through B-4. Up to 406 mg/kg TPHg was detected in soil samples. No benzene, MTBE, or TBA was detected in any of the soil borings. Up to 13,400 ug/L TPHg was detected in grab groundwater from soil boring B-4. Up to 0.61 ug/L benzene was detected in soil boring B-2, and up to 1,390 ug/L of MTBE was detected in soil boring B-3. No TBA was detected in any of the grab groundwater samples.

November 2013

Excavation Report: EKI submitted an excavation report summarizing excavation activities for the development of a two-story subgrade parking structure with an overlying four-story commercial building. Excavation activities occurred from August 7, 2012 through January 3, 2013. The excavation was to an approximate depth of 34 feet across the entire site and removed approximately 26,000 bank cubic yards of soil. No confirmation soil sampling was conducted.

Due to the proximity of groundwater, a barrier will be installed prior to construction of the two-story underground parking garage. The site will be developed with first floor commercial with residential units above.

Cleanup Oversight Agencies:	DTSC - SITE CLEANUP PROGRAM;RWQCB 2 - SAN FRANCISCO BAY - LEAD AGENCY
Site Type:	VOLUNTARY CLEANUP
Office:	CLEANUP BERKELEY
Past Use that Caused Contam:	RAILROAD RIGHT OF WAY
Potential Media Affected:	SOIL
Potential Contamin of Concern:	

ARSENIC, LEAD, POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS), TPH-MOTOR OIL, TPH-DIESEL

Site History:

The Site is the approximately 50-mile long railroad right-of-way between San Francisco and San Jose (north of Tamian passenger station). The Site has been an active rail corridor since 1863. Caltrain is planning to rehabilitate and upgrade railroad track and structures within the railroad corridor. The proposed work will require excavation and stockpiling of soil.

This is an on-call VCA. DTSC reviews documents when submitted.

LEAD, ORGANOCHLORINE PESTICIDES (8081 OCPS)

Site History:

District submitted a Phase I App and Phase I Report for DTSC assessment. The Phase I was prepared for the planned Phase 2 Lab Building Project at the Menlo Atherton High School Campus located at 555 Middlefield Road in Atherton, San Mateo County, California (Site). The Site is separated into two areas (Area 1 and Area 2) with a combined size of approximately 1 acre. Area 1 is occupied by the food service building (constructed after 1998), restrooms (constructed in 1952), tennis court, several small sheds, and paved pedestrian walkways. The northern side of the food service court is adjacent to the southeast corner of the G-Wing project for which DTSC approved the PEA (Cornerstone, March 7, 2016) and issued a no further action determination on March 23, 2016. Area 2 consists of a paved parking lot and landscaped areas. The Site is surrounded by classroom buildings, athletic fields/courts, and/or asphalt pavement parking areas.

The Phase I included soil sampling results to investigate the potential presence of the following:
· Lead due to use of lead-based paints on structures;
· Organochlorine pesticides (OCPs) due to termiticide use on wood framed structures; and
· Polychlorinated biphenyls (PCBs) from electrical transformers, light ballast or window caulking or glazing.

The Phase I indicated that the soil samples collected and analyzed for OCPs, lead, and PCBs did not exceed their respective screening levels with the exception of chlordane at location SB-6. In addition, the Phase I referred to the G-Wing project PEA for the evaluation of the following areas of concern: 1) possible prior agricultural use at the high school campus; 2) potential presence of naturally occurring asbestos in soil; and 3) the presence of undocumented fill.

On October 12, 2016, the District submitted the California Department of Education (CDE) SFPD 4.14 form for DTSC signature in order to request final site approval and/or final plan approval from CDE and receive funding prior to completion of further investigation and response action, if needed, for organochlorine pesticides from termiticide application. On October 14, 2016, DTSC approved the Phase I and determined that a Preliminary Environmental Assessment is required for the Site, and signed the SFPD 4.14 form for the Site.

On March 10, 2017, DTSC received the draft Supplemental Site Investigation Report (SSI Report) for review and comment. The SSI Report documents the additional sampling conducted to delineate the lateral and vertical extent of chlordane around sample location SB-6 and includes a human health risk screening evaluation based on all the soil sampling results collected. The SSI Report and the previously reviewed Phase I were reviewed as PEA Equivalent. The SSI Report indicates that soil samples collected adjacent to the prior SB-6 location and at step-out locations did not detect chlordane or other OCPs above the screening level. Based on the data, the elevated chlordane level may be anomalous and/or limited in its extent.

The OCP results were evaluated in a human health risk assessment for a residential land use scenario using the 95 percent upper confidence limit of the mean. The resulting cumulative cancer risk is 1 x 10-6 which is equal to the DTSC incremental cancer risk. The cumulative non-cancer hazard index is 0.05, which is below the target hazard of 1.0. In addition, the calculated non-cancer hazard quotient for lead is 0.31, which is below the target HQ of 1.0. The SSI Report recommends the issuance of a "no further action" determination. The District made the PEA Equivalent available for public review and comment from April 1, 2017 through May 10, 2017, and the public hearing was held on May 10, 2017. No public comments were received regarding the PEA Equivalent.

On June 9, 2017, DTSC approved the PEA Equivalent with a No Further Action determination.

LEAD, ORGANOCHLORINE PESTICIDES (8081 OCPS)

SITE HISTORY:

District submitted a Phase I App and Phase I Report for DTSC assessment. The Phase I was prepared for the planned Phase 2 Lab Building Project at the Menlo Atherton High School Campus located at 555 Middlefield Road in Atherton, San Mateo County, California (Site). The Site is separated into two areas (Area 1 and Area 2) with a combined size of approximately 1 acre. Area 1 is occupied by the food service building (constructed after 1998), restrooms (constructed in 1952), tennis court, several small sheds, and paved pedestrian walkways. The northern side of the food service court is adjacent to the southeast corner of the G-Wing project for which DTSC approved the PEA (Cornerstone, March 7, 2016) and issued a no further action determination on March 23, 2016. Area 2 consists of a paved parking lot and landscaped areas. The Site is surrounded by classroom buildings, athletic fields/courts, and/or asphalt pavement parking areas.

The Phase I included soil sampling results to investigate the potential presence of the following:
· Lead due to use of lead-based paints on structures;
· Organochlorine pesticides (OCPs) due to termiticide use on wood framed structures; and
· Polychlorinated biphenyls (PCBs) from electrical transformers, light ballast or window caulking or glazing.

The Phase I indicated that the soil samples collected and analyzed for OCPs, lead, and PCBs did not exceed their respective screening levels with the exception of chlordane at location SB-6. In addition, the Phase I referred to the G-Wing project PEA for the evaluation of the following areas of concern: 1) possible prior agricultural use at the high school campus; 2) potential presence of naturally occurring asbestos in soil; and 3) the presence of undocumented fill.

On October 12, 2016, the District submitted the California Department of Education (CDE) SFPD 4.14 form for DTSC signature in order to request final site approval and/or final plan approval from CDE and receive funding prior to completion of further investigation and response action, if needed, for organochlorine pesticides from termiticide application. On October 14, 2016, DTSC approved the Phase I and determined that a Preliminary Environmental Assessment is required for the Site, and signed the SFPD 4.14 form for the Site.

On March 10, 2017, DTSC received the draft Supplemental Site Investigation Report (SSI Report) for review and comment. The SSI Report documents the additional sampling conducted to delineate the lateral and vertical extent of chlordane around sample location SB-6 and includes a human health risk screening evaluation based on all the soil sampling results collected. The SSI Report and the previously reviewed Phase I were reviewed as PEA Equivalent. The SSI Report indicates that soil samples collected adjacent to the prior SB-6 location and at step-out locations did not detect chlordane or other OCPs above the screening level. Based on the data, the elevated chlordane level may be anomalous and/or limited in its extent.

The OCP results were evaluated in a human health risk assessment for a residential land use scenario using the 95 percent upper confidence limit of

the mean. The resulting cumulative cancer risk is 1 x 10-6 which is equal to the DTSC incremental cancer risk. The cumulative non-cancer hazard index is 0.05, which is below the target hazard of 1.0. In addition, the calculated non-cancer hazard quotient for lead is 0.31, which is below the target HQ of 1.0. The SSI Report recommends the issuance of a "no further action" determination. The District made the PEA Equivalent available for public review and comment from April 1, 2017 through May 10, 2017, and the public hearing was held on May 10, 2017. No public comments were received regarding the PEA Equivalent.

On June 9, 2017, DTSC approved the PEA Equivalent with a No Further Action determination.

Site History:

The Sequoia Union High School District (District) submitted an application for an EOA for a reconstruction project at the existing school. On December 2, 2015, DTSC received the Preliminary Environmental Assessment (PEA) Report for review and comment. The PEA was prepared for the planned G-Wing Building Reconstruction Project at the Menlo-Atherton High School (Site). The Site is located in the central area of the Menlo-Atherton High School campus. The Site is bound by the F-Wing classroom building to the west, a sport field and I-Wing classroom building to the north, asphalt concrete play area to the east, and the E-Wing classroom building to the south.

In July 2015, District started the construction activities associated with the G-Wing reconstruction project. The former G-Wing classroom building was demolished for construction of a new two-story building with an approximate 27,000 square-foot footprint. In October 2015, the District learned that regulatory oversight by DTSC was required for the reconstruction project.

The Site is located within 10-miles of a geological unit potentially containing naturally occurring asbestos (NOA). Review of five other nearby schools previously evaluated under DTSC oversight indicates that no further action was required relating to NOA in native soils. The PEA Report indicates that no further evaluation for NOA is needed at the Site. The PEA investigated the potential presence of: arsenic due to possible historical agricultural/garden use in the late 1940s to early 1950s; and, metals, organochlorine pesticides (OCPs), polycyclic aromatic hydrocarbons (PAHs), volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH-gasoline, -diesel, and -motor oil), polychlorinated biphenyls (PCBs), and asbestos due to the undocumented fill from an unknown source area.

On December 2, 2015, DTSC received the draft PEA Report for review. On January 8, 2016, DTSC provided comments on the draft PEA Report. The District made the PEA Report available for public comment period from December 23, 2015 through January 24, 2016; the public hearing was held on January 20, 2016. No public comments were received regarding the PEA Report. The revised PEA Report indicates that metals (with the exception of mercury and silver), OCPs, PAHs (with the exception of benzo(a)pyrene [B(a)P]), VOCs, TPHs and PCBs concentrations are less than their respective environmental screening criteria and/or are similar to published regional background concentrations. One of the five soil samples detected asbestos at 0.01 percent. The remaining four soil samples did not detect asbestos above the reporting limit. B(a)P was detected in two soil samples (at 0.019 milligram per kilogram (mg/kg)) which exceeds the United States Environmental Protection Agency Regional Screening Level (USEPA RSL) of 0.016 mg/kg for soil in a residential land use scenario. The reported concentrations of B(a)P were estimated (J-flagged) by the laboratory because they were less than their analytical method reporting limit. Mercury (one soil sample) and silver (one soil sample) were detected at slightly above their respective background levels.

The PEA results were evaluated in a health risk assessment for a residential land use scenario using all analytes detected excluding metals other than mercury and silver. The resulting cumulative cancer risk is 3 x 10-6, which is above the DTSC incremental cancer risk of 1 x 10-6. The cumulative non-cancer hazard index was determined to be 0.2, which is below the target hazard of 1.0. The PEA concludes that although the incremental lifetime cancer

risk is slightly greater than the target incremental cancer risk of 1 x 10-6 typically used by the DTSC for school sites, based on the results, and considering the conservative nature of the screening level evaluation, the potential exposure to future Site occupants is not considered to pose an unacceptable risk to human health. The PEA Report recommends the issuance of a "no further action" determination.

The cancer risk (excluding most of the metals) is by the PAHs, mainly B(a)P and dibenzo(a,h)anthracene. Following the DTSC PEA Guidance (2015), DTSC converted the maximum concentrations of carcinogenic PAHs to B(a)P equivalents and determined that the total B(a)P equivalent is 0.035 mg/kg. While this value exceeds the USEPA RSL for B(a)P (0.016 mg/kg), this is below both the mean and 95% upper confidence limit (UCL) of the mean carcinogenic PAH concentration from the Northern California data sets . The mean and 95%UCL from the California PAH background study was 0.21 mg/kg and 0.4 mg/kg, respectively. On March 23, 2016, DTSC approved the PEA Report and issued a no further action determination.

Site History:

Site History: Stanford Linear Accelerator Center (SLAC) is a National Research Facility operated by Stanford University for the U.S. Department of Energy (DOE). Operations include maintenance of a motor pool, plating operations, a paint shop, solvent use and storage, equipment fabrication, and a medical department.

SLAC has two PBR and two conditionally authorized units. DTSC, Regional Water Quality Control Board (RWQCB), and the San Mateo County Department of Health Services (SMCDHS) have overseen activities at the site in the past twenty years. These activities have included soil and groundwater investigations, remediation of spills and contaminated soils, and stream channel remediation and issues that affect human health. RWQCB placed an Order No.85-88 on SLAC in July 1985 to perform site characterization and remedial activities at a former solvent underground storage tank site. SLAC has approximately 100 wells on site and provides a semiannual ground water report. SLAC also has extraction wells for remedial treatment unit. SLAC has prepared several reports from 1985 through 2002, as has SLAC: consultants, especially Converse Environmental West (1991-1995) and Evler & Kalinovski, Inc. (1995 to present). These reports are submitted to RWQCB and SMCDHS. SLAC owns the transformers and they are located across the entire facility, but primarily along the linear accelerator, in the research yard, and in the master substation. SLAC has several storm water ditches to drain the site and has a storm water pollution prevention plan, and prepares an annual storm water report. A Phase 1 Environmental Assessment Checklist indicating further investigation was received in August 1997. A DTSC Further Investigation Questionnaire was submitted in July 2002. Site referred to RWQCB.

Groundwater Contamination: Groundwater contamination (Solvents) cleanup is under RWQCB oversight. PCBs contamination in surface water.

Potential Contamin of Concern:

TETRACHLOROETHYLENE (PCE)

Site History:

The Site is defined as the Palo Alto Town & Country Village (Village) located at 855 El Camino Real, in Palo Alto. The Village is a retail shopping center comprising six buildings with a total of 170,232 square feet on approximately 13 acres. The surrounding area consists of a mix of commercial, residential, and educational land uses.

The Village developed into a retail shopping center between 1952 and 1956. Town & Country Cleaners has been present in Building 2 since 1987. A previous dry cleaner (Meaders Cleaners) operated out of Building 6 between 1958 and 1965. Building 6 has been demolished and is currently a parking lot. A 1997 Phase I report noted PCE use by Town & Country Cleaners and small quantities of other hazardous substances, including the following: lubricants, paint thinner, waste photodeveloping solution, stain removers, and cyanide waste. Town & Country Cleaners currently uses a petroleum based solvent (DF2000) and does not currently use PCE. The former dry cleaner (Meaders Cleaners) is believed to have used PCE in its operations. Groundwater, soil vapor, and the indoor air at the Site have been consistently sampled for site characterization. PCE is the main contaminant of concern at the Site. The groundwater is now sampled on an annual basis.

A pilot study evaluating the efficacy of soil vapor extraction was conducted at the Site in October 2017. A Removal Action Workplan proposing soil vapor extraction as the remedy at the Site has been drafted and is going through review.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Aug 20, 2019

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Aug 20, 2019

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Aug 20, 2019

SEMS List 8R Active Site Inventory: SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Aug 20, 2019

SEMS List 8R Archive Sites: SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Aug 20, 2019

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Aug 26, 2019

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Aug 26, 2019

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Aug 26, 2019

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Aug 26, 2019

RCRA Conditionally Exempt and Very Small Quantity Generators List: RCRA CESQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt and Very Small Quantity Generators (VSQG and CESQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG and CESQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Aug 26, 2019

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Aug 26, 2019

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jun 11, 2019

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Jun 11, 2019

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Mar 21, 2019

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Sep 3, 2019

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 17, 2018

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jan 18, 2019

LIEN on Property: SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Aug 20, 2019

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Aug 20, 2019

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Oct 1, 2019

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Oct 1, 2019

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Oct 1, 2019

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Aug 19, 2019

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Oct 1, 2019

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jul 17, 2019

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jul 17, 2019

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Oct 8, 2019

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jul 17, 2019

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Oct 8, 2019

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Sep 11, 2019

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Aug 19, 2019

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Oct 1, 2019

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Sep 23, 2019

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jul 17, 2019

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Oct 1, 2019

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jul 17, 2019

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Sep 26, 2019

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Aug 19, 2019

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Dec 31, 2017

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Dec 31, 2017

Delisted Tribal Leaking Storage Tanks: DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

Delisted Tribal Underground Storage Tanks: DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

County

San Mateo County - CUPA Facilities List: SANMATEO CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Mateo County. This list is made available by San Mateo County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Sep 3, 2019

San Mateo County - LOP List: SANMATEO LOP

A list of Leaking Underground Storage Tank (LUST) facilities in San Mateo County. This list is made available by San Mateo County Environmental Health Services Division.

Government Publication Date: Aug 27, 2019

Santa Clara County - City of San Jose Hazardous Material Facilities: SANJOSE HM

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Sep 15, 2019

Santa Clara County - Gilroy City CUPA Facilities List: GILROY CUPA

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Aug 21, 2019

Santa Clara County - CUPA Facilities List: SANTACLARA CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: Oct 31, 2019

Santa Clara County - Historic Solvent Case Listing: SANTACLARA HSOL

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

Government Publication Date: Aug 22, 2016

Santa Clara County - Local Oversight Program Listing: SANTACLARA LO

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jun 14, 2017

Santa Clara County - Underground Storage Tanks: UST SANTACLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

Government Publication Date: Aug 14, 2019

Santa Clara County - Sunnyvale City CUPA List: SUNNYVALE CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

Government Publication Date: Jul 16, 2019

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites: PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Nov 15, 2018

Facility Registry Service/Facility Index: FINDS/FRS

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

Government Publication Date: Aug 12, 2019

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Dec 31, 2017

Perfluorinated Alkyl Substances (PFAS) Releases: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Dec 31, 2017

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Jan 8, 2019

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Sep 26, 2019

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Jun 30, 2017

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Aug 20, 2019

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Nov 18, 2016

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 29, 2018

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 29, 2018

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Oct 23, 2018

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Nov 1, 2018

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: May 3, 2019

Alternative Fueling Stations: ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Oct 1, 2019

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: May 31, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Mar 20, 2019

State

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Jul 16, 2019

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jul 16, 2019

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jul 17, 2019

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.Y

Government Publication Date: Oct 17, 2019

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Aug 27, 2019

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Jul 16, 2019

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Oct 1, 2019

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jul 15, 2019

Hazardous Waste Manifest Data: HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Aug 19, 2019

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jul 17, 2019

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jul 17, 2019

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2017

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jun 30, 2018

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Our Environmental Lien and AUL report provides a summary of recorded information on a specific property from the time the current owner purchased the property, to present time. The report is intended to assist in the search for environmental liens filed in land title records. The report will verify property ownership and provide information on recorded environmental liens and/or Activity and Use Limitations that have been recorded from the time the current owner purchased the property, forward.

Our professional network of trained researchers follow established industry protocols and use client-supplied property information to complete this Environmental Lien and AUL report. The research is conducted at all appropriate government offices based on the location of the subject property. This would include city, county, state, federal and tribal offices as needed. The report includes:

- Current deed information (i.e. grantor, grantee, recording dates)
- Legal Description
- Environmental Lien information
- Activity and Use Limitation information
- Any Environmental Liens and/or documents referencing AULs that are listed within our summary report

DISCLAIMER

This report was prepared for the intended use of AFX Research, LLC (AFX) and client, exclusively. This report is not a guarantee of title, nor a commitment to insure, nor a policy of title insurance. No warranty, expressed or implied, is made whatsoever in connection with this report. AFX Research, LLC specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular use or purpose. ENVIRONMENTAL SITE ASSESSMENT

68 Willow Road, Menlo Park, CA 94025

I. EXECUTIVE SUMMARY

AllWest has completed an environmental site assessment of the real property referenced above. This assessment was performed in accordance with the scope and limitations of 40 CFR Part 312 Standards and Practices for All Appropriate Inquiries; Final Rule, and ASTM E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Any data gaps, exceptions to or deletions from these practices are described in Section IV of this report. This ESA was conducted for Zane MacGregor, for disposition purposes. AllWest conducted a site visit of the subject property on October 9, 2019.

This executive summary is provided solely for the purpose of overview. Any party who relies on this report must read the full report. The executive summary may omit details, any one of which could be crucial to the proper understanding and risk assessment of the subject matter.

The subject property is developed on an irregularly shaped parcel comprising 2.5 acres, designated as assessor's parcel number (APN) 062-423-020. The address associated with the subject property is 68 Willow Road, Menlo Park, San Mateo County, California. The parcel has approximately 180 feet of street frontage along Willow Road to the northwest, and approximately 260 feet along Willow Place to the southwest. San Francisquito Creek adjoins to the east.

The property is developed with a single-story, wood-frame commercial office building, approximately 28,186 square feet in area. The building is occupied by BootUp Ventures (BootUp) for office purposes and The Nest café with a full commercial kitchen. The remainder of the property includes asphalt-paved surface parking, an outdoor patio and landscaping.

The zoning designation for the subject property is C1 – Commercial Offices. Adjoining properties west of San Francisquito Creek are similarly zoned. Adjoining properties east of the creek and west of Willow Road are zoned residential.

Topography at the subject property is flat with an elevation of approximately 60 feet above mean sea level (msl). Subject property topography slopes gently downward toward the northwest. There is also a steep downward slope along the eastern property boundary where San Francisquito Creek is located. However, the vicinity of the subject property has an overall slope to the northeast toward the San Francisco Bay.

Depth to groundwater is expected to be approximately 25 to 30 feet below ground surface (bgs). The groundwater flow is expected to the northeast, towards the San Francisco Bay. However, shallow groundwater flow may be seasonally influenced in the vicinity of San Francisquito Creek, which adjoins east.

The subject property is located in a mixed commercial and residential area of Menlo Park. Adjoining sites include single-family residences to the northwest, west and east, and commercial office properties to the northeast, south and southwest.

AllWest assessed the site's land use history by reviewing aerial photographs, city directories and other relevant documents. Our review indicated the subject property was undeveloped land until 1955, when it was developed with an L-shaped office building occupied by American Hardware Mutual Insurance Co. The building was expanded in 1957, and again in 1979. Price Waterhouse/Price Cooper Waterhouse occupied the building from at least 1992 until approximately 2005, followed by other office tenants. Office tenant BootUp has been present in the building since the mid-2010s.

Regulated quantities of hazardous materials are not present at the subject property; hazardous waste is not generated. No documentation indicating use of hazardous materials or generation of hazardous waste by previous building tenants was identified.

There is no documentation or visual evidence of previous or existing underground storage tanks (USTs) at the subject property.

As part of this environmental assessment, AllWest observed the building premises for potential asbestos-containing materials (ACM). Documentation of ACM surveys or abatement reports was not provided to AllWest. As the building was constructed before the mid-1980s when the use of ACM became less common, original building materials and those installed prior to the mid-1980s are anticipated to include ACM.

The site contact indicated that there have been roof leaks into office areas during the rainy season, which have not been yet addressed. AllWest observed stained ceiling tiles in several office areas. No mold was observed or reported during the site visit.

We note, the use of LBP was banned by the federal government in 1978. As the site building was constructed in 1955 and expanded in 1957 and 1979, painted surfaces may include LBP. Painted surfaces were observed in good condition and the building has undergone tenant improvements following the 1978 LBP ban.

To identify the site's potential inclusion on environmental databases and evaluate off-site environmental concerns, AllWest reviewed a site-specific radius report provided by Environmental Data Resources, Inc. (EDR) which searched regulatory agency lists/databases for recorded sites within the industry standard search radii. The subject property was not listed in any regulatory databases. The agency database search found no surrounding or adjoining sites that appear likely to have significantly impacted the soil or groundwater underlying the subject property.

II. CONCLUSIONS & RECOMMENDATIONS

AllWest has conducted an environmental assessment for the subject property in general accordance with 40 CFR Part 312 Standards and Practices for All Appropriate Inquiries; Final Rule, and ASTM E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

AllWest has not identified a Recognized Environmental Condition (REC), Controlled REC (CREC) or Historical REC (HREC) at the subject property. No further assessment is recommended.

Although not considered RECs, the following environmental conditions were identified.

Based on the construction date of the subject property building, ACM and LBP are presumed present. An Operations and Maintenance (O&M) plan should be prepared to manage ACM in place. As the building is commercially occupied, LBP is not identified as a significant concern.

We recommend roof repairs to prevent reported leaks and potential mold growth during the rainy season.

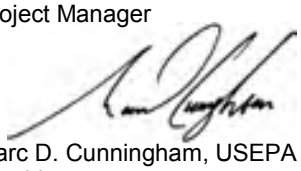

III. ENVIRONMENTAL PROFESSIONAL'S DECLARATION

I/We declare that, to the best of my/our professional knowledge and belief, I/we meet the definition of Environmental Professional as defined in 40 CFR 312.10(b) and ASTM 1527-13. I/We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

I/We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Klaudia Barberi, PG
Project Manager

Marc D. Cunningham, USEPA Professional
President

IV. SCOPE OF WORK AND LIMITATIONS

This Phase I Environmental Site Assessment (ESA) was prepared in accordance with AllWest's September 2019 proposal, with respect to the property located at 68 Willow Road in Menlo Park, California. This assessment was performed in general accordance with ASTM 1527-13 and 40 CFR Part 312, except as set forth in the proposal. The work conducted by AllWest is limited to the services agreed to with Zane MacGregor. No other services beyond

those explicitly stated should be inferred or are implied.

The objective of this ESA was to evaluate the subject site for conditions indicative of a release or threatened release of hazardous substances on, at, in, or to the property. AllWest's professional services were performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable environmental consultants practicing in the location of the subject site at the time of our investigation. This warranty is in lieu of all other warranties, expressed or implied.

Our professional judgment regarding the potential for environmental impacts is based on limited data and our investigation was not intended to be a definitive investigation of contamination at the site. Unless specifically set forth in our proposal, the scope of work did not include groundwater, soil sampling or other subsurface investigations, a strict compliance audit of the site, or a review of the procedures for hazardous material use, waste storage or handling prior to disposal, or for personnel safety and health training and monitoring procedures, analyzes of radon, formaldehyde, lead paint, asbestos and other hazardous materials or indoor air quality, occupational health and safety or wetlands surveys.

The purpose of conducting a Phase I ESA is to assess the subject site for conditions indicative of releases or threatened releases of hazardous substances on, at, in or to the property resulting from its current, historic and surrounding land use activities. As noted in 40 CFR Part 312, Environmental Assessments are purely qualitative with conclusions drawn from a multitude of sources as evaluated by the environmental professional using professional judgment. Since soil and groundwater data are typically not generated during assessment activities, report conclusions such as "the site is clean" or alternatively "the site is contaminated" cannot be provided.

Recognizing the limitations of the Phase I methodology, AllWest assesses the potential for site contamination using a four-tier probability scale designated as:

Very Low - 1-5 % chance of discovering contamination at the site which would result in regulatory mandated remedial investigation and clean-up;

Low - 10% chance of discovering contamination at the site which would result in regulatory mandated remedial investigation and clean-up;

Moderately Low - 20 - 30 % chance of discovering contamination at the site which would result in regulatory mandated remedial investigation and clean-up; or

Moderate - greater than 30% chance of discovering contamination at the site which would result in regulatory mandated remedial investigation and clean-up.

As defined above, these terms are used throughout the report.

Entities relying on the report should realize that uncertainty of site environmental condition can be further reduced via soil, soil vapor and groundwater sampling. While this option certainly costs additional monies and extends the assessment's time frame, it also quantitatively documents site conditions which can facilitate future disposition or re-finance activities.

Regarding any subsurface investigation, sampling undertaken or subsurface reports reviewed, our opinions are limited to only specific areas and analytes evaluated, and AllWest is not accountable for analyte quantities falling below recognized standard detection limits for the laboratory method utilized. AllWest does not warrant or guarantee the subject property suitable for any particular purpose, or certify the subject site as clean or free on contamination. As with any assessment, it is possible that past or existing contamination remains undiscovered.

The professional opinions set forth in this report are based solely upon and limited to AllWest's visual observations of the site and the immediate site vicinity, and upon AllWest's interpretations of the readily available historical information, interviews with personnel knowledgeable about the site, and other readily available information. Consequently, this report is complete and accurate only to the extent that cited reports, agency information, and recollections of persons interviewed are complete and accurate.

The opinions and recommendations in this report apply to site conditions and features as they existed at time of AllWest's investigation. They cannot necessarily apply to conditions and features of which AllWest is unaware and has not had the opportunity to evaluate. Future regulatory modifications, agency interpretations, and/or policy changes may also affect the compliance status of the subject property. AllWest has made no attempt to address future financial impacts to the site (e.g., reduced property values) as a result of potential subsurface contaminant migration.

DATA GAPS: AllWest has made a good faith effort to obtain information required by 40 CFR Part 312 to formulate a professional opinion. Instances where data gaps occur are detailed within our report with an

opinion as to whether the information void is significant impacting our ability to identify conditions indicative of a release or potential release of hazardous substances. In general, if a data gap is identified by AllWest it will be discussed in the report's conclusion section with a recommendation for additional work as necessary.

This Phase I ESA was prepared for the sole and exclusive use of Zane MacGregor, the only intended beneficiary of our work. This report is intended exclusively for the purpose outlined herein and the site location and project indicated and is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this assessment. The scope of services performed in execution of this investigation may not be appropriate to satisfy other users, and any use or reuse of this document or its findings, conclusions or recommendations presented herein is at the sole risk of the user. This report is not a specification for further work and should not be used to bid out any of the recommendations found within.

V. ENVIRONMENTAL ISSUES MATRIX

68 Willow Road, Menlo Park, CA 94025 **AllWest Project 19156.20**

On-Site Issues	*Located*	*Regulatory Compliance*	*Recommended Action*	*Refer To Section*
55-Gallon Drums	No

LUST Sites	Yes	0	22	None	I.13

Note: ASTM-designated search radius for NPL and EnviroStor sites is 1 mile.

VI. ASSESSMENT FINDINGS

A. SITE INFORMATION

1. PURPOSE: This ESA was conducted for Zane MacGregor, c/o Mr. Steve Pierce, for disposition purposes.

   The owner representative indicated no reduction in the property value due to environmental issues.

2. PROPERTY ADDRESSES: The address associated with the subject property is 68 Willow Road, Menlo Park, San Mateo County, California 94025.

   The site location is shown on the included figures and within the attached Environmental Data Resources, Inc. (EDR®) report contained in Appendix A.

3. ASSESSORS PARCEL NUMBER: According to the San Mateo County Assessor's Office, the subject property is identified with APN 062-423-020.

4. ZONING: The zoning designation for the subject property is C1 – Commercial Offices. Adjoining properties west of San Francisquito Creek are similarly zoned. Adjoining properties east of the creek and west of Willow Road are zoned residential.

   The subject property does not appear located within a planned redevelopment area per information available on the City of Menlo Park website.

5. FACILITY/SITE DESCRIPTION: The subject property is developed on an irregularly shaped parcel comprising 2.5 acres (108,900 square feet). The parcel has approximately 180 feet of street frontage along Willow Road to the northwest, and approximately 260 feet along Willow Place to the southwest.

   The property is developed with one single-story, wood-frame commercial office building, approximately 28,186 square feet in area. The building is occupied for office purposes and has a café with a commercial kitchen. The remainder of the property includes asphalt-paved surface parking, an outdoor patio and landscaping.

6. CURRENT USE OF PROPERTY BY TENANT(S): The building on the subject property is leased by BootUp, a company that leases office space to start-up companies.

7. CURRENT USE OF THE SURROUNDING PROPERTIES: Surrounding property land use can be characterized as mixed residential and commercial. Neighboring properties to the subject site include the following.

   North: Office building at 70 Willow Road

   Northwest: Willow Road followed by residential buildings

   West: Intersection of Willow Road and Willow Place followed by residential buildings

   Southwest: Willow Place followed by an office building at 64 Willow Place

   South: Office building at 66 Willow Place

   East: San Francisquito Creek, followed by residential homes in the City of Palo Alto

   No indication of the use of significant quantities of hazardous materials by adjoining facilities was observed.

8. SITE RECONNAISSANCE: AllWest representative Ms. Klaudia Barberi, PG visited the subject property on October 9, 2019, and was accompanied by Ms. Laleh Masnavi of BootUp, the current tenant. Ms. Masnavi answered questions regarding current use of the building. Information provided by Ms. Masnavi is incorporated into the applicable sections of this report.

   Access to the subject property building interior was comprehensive, and included offices, janitorial and electrical closets, restrooms, the café kitchen and the roof. An exterior storage container and two sheds were inaccessible during the site visit.

   Adjoining properties were observed from public right-of-ways.

   Site photographs are included with this report.

9. INTERVIEWS WITH PRESENT PROPERTY OWNER(S): AllWest forwarded a questionnaire to our client's representative, Mr. Steve Pierce of Greenheart Land Co. The questionnaire is used to collect information on past uses and ownerships of the property, and to identify potential conditions that may indicate the presence of releases or threatened releases of hazardous substances at the subject property. The questionnaire was completed by Mr. Pierce

on October 7, 2019; a copy is included in Appendix B.

Mr. Pierce noted no environmental liens or activity and land use limitations (AULs). Mr. Pierce had no specialized knowledge or experience material in identifying soil or groundwater contamination at the subject or adjoining properties. Mr. Pierce indicated that replacement of an arbor by the front entrance required roof repair. He was not aware of prior environmental investigations prepared at the property.

AllWest's assessment of the site's current use did not encounter data gaps that diminish our ability to provide an opinion on a release or potential release of hazardous substances at the subject property.

10. PREVIOUS REPORTS: Our client was not aware of previous environmental reports having been prepared for the subject property. AllWest obtained a copy of the following geotechnical soils report from the Menlo Park Building Department. Pertinent information contained in the report is referenced in applicable sections of this ESA. A copy of the report is included in Appendix C.

Foundation Investigation for Additions to American Hardware Mutual Insurance Company Building, Menlo, Park, California, Peter Kaldveer and Associates, Inc. May 1979

B. HISTORICAL LAND USE: SITE AND VICINITY

1. HISTORICAL USE OF PROPERTY: Historical documents in the form of aerial photographs, Sanborn Fire insurance maps, topographic maps, city directories and building records were reviewed by AllWest to evaluate past land use of the site. AllWest attempted to review historical documents as far back in time as the property contained structures or the property was used for agricultural, residential, commercial, industrial or governmental purposes, and used professional judgment to determine the extent of historical research.

Aerial photographs covering the years 1939, 1943, 1948, 1956, 1958, 1963, 1968, 1974, 1982, 1991, 1998, 2005, 2009, 2012 and 2016 were reviewed. The topographic maps were dated 1897, 1899, 1902, 1943, 1947, 1948, 1953, 1961, 1968, 1973, 1994, 1999 and 2012. Sanborn Maps dated 1924, 1947, 1948, 1949, 1956, 1969 and 1978 also were reviewed. As were city directories dated from 1957 to 2014. The historical sources were obtained from EDR of Shelton, Connecticut and are provided in Appendix A.

Permit records available from the Menlo Park Building Department (MPBD) were reviewed at the MPBD office and on-line. Records from the San Mateo County Environmental Health Department (SMCEHD) were requested; the Menlo Park Fire Protection District (MPFPD) no longer maintains hazardous materials files.

Sanborn Maps

1924-1978: The Sanborn maps provided by EDR did not cover the subject property, only the vicinity to the east.

Aerial Photos

1939: The subject property was undeveloped land, with several trees present.

1943: There were no significant changes from the 1939 aerial photograph.

1948: There were no significant changes from the 1943 aerial photograph.

1956: An L-shaped building was present on the subject property.

1958: The building was expanded to form a rectangular shape. Surface parking was visible to the south and east of the building. The photograph quality was poor.

1963: There were no significant changes from the 1958 aerial photograph.

1968: There were no significant changes from the 1963 aerial photograph.

1974: There were no significant changes from the 1968 aerial photograph; although the roof surface appeared modified.

1982: The building was expanded toward Willow Road in the present-day configuration.

1991: There were no significant changes from the 1982 photograph.

1998: There were no significant changes from the 1991 photograph, although the surface of the roof appeared modified.

2005: There were no significant changes from the 1998 photograph.

2009: There were no significant changes from the 2005 photograph, except for modifications to the roof.

2012: There were no significant changes from the 2009 photograph.

2016: There were no significant changes from the 2012 photograph.

Topographic Maps

1897 – 1953: There was no development depicted on the subject property.

1961 – 1973: A building was depicted on the subject property.

1994 & 1999: The subject property was shaded grey, indicating location within an area of urban development. No specific structures were depicted.

2012: No specific development or features of environmental concern were depicted.

City Directories

City directories, dated 1957 through 2014, were available for the subject property address. City directory listings included the following.

1957 – 1987: American Hardware Mutual Insurance Co.

1992 – 1995: Price Waterhouse LLP

2000: Price Waterhouse Coopers LLP

2005: McGraw-Hill Companies Inc., Price Waterhouse Coopers LLP

2010: Escobita Investments LLC, Greenheart Investments LLC, Willow Garage Inc. (café)

2014: Appmachine Inc., Centrak Inc., Escobita Investments LLC, Marble Security Inc., Mokloud Inc., Open Perception Inc.

Building Department Permits

Building permit and related records for the subject property archived by the MPBD were reviewed on-line through the City of Menlo Park website and at the MPBD office.

The permits and other documents of note included the following.

April 1955 – Permit for a new office for American Hardware Mutual Insurance Co., owner Haas & Haymie

1957 – Building plans for building addition on the south side

1973 – Permit issued to American Hardware Mutual Insurance Co. for a re-roof

1978 – Documents regarding building additions on the west and east sides of the building occupied by American Hardware Mutual Insurance Co.

1979 – Foundation Investigation for building additions, Peter Kaldveer and Associates, Inc. (soils report)

1995 – Installation of a temporary storage shed for office furniture in the southeast corner of the property for Price Waterhouse

2006 – Installation of solar system

2016 – Installation of drainage grease trap interceptor

A list of permits issued between 2006 and 2017 is included in Appendix C. Selected documents printed at the MPBD office also are included in Appendix C, along with the 1979 Foundation Investigation

CUPA Records

Hazardous materials-related records for the subject property address were requested from the SMCEHD. The SMCEHD is the Certified Unified Program Agency (CUPA) for Menlo Park. The SMCEHD representative reported having no environmental files for the subject property address.

MPFPD Records

The MPFPD reported no outstanding violations for the subject property address.

Summary of Historical Land Use

AllWest's land use history review indicated the subject property was undeveloped land until 1955 when it was developed with an L-shaped office building occupied by American Hardware Mutual Insurance Co. The building was expanded in 1957, and again in 1979. Price Waterhouse/ Price Cooper Waterhouse occupied the building from at least 1992 until approximately 2005,

followed by other office tenants. Office tenant BootUp has been present in the building since the mid-2010s.

No documentation of significant hazardous materials use by previous or current occupants of the subject property was identified.

AllWest's assessment of the site's historical land use activities did not encounter data gaps that diminish our ability to provide an opinion on a release or potential release of hazardous substances at the subject property.

2. HISTORICAL USE OF THE SURROUNDING PROPERTIES: AllWest reviewed the previously referenced aerial photographs, Sanborn Fire insurance maps, topographic maps, city directories, and building records to assess the historical land use in the immediate site area.

Sanborn Maps

1924-1978: The Sanborn maps provided by EDR covered only the vicinity area east of the subject property, across San Francisquito Creek. Dwellings were depicted on all available Sanborn maps in this area.

Aerial Photos

1939: San Francisquito Creek was visible along the eastern property boundary. Residences were present east of the creek. The areas to the south, west and north were farm land and undeveloped land.

1943: There were no significant changes from the 1939 aerial photograph.

1948: There were no significant changes from the 1943 aerial photograph.

1956: Willow Road was present to the northwest. The property adjoining south was developed with a commercial building. A commercial development was also present to the northeast. A residential subdivision was present further west. The land north of the subject property appeared undeveloped.

1958: Willow Place was present to the west. The residential subdivision to the west was expanded toward the subject property and adjoined it from the northwest. There were no other significant changes to development from the 1956 photograph.

1963: There were no significant changes from the 1958 aerial photograph.

1968: There were no significant changes from the 1958 aerial photograph, although additional commercial development was visible further to the north.

1974: The property adjoining west was developed with a commercial building. There were no other significant changes from the 1968 photograph.

1982: There were no significant changes from the 1974 photograph.

1991: The lot directly north across Willow Road was developed with a commercial building. The surrounding area appeared fully developed.

1998: There were no significant changes from the 1991 photograph.

2005: There were no significant changes from the 1998 photograph.

2009: The commercial building directly north of the subject property was replaced by residential buildings.

2012: There were no significant changes from the 2009 photograph.

2016: There were no significant changes from the 2012 photograph.

Topographic Maps

1897 - 2012: San Francisquito Creek was depicted along the eastern property boundary on all available topographic maps. No other significant surface features indicative of environmental concern were depicted on the most recent topographic map or on historical topographic maps for the property's immediately surrounding area.

The surrounding area was sparsely developed in the early 1900s. It became progressively more urbanized starting in at least the 1940s. Willow Road was first depicted on the 1953 topographic map.

City Directories

Previously referenced city directories were reviewed for vicinity facility listings along Willow Road to the northwest and Willow Place to the west. The properties have been occupied for commercial and office purposes.

Summary of Historical Vicinity Land Use

AllWest's land use history review for the adjoining and surrounding properties indicated the area to the east was residentially developed in the 1930s or earlier. Surrounding areas in other directions from the property were farm land or undeveloped land. By the 1950s, commercial developments appeared to the northeast of the subject property along Willow Road. More residential developments also were present in the greater surrounding area, namely to the west. Commercial development expanded to the north and east through the early 1990s. A residential development replaced a commercial building to the north in the late 2000s.

Facilities appearing likely to utilize significant quantities of hazardous materials, or other environmentally significant businesses, were not identified in close proximity to the subject property.

AllWest's assessment of the site's current and historical surrounding land use did not encounter data gaps that diminish our ability to provide an opinion on a release or potential release of hazardous substances at the subject property.

C. PHYSICAL CHARACTERISTICS

1. TOPOGRAPHY: Topography at the subject property is flat with an elevation of approximately 60 feet above msl. Subject property topography slopes gently downward toward the northwest. There is also a steep downward slope along the eastern property boundary where San Francisquito Creek is located. However, the vicinity of the subject property has an overall slope to the northeast toward the San Francisco Bay.

2. VEGETATION: There are professionally landscaped areas across the subject property, with mature growth and trees. Evidence of stressed vegetation was not observed.

3. SOILS: Soils at the subject property are classified by the U.S. Department of Agriculture Soil Conservation Service as Botella clay loam. The Botella series consists of silts and clays with moderate infiltration rates.

   The Foundation Investigation prepared in 1979 for the subject property documented the presence of silty clays to the maximum explored depth of 15 feet bgs.

   The subject property is located in an alluvial valley filled with Quaternary deposits. The alluvial deposits have a maximum thickness of 200 feet and consist of silt, clay and sand. They are underlain by weakly consolidated soils of the Santa Clara Formation, which is in turn underlain by more massive sandstone at a depth greater than 1,000 feet (Peter Kaldveer and Associates, 1979).

   Exposed soil was present across the subject property in the landscaped areas. No staining or discoloration of the soil was observed.

4. GEOLOGY: Based on a review of the USGS Note 36 California Geomorphic Provinces map, the property is located in the Coast Ranges geomorphic province of California. The coastline is uplifted, terraced and wave-cut. The Coast Ranges are composed of thick Mesozoic and Cenozoic sedimentary strata. The northern and southern ranges are separated by a depression containing the San Francisco Bay.

   The northern Coast Ranges are dominated by the irregular, knobby landslide-topography of the Franciscan Complex. The eastern border is characterized by strike-ridges and valleys in Upper Mesozoic strata. In several areas, Franciscan rocks are overlain by volcanic cones and flows of the Quien Sabe, Sonoma and Clear Lake volcanic fields. The Coast Ranges is subparallel to the active San Andreas Fault. The San Andreas is more than 600 miles long, extending from Point Arena to the Gulf of California. West of the San Andreas is the Salinian Block, a granitic core extending from the southern extremity of the Coast Ranges to north of the Farallon Islands. Geologically, the area of the subject property is underlain by Mesozoic era Eugeosynclinal Deposits.

5. HYDROLOGY: According to California's Groundwater Bulletin 118, the subject property is located in the San Francisco Bay Hydrologic Region and lies in the Santa Clara Valley Groundwater Basin, San Mateo Subbasin (Basin No. 2-9.03). The San Mateo Subbasin groundwater basin is located in a structural trough at the southwestern end of the San Francisco Bay, delineated by the Santa Cruz Mountains to the west, the San Francisco Bay to the east, the Westside Subbasin to the north and San Franciscquito Creek to the south. The basin is a series of alluvial fan deposits resulting from deposition by tributaries to the San Francisco Bay.

   Based on AllWest's prior experience in the subject property area, depth to groundwater is

expected to be approximately 25 to 30 feet bgs. We note, groundwater was not encountered in soil borings completed to the maximum depth of 15 feet bgs for the 1979 Foundation Investigation. The groundwater flow is expected to the northeast, towards the San Francisco Bay. However, shallow groundwater flow may be seasonally influenced in the vicinity of San Francisquito Creek, which adjoins east. The bed of the creek was dry during the site visit.

There are no groundwater monitoring wells, water supply wells or aboveground water tanks at the subject property. The property does not fall under requirements of the National Pollutant Discharge Elimination System (NPDES).

D. NATURAL HAZARDS

1. SEISMICITY: The State of California is considered seismically active, and earthquakes are an unavoidable geologic hazard in San Mateo County. Based on available geologic literature, no active fault traces traverse the property. The property is not located within an Alquist-Priolo Special Study Zone for fault rupture hazard. The subject property is located within a liquefaction zone.

   The closest active fault to the site is the San Andreas Fault, located approximately 5.5 miles southwest. The Hayward Fault is located approximately 12.5 miles northeast of the subject property.

2. RADON: Out-gassing of radon has not been identified as a problem in San Mateo County. The U.S. EPA has prepared a map to assist national, state and local organizations to target their resources, and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 picoCuries per Liter (pCi/L) and Zone 3 being those areas with the average predicted indoor radon concentration in residential dwellings less than 2 pCi/L.

   It is important to note that the California Department of Health Services (DHS), in its California Statewide Radon Survey of 1990, has found homes with elevated levels of radon in all three zones, and both EPA and DHS recommend property-specific testing in order to determine radon levels at a specific location. However, the DHS Radon Survey does give a valuable indication of the propensity of radon gas accumulation in structures.

   Review of the DHS Radon Survey places the property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L. One hundred and one state radon tests were conducted in the site zip code of 94025; radon reportedly exceeded 4 pCi/L in 21 (21%) of the tests. Federal radon testing at 32 sites in San Mateo County revealed an average 1st floor living area radon concentration of 0.594 pCi/L, with 100% of the results below 4 pCi/L. Average basement radon concentrations were 3.133, with 33% of the tests exceeding 4 pCi/L.

   Although, based on the radon test data, there is a low likelihood of radon accumulation, based on the commercial property use and lack of a basement, radon is not a significant environmental concern.

3. SENSITIVE ECOLOGICAL AREAS: Sensitive ecological areas include wetlands, rivers or creeks, marsh areas and land dedicated for open space. The U.S. Fish and Wildlife Service National Wetlands Inventory database indicated the presence of San Francisquito Creek along the eastern property boundary, as the only sensitive ecological area within one mile of the subject property.

4. FLOODING: FEMA Flood Insurance Map Community Panel No. 06081C0308E, dated October 16, 2012, depicts the subject property within unshaded flood zone X, defined as an area of minimal flood hazard.

   San Francisquito Creek, along the eastern property boundary, is located within Zone A, a special flood hazard area without base flood elevation.

5. MASS WASTING: No physical evidence of mass wasting, such as landslides or ground subsidence, was observed at the property.

6. OIL AND GAS WELLS: According to the California Department of Conservation, Department of Oil, Gas and Geothermal Resources (DOGGR) map, no oil or gas wells are located on or adjoining the subject property.

E. SITE CHARACTERISTICS

1. PARKING: Asphalt-paved surface parking lots are located around the subject property building.

2. ROADWAYS: Willow Road borders the subject property to the northwest. Willow Place borders the subject property to the west.

3. FENCES: Partial reed fencing is present along the eastern property line.

4. OUTSIDE STORAGE: A steel storage shed and two plastic sheds were observed near the southeast corner of the property. The container and sheds are reportedly used for office furniture and building maintenance equipment storage. Access to the shed interiors was unavailable. A more detailed discussion is provided in Section G.2.

5. BASEMENTS: No basements are present on the subject property.

6. EASEMENTS: A PG&E Pacific Telephone pole line easement is present across the eastern portion of the property (Appendix C). Except for utilities, no other known easements are located on the subject property.

7. WELLS: According to the SMCEHD, no groundwater monitoring wells are documented on the subject property. No evidence of production, dry, domestic water, irrigation, injection or monitoring wells was observed.

8. SUMPS: Sumps were not observed or reported on the subject property.

9. STORM WATER DRAINS: Storm water flows toward on-site drains and adjoining streets. One storm water drain was observed in the patio area east of the building.

10. PONDS: A closed-loop water fountain is present east of the building. No ponds or other bodies of water were observed on the subject property.

11. SEWAGE SYSTEM: Sanitary sewer service for the property is provided by West Bay Sanitary District.

12. POTABLE WATER SYSTEM: There are underground water lines at the property. Potable water is supplied by the California Water Service Company - Bear Gulch District. According to the 2018 Water Quality Report, potable water supplied to the subject property meets California and federal drinking water standards.

13. WASTE WATER SYSTEMS: Silicon Valley Clean Water (SVCW) provides sewage treatment. No wastewater treatment systems are located on the subject property.

    An above-grade grease trap was observed under the sink in the kitchen of The Nest café. We note the building records indicated a grease trap interceptor was installed in 2016. The presence of this equipment is not of significant environmental concern.

14. POWER DISTRIBUTION SYSTEMS: Electricity and natural gas are provided to the property by Pacific Gas & Electric Company (PG&E). One PG&E pad-mounted transformer was observed east of the building. No information regarding polychlorinated biphenyl (PCB) content was provided on the transformer. As its owner, PG&E is responsible for any transformer maintenance and/or failure. No indication of releases from the transformer was observed.

    PG&E-owned overhead power lines are present along the eastern portion of the property.

F. HAZARDOUS MATERIALS IN FACILITY AND OPERATIONAL SYSTEMS

1. BUILDING STRUCTURE: The building is a conventional wood frame structure with wood sheathed roof over wood beams and purlins supported by steel tube posts with conventional spread footing foundations.

2. BUILDING MATERIALS: The exterior of the building is painted wood with brick accents. The gable roof appears to be capped with a conventional built-up roof or single-ply membrane; the roofing is coated by what appears to be an elastomeric coating.

   Observed interior finishes included painted gypsum board walls and ceilings; drop-in acoustic ceiling tile; commercial grade carpet and tile, vinyl and ceramic floor tile, polished and unfinished concrete floors, and engineered wood floors.

ASBESTOS

As part of this environmental assessment, AllWest observed the building premises for potential ACM such as floor coverings, ceiling and wall materials, bulk insulation and fireproofing. Documentation of ACM surveys or abatement reports was not provided to AllWest.

As the building was constructed before the mid-1980s when the use of ACM became less common, original building materials and those installed prior to the mid-1980s are anticipated to include ACM. It is recommended an asbestos-containing building materials O&M program be implemented. An O&M program details procedures designed to ensure that the asbestos containing building materials, whenever possible,

remain undisturbed to minimize the likelihood of exposing building tenants and workers to airborne asbestos fibers. Observed building materials appeared in good condition.

MOLD

As part of this environmental assessment, AllWest visually inspected the building premises for the presence of significant mold growth and evidence of water intrusion including walls, ceilings and utility areas. BootUp representative, Ms. Masnavi, indicated that there have been roof leaks into office areas during the rainy season, which have not been yet addressed. AllWest observed stained ceiling tiles in several office areas. No mold was observed or reported during the site visit. We recommend roof repairs to prevent leaks and potential mold growth during the rainy season.

LEAD BASED PAINT

As part of this environmental assessment, AllWest evaluated the building premises for potential LBP coatings such as interior walls, handrails and floors. We note, the use of LBP was banned by the federal government in 1978. As the on-site building was constructed in 1955 and expanded in 1957 and 1978, painted surfaces may include LBP. Painted surfaces were observed in good condition and the building has undergone tenant improvements following the 1978 LBP ban. As the building is commercially occupied, LBP is not identified as a significant concern.

3. MECHANICAL AND HVAC SYSTEMS: There are two roof-mounted packaged air conditioning units for cold air, and one hot water gas-fired boiler and one roof-mounted gas-fired make-up air unit for heating purposes.

4. BUILDING EQUIPMENT: No building equipment, such as elevators or lifts, was observed or reported during the site visit.

5. INDUSTRIAL EQUIPMENT: Industrial equipment was not observed at the subject property. Typical commercial kitchen equipment was observed in the kitchen of The Nest café.

G. HAZARDOUS AND NON-HAZARDOUS MATERIALS AND WASTES

1. MANUFACTURE/USE: No manufacturing historically or currently is documented at the subject property. Subject property building has been occupied for commercial office purposes since construction.

   Prior to construction of the current building, the subject property was undeveloped.

2. STORAGE: Regulated quantities of hazardous materials are not stored at the subject property; nor have they been documented historically in regulatory agency files or through database listings.

   Several containers of typical janitorial cleaners, paints, maintenance chemicals and fountain water treatment chemicals, up to 5-gallons in volume, were observed in janitorial and storage closets, electrical room, and kitchen. No environmental issues associated with the stored materials were observed.

   A steel storage container was observed in the southeast corner of the subject property. The container was locked and inaccessible during the site visit. According to building records, the container, installed in 1995, was initially intended for furniture storage. AllWest was informed during the site visit that office furniture and other office-related items are stored in the container.

   Two plastic storage sheds also were observed near the southeast corner of the property. Both sheds were locked during the site visit. Some of the items AllWest observed in one of the sheds included a ladder, a watering hose, wine boxes and empty 5-gallon plastic pails. The contents of the other shed could not be viewed. AllWest was informed that similar maintenance materials and office-related items also are stored in the other shed.

3. GENERATION & DISPOSAL: Hazardous waste was not generated by occupants of the subject property during the site visit and was not documented as generated by previous property occupants.

4. UNDERGROUND STORAGE TANKS: There is no visual or documentary evidence of existing or previous USTs at the subject property.

5. ABOVEGROUND STORAGE TANKS: Aboveground storage tanks (ASTs) are not present at the subject property. No information indicating the historical presence of ASTs at the site was encountered in information sources available for this study.

6. SOLID WASTE: A steel trash enclosure for municipal waste dumpsters was observed at the

southeastern corner of the subject property. Minor stains were noted inside the enclosure.

7. MEDICAL WASTE: Current or historical generation of medical waste was not documented on the subject property.

H. POLLUTION SOURCES, CONTROLS AND TREATMENT

1. AIR: The subject property was not included in the Emissions Inventory (EMI) database in the EDR radius report (Section I). The Bay Area Air Quality Management District (BAAQMD) reported no permit files for the property address.

2. SOIL & GROUNDWATER: The subject property is not a recorded source of soil and groundwater contamination. It is not included on the State Water Resources Control Board (SWRCB) Geotracker or California Department of Toxic Substances Control (DTSC) EnviroStor databases. There is no visual evidence the soil and groundwater of the property have been contaminated by on-site activities.

3. VAPOR INTRUSION: As part of our assessment AllWest evaluated the potential for vapor intrusion into property structures following the general methodology outlined in ASTM E-2600-15, utilizing professional judgment.

   The Tier 1 screening assessment was employed to determine if a potential vapor intrusion condition (VIC) exists at the site. The subject property, adjoining properties, and hydraulically up-gradient properties were assessed to determine known or suspect contaminated sites within approximate minimum search distances.

   A Tier 1 screening assessment consists of a search distance test to identify if there are any known or suspected contaminated sites within the primary and secondary areas of concern; a chemicals of concern test to determine if chemicals of concern exist at the known or suspected contaminates sites; and a plume test to determine whether or not chemicals of concern in the contaminated plume may be within the critical distance.

   The critical distance is defined as the linear distance in any direction from the nearest edge of the plume to the site. If the distance from the site to the nearest edge of a petroleum hydrocarbon plume is less than 30 feet or less than 100 feet for non-petroleum chemicals of concern, then it is presumed that a potential vapor intrusion condition (pVIC) exists and additional screening may be necessary.

   The potential for a VIC from current and historical land use activities is considered very low as no evidence of hazardous materials use or releases are documented. The potential for a VIC from surrounding land use is considered low as no evidence of vicinity groundwater impact appearing to extend within 100 feet of the subject property was identified through out research of regulatory agency database listings and historical sources.

   METHANE: No known methane issues were reported for the property. The subject property is not located within 1,000 feet of an active landfill, an active oil well or an abandoned/inactive oil well.

I. REGULATORY DATABASE SEARCH

To identify the site's potential listing in environmental databases and evaluate off-site environmental concerns, AllWest reviewed a site-specific radius report provided by EDR, which searched regulatory agency lists/ databases for recorded sites within the industry standard search radii. The purpose of the records search was to assess the potential presence of hazardous substance contamination at the subject site as a result of activities conducted on properties within the ASTM-designated search distances. A list of the state and federal regulatory databases searched, summary of findings and detailed records are presented in Appendix A.

Regulatory-listed sites and high-risk historical facilities identified by EDR as being within their approximate minimum search distances from the subject property on the ASTM-required databases are listed in Table 1 as well as being summarized in Appendix A and their respective locations identified by number in Appendix A's figures. The number of sites shown in Table 1 may not exactly reflect what is provided in the EDR report due to multiple (duplicate) listings, outdated (historical databases), and differing minimum search radii as specified in ASTM E 1527-13. Additionally, some map locations shown on the EDR figures refer to more than one site, some sites are listed multiple times in the EDR report and some map locations shown on the EDR figures were determined by AllWest to be incorrect.

The EDR report listed two orphan sites (sites which addresses are as inadequate or incomplete as to render locating the site on a map ineffective) that could be within the approximate minimum search distances on the ASTM-required databases. Based on AllWest's review of the provided information, the orphan sites do not

appear to be on or adjoining the subject property, or otherwise to be of significant concern.

When reviewing the EDR report, AllWest was particularly interested in the regulatory status of sites within the search radius that were adjoining or hydraulically up-gradient to the subject site. In general, only up-gradient hazardous materials release sites represent a potential environmental impact to the subject property. Chemical release sites located hydraulically down-gradient or cross-gradient (perpendicular) are considered unlikely to impact the subject property.

Groundwater flow direction in the vicinity of the subject property is expected to the northeast. The anticipated flow direction makes properties generally southwest potentially up-gradient.

The subject property address was not listed in the regulatory databases searched by EDR. A summary of the off-site database listings is included in Table 1.

Table 1. Regulatory Database Search Summary

Section	*Regulatory List*	*Search Radius*	*Number of Listed Sites within Search Radius*	*Number of Listed Sites on Subject Property*
I.1	NPL	1 mile	None	None
I.2	RESPONSE	1 mile	1	None

1. **U.S. Environmental Protection Agency: National Priority List (NPL)**

   The NPL is an U.S. Environmental Protection Agency (USEPA) database listing of the United States' worst uncontrolled or abandoned hazardous waste sites. NPL sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980. In addition, the NPL Report includes information concerning cleanup agreements between the U.S. EPA and Potentially Responsible Parties (commonly called Records of Decision or RODS), any liens filed against contaminated properties, as well as the past and current U.S. EPA budget expenditures tracked within the Superfund Consolidated Accomplishments Plan (SCAP). The search radius for NPL is one-mile.

   The subject property is not listed on the NPL. There are no NPL sites within one-mile of the subject property.

2. **California Department of Toxic Substance Control: Equivalent National Priority List (RESPONSE)**

   The RESPONSE database is a California Department of Toxic Substances Control (DTSC) database listing of the State of California's NPL-equivalent sites. These confirmed release sites are generally high-priority and have a high potential risk. They are those where the DTSC is involved in remediation of the site. The search radius for RESPONSE is one mile.

   The subject property is not listed on RESPONSE.

   There is one RESPONSE facility within one mile of the subject property. Camp Fremont did not have a formal address listed, but was mapped ½ mile southwest and potentially up-gradient of the subject property. The RESPONSE database lists this site as inactive. Camp Fremont is also listed in the EnviroStor database. According to historical information about this site available on the EnviroStor website, it was a training camp for the National Guard established in 1917 and abandoned in 1919. Another posted document dated January 11, 1991, stated that no records are available on Camp Fremont. Given the lack of other environmental investigations in the area of Camp Fremont and the distance from the subject property, there is no indication that its former presence, reportedly a century ago, could have an adverse effect on the subject property.

3. **U.S. Environmental Protection Agency: Resource Conservation and Recovery Act Information System (RCRIS) Corrective Action (CORRACTS) Facilities**

   The RCRIS CORRACTS database contains information pertaining to hazardous waste treatment, storage, and disposal facilities (RCRA TSDFs) which have conducted, or are currently conducting, a corrective action(s) as regulated under the Resource Conservation and Recovery Act (RCRA). The search radius for CORRACTS is one mile. The following information is included within the CORRACTS database:

   - Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS);
   - Inspections & evaluations conducted by Federal and state agencies; all reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties; and
   - Information pertaining to corrective actions undertaken by the facility or U.S. EPA.

   The subject property is not listed on CORRACTS. There are no CORRACTS sites within one mile of the subject property.

4. **U.S. Environmental Protection Agency: Superfund Enterprise Management System (SEMS) – Formerly CERCLIS**

   The U.S. EPA's SEMS database is a newly implemented application that integrates the former CERLIS database, the Superfund Document Management System (SDMS) and a few additional internal EPA applications. The SEMS database is a listing of hazardous waste sites, potentially hazardous waste sites and remedial activities performed in support of the Superfund Program pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). SEMS sites have either been investigated, or are currently under investigation, by the U.S. EPA for the release or threatened release of hazardous substances. The SEMS list also includes sites which are either proposed for listing or are listed on the NPL, or which are in the screening and assessment phase for possible NPL inclusion. The search radius for SEMS is ½ mile.

   The subject property is not listed on SEMS. There are no SEMS sites within ½ mile of the subject property.

5. **U.S. Environmental Protection Agency: SEMS-Archive – Formerly CERCLIS NFRAP**

   The U.S. ESA has replaced the CERCLIS No Further Remedial Action Planned (NFRAP) database with the SEMS-Archive database. SEMS-Archive tracks sites that have no further interest to the EPA under the Superfund Program based on available information. Listing on the Archive database indicates that to the best of EPAs' knowledge, no further steps will be taken to list the site on the NPL. The U.S. EPA may perform a minimal level of assessment at a SEMS-Archive site if new information becomes available, however. Listing on the SEMS-Archive database does not necessarily indicate there is no hazard associated with the site, only that the site is not judged to be a potential NPL site. The search radius for SEMS-Archive is ½ mile.

   The subject property is not listed on SEMS-Archive.

   There is one SEMS-ARCHIVE facility within ½ mile of the subject property. The United States Geological Survey (USGS) at 345 Middlefield Road was mapped 0.37 mile northwest and cross-gradient from the subject property. This site does not qualify for the NPL based on existing information and does not appear to be under environmental investigation by any regulatory agencies. Based on its cross-gradient location from the subject property, the lack of data suggesting environmental impacts, and its archive status, it is not of environmental concern.

6. **U.S. Environmental Protection Agency: Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal Facilities (TSDF)**

   The RCRA-TSDF is a U.S. EPA listing of facilities that were permitted under RCRA to perform on-site treatment, storage, or disposal of hazardous wastes. The sites listed in RCRA-TSDF do not necessarily pose an environmental threat to the surrounding properties because the TSDF permit imposes stringent monitoring and reporting requirements. The search radius for RCRA-TSDF is ½ mile. The following information is also included in the RCRA TSDF database:

   - Information pertaining to the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS);
   - Inspections & evaluations conducted by federal and state agencies; and
   - All reported facility violations, the environmental statute(s) violated, and any proposed & actual penalties.

   The subject property is not listed as a RCRA-TSDF facility. There are no RCRA-TSDF sites located within ½ mile of the subject property.

7. **U.S. Environmental Protection Agency: Resource Conservation and Recovery Act (RCRA) Generator List**

   The RCRA generators list is a US EPA listing of facilities that generate hazardous wastes or meet other applicable waste generating requirements under RCRA. The sites listed in the RCRA Generator List have not necessarily released hazardous waste into the environment and may not necessarily pose an environmental threat to the surrounding properties. These listed sites are required to properly contain the wastes generated and remove their wastes from the site within 90 days. Furthermore, the facilities that report waste generation activities are more inclined to perform the required monitoring. The search radius for the RCRIS Generator List is the Site and adjoining properties.

   The subject site is not included on the RCRA Generators List. There are no RCRA Generator listings for adjoining properties.

8. **U.S. Environmental Protection Agency: Emergency Response Notification System (ERNS) List**

   The Emergency Response Notification System (ERNS) list is a U.S. EPA maintained list of reported incidents that concern the sudden and/or accidental release of hazardous substances, including petroleum, into the environment. The search radius for ERNS is the subject property.

   The subject property is not listed on the ERNS list.

9. **California Department of Toxic Substances Control (DTSC): EnviroStor Sites**

   The EnviroStor database is a DTSC listing of sites under investigation that could be actually or potentially contaminated and that may present a possible threat to human health and the environment. The search radius for EnviroStor is one mile.

   The subject property is not listed on the EnviroStor list.

There are six EnviroStor sites listed within one mile of the subject property in the EDR report. All EnviroStor sites are located ½ mile or more from the subject property. Only two of the sites are located up-gradient. Camp Fremont located ½ mile southwest of the subject property was discussed in Section I.2 and is not of environmental concern.

PhotoTime, Inc., located a little more than ½ mile up-gradient, is an inactive tiered permit site that needs evaluation. The tiered permit status indicates this site had a wastewater discharge permit likely related to photochemicals. No other information was available about this listing on the EnviroStor website. However, based on the distance of more than ½ mile from the subject property and the nature of the listing, this site is not of significant environmental concern.

None of the other four EnviroStor sites are considered to be of significant environmental concern to the subject property based on the anticipated groundwater flow direction and distance of more than ½ mile.

10. California Department of Toxic Substances Control: Toxic Pits Cleanup Act Sites (Toxic Pits)

The Toxic Pits database is a California DTSC listing of hazardous waste cleanup sites regulated pursuant to the California Toxic Pits Cleanup Act (Toxic Pits). It identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. We note, this database has not been updated since July 1995. The search radius for Toxic Pits is one mile.

The subject property is not listed on the Toxic Pits site list. There are no Toxic Pits sites located within one mile of the subject property.

11. California Regional Water Quality Control Board: Clean-up Program Sites (CPS) - Spills, Leaks, Investigations, and Cleanup (SLIC)

The CPS-SLIC is a California Regional Water Quality Control Board (RWQCB) listing of sites that have reported spills, leaks, investigative activities, and/or cleanup actions. The search radius for CPS-SLIC is ½ mile.

The subject property is not listed on the CPS-SLIC list.

There are no CPS-SLIC sites reported within ½ mile of the subject property in the EDR report. However, according to the GeoTracker website, there is one CPS-SLIC site located approximately ½ mile southwest and potentially up-gradient of the subject property. Modena Motors at 111 El Camino Real has an open-inactive status. A report dating back to 1988 documented impacts from xylene and selected metals in soil two feet beneath an on-site sump. No groundwater impacts were reported. Based on apparent soil impacts only and a distance of approximately ½ mile, this site is not of significant environmental concern to the subject property.

12. California Integrated Waste Management Board: Solid Waste Information System (SWF/LF) Facilities

The SWF/LF is a California Integrated Waste Management Board (CIWMB) listing of all permitted active, inactive, or closed landfills. The search radius for SWF/LF is ½ mile.

The subject property is not listed on SWF/LF list. There are no SWF/LF sites within ½ mile of the subject property.

13. California Regional Water Quality Control Board: Leaking Underground Storage Tanks (LUST)

The LUST list is a California RWQCB listing of sites that have reported leaking underground storage tanks. A site may be listed on LUST by reporting the tank system(s) failed tank testing, that routine monitoring of tank system(s) showed evidence of leakage, or that verification sampling during tank removal showed subsurface contamination. The search radius for the LUST list is ½ mile.

Fuel leak case research conducted at the Lawrence Livermore National Laboratory (LLNL) indicates that attenuation and degradation play major roles in reducing hydrocarbon in groundwater to non-detectable levels within several hundred feet of the contaminant source. Research findings indicate that in over 90% of the petroleum hydrocarbon cases, groundwater contaminant plumes do not extend more than 250 feet from the source. The mobility of a gasoline additive called Methyl tertiary-Butyl Ether (MtBE) is currently being researched. Preliminary findings indicate that MtBE is highly soluble in water and moves easily through soil particles and into groundwater where it may spread over a distance greater than 250 feet. MtBE will transfer to groundwater from gasoline leaking from USTs, pipelines, car emissions into the atmosphere, and other components of gasoline vapor distribution. MtBE has been an

additive to gasoline since approximately 1985, but banned in California since 2004.

The subject property is not listed on the LUST list.

There are 22 LUST listings within ½ mile of the subject property. None of the LUST sites adjoin the subject property; three are located hydraulically up-gradient.

Ravenswood Substation did not have a formal address listed, but was mapped approximately 1/3 mile southwest of the subject property. It is listed as a Non-Case Information site on GeoTracker. Furthermore, an EPA website and a California Public Utilities Commission website indicated the substation is located more than 1.5 mile north-northeast of the subject property. Based on its status and reported location, this listing is not of environmental concern.

Two closed LUST cases are located approximately ½ mile southwest and potentially up-gradient of the subject property. However, based on their closed status and distance, they are not of environmental concern.

Based on the cross- to down-locations and case closed status of all other LUST sites within ½ mile, they are not of significant environmental concern to the subject property.

14. **California Water Resources Control Board: Registered Underground Storage Tank (RUST) and Aboveground Storage Tank (RAST) Lists**

    The California Water Resources Control Board Underground Storage Tank Program maintains a list of registered underground storage tanks (RUSTs) and registered aboveground storage tanks (RASTs) in the site area. The sites listed on the RAST and RUST lists have not necessarily released hazardous substances into the environment and may not necessarily pose an environmental threat to the surrounding properties. Since Federal and California UST regulations require periodic monitoring for UST leakage and the immediate reporting of evidence of UST leakage, only those sites listed on the leaking underground storage tank (LUST) list typically have the potential of environmental impact. The search radius for the RUST and RAST lists is the site and adjoining properties.

    The subject property is not listed on the RUST and RAST lists. No RUST and RAST sites adjoin the subject property.

15. **California Department of Toxic Substances Control: Hazardous Waste Information System (HAZNET) List**

    The data on the HAZNET list is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests are submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. The search radius for HAZNET is the site.

    The subject site is not listed on the HAZNET database.

16. **EDR® Historical Manufactured Gas Plants**

    EDR maintains a proprietary list of coal gas plants (manufactured gas plants) derived from city directories, telephone directories and other historical sources.

    The subject property is not listed as an historical manufactured gas plant. There are no historical manufactured gas plants reported within 1 mile of the subject property.

17. **EDR® Historical Auto Stations**

    EDR maintains a proprietary list of possible historical automotive repair shops and gasoline stations derived from city directories, telephone directories and other historical sources.

    The subject property is not listed as a historical auto station. There are no historical auto stations reported within 1/8 mile of the subject property.

18. **EDR® Historical Cleaners**

    EDR maintains a proprietary list of possible historical dry cleaner businesses derived from city directories, telephone directories and other historical sources.

    The subject property is not listed on the EDR historical cleaners database. There are no historical cleaners reported within 1/8 mile of the subject property.

Summary

The agency database search identified no current or historical conditions at the subject property and its vicinity that appear likely to have impacted

the soil or groundwater beneath the subject property.

AllWest's review of federal, tribal, state and local government records did/did not encounter data gaps that diminish our ability to provide an opinion on a release or potential release of hazardous substances at the subject property.

H. PREVIOUS REPORTS

Foundation Investigation for Additions to American Hardware Mutual Insurance Company Building, Menlo, Park, California, Peter Kaldveer and Associates, Inc. May 1979

Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).Regulatory agencies have generally defined ACM as a material containing greater that one (1) percent asbestos, however some states (e.g. CA) define ACM as materials having 0.1% asbestos.
AHERA	Asbestos Hazard Emergency Response Act
AOC	Area of Concern
APN	Assessor's Parcel Number
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
ASTM	American Society for Testing and Materials
AULs	Liens or Activity and Use Limitations
BAAQMD	Bay Area Air Quality Management District
bgs	Below Ground Surface
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
BTU/hr	British Thermal Units per hour
Cal/EPA	California Environmental Protection Agency, also known as DTSC
CD	Critical Distance
CFR	Code of Federal Regulations
COC	Contaminant of Concern
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).
Data Gap / Significant Data Gap	A lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information. A data gap is significant if other information and/or professional experience raises concerns involving the data gap.
De minimis Condition	A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.
DOGGR	California Department of Conservation, Department of Oil, Gas and Geothermal Resources
DTSC	California Department of Toxic Substances Control
EDR	Environmental Data Resources
EMI	Emissions Inventory Data
EPA	U.S. Environmental Protection Agency
ESA	Environmental Site Assessment
ESL	Environmental Screening Level
FEMA	Federal Emergency Management Agency
HAZNET	DTSC Hazardous Waste Information System
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof

	which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a "solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."
HMBP	Hazardous Materials Business Plan
HMMP	Hazardous Materials Management Plan
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).
HVAC	Heating, Ventilation and Air Conditioning
LNAPL	Light Non-Aqueous Phase Liquid
LOP	Local Oversight Program
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
mg/kg	milligrams per kilogram
mg/L	milligrams per liter
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
MSL	Mean Sea Level
MtBE	Methyl tertiary Butyl Ether
ND	Not Detected
NE	Not Established
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFA	No Further Action
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NV	No Value
O&M Plan	Operations and Maintenance Plan
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCBs	Polychlorinated Biphenyls. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications.
pCi/L	picoCuries per Liter of air. Unit of measurement for radon and similar radioactive materials.
PE	Professional Engineer
PG&E	Pacific Gas and Electric Company
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
ppb	parts per billion
ppm	parts per million

pVIC	Potential Vapor Intrusion Condition
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. *De minimis* conditions are not recognized environmental conditions.”
RWQCB	California Regional Water Quality Control Board
SLIC	Spills, Leaks, Investigations And Cleanup
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SQG	Small Quantity Generator
SWRCB	State Water Resources Control Board
TPH (d)(g)(mo)	Total Petroleum Hydrocarbons (d) as diesel (g) as gasoline (mo) as motor oil
ug/kg	micrograms per kilogram
ug/L	micrograms per liter
USGS	United States Geological Survey
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-13, define this as any tank, incl. underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VEC	Vapor Encroachment Condition
VOCs	Volatile Organic Compounds
Wetlands	Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs).

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

CA RGA LUST ---- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status

indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/19/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
US GEOLOGICAL SURVEY	***345 MIDDLEFIELD RD***	***NW 1/4 - 1/2 (0.369 mi.)***	***32***	***47***
Site ID: 0904273				
EPA Id: CA2470090364				

State- and tribal - equivalent NPL

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CAMP FREMONT (J09CA0		***WSW 1/4 - 1/2 (0.499 mi.)***	***J51***	***187***
Database: RESPONSE, Date of Government Version: 04/29/2019				
Status: Inactive - Needs Evaluation				
Facility Id: 80000016				

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 6 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 22 CA LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 2 CA UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS:

Registry ID: 110002949784

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US GEOLOGICAL SURVEY (Continued) **1015732573**

. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U151
. Waste name: MERCURY

. Waste code: U220
. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 9398

US GEOLOGICAL SURVEY (Continued) **1015732573**

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 9398

Waste code: D004
Waste name: ARSENIC
Amount (Lbs): 9398

Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes:	Returned to compliance on 04/19/2016. At least three waste containers were found being stored longer than the regulations allow. In the McKelvey Bldg in Labs: 1256 a container dated 2014 was found. In Lab 1033 a waste mercury container was found dated back to 2013. In lab 3037 I found a hazardous waste sharps container dating back to 3/4/2012. All waste containers must not be stored longer than the regulations allow. Collect and ship off these wastes immediately and any other containers that may be over their storage limits. Provide verification of their removal to the County within 30 days.

FINDS:

Registry ID: 110002756358

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 22226
Site Name: CPA FIRE STATION 1
Violation Date: 12-06-2018
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 12/06/2018. Diesel spill bucket failed to hold all liquid upon testing. Cap on fill riser was replaced and bucket retested. Restest demonstrated ability to hold 5 gallons of water for one hour. NO CORRECTIVE ACTIONS REQUIRED, VIOLATION WAS ABATED DURING THE INSPECTION.
Violation Division: Santa Clara County Environmental Health

Violation Source: CERS

Site ID: 22226
Site Name: CPA FIRE STATION 1
Violation Date: 12-06-2018
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes: Returned to compliance on 12/06/2018. Both float and chain assemblies within the Bravo under dispenser containment pan failed to trip the shear valve upon addition of water. One float (unleaded side) was unstuck and rested demonstrating functionality. One chain assembly was replaced and float was retested and shown to function as designed. NO CORRECTIVE ACTIONS REQUIRED, VIOLATION ABATED DURING INSPECTION.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-07-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Fire 1 Testing took place 12/5, report delivered 12/7 Onsite to witness annual UST monitoring system certification conducted by JP Petroleum Service, technician John Puumala. Mr. Puumala holds current ICC, Veeder Root and VMI certifications as of the date of testing. System is a two double walled tank suction system with each tank servicing one dedicated dispenser. Both tank annular sensors provided audible and visual alarms at monitoring panel. Both tank sump sensors provided audible and visual alarms at monitoring panel. UDC float and chain assemblies tripped shear valve with addition of water. Sensor out activated alarms at monitoring panel. Overfill provided by mechanical flapper- visually confirmed Reviewed documents submitted via CERS ID 10078099 on 8/23/2017 to include operating permit application, monitoring plan, site plan, response plan, cert. of financial responsibility CFR and CFO letter dated 11/15/2017 submitted to regulator DUSTO monthly records [Truncated]

Eval Type:	Routine done by local agency
Eval Notes:	FS1 Onsite to witness annual UST monitoring system certification conducted by JP Petroleum Service, technician John Puumala. Mr. Puumala holds current ICC, Veeder Root and VMI certifications as of the date of testing. System is a two double walled tank suction system with each tank servicing one dedicated dispenser. Both tank annular sensors provided audible and visual alarms at monitoring panel. Both tank sump sensors provided audible and visual alarms at monitoring panel. UDC float and chain assemblies tripped shear valve with addition of water. Sensor out activated alarms at monitoring panel. Reviewed documents submitted via CERS ID 10078099 on 5/18/15 CFO letter dated 1/7/2015 DUSTO monthly inspection records Training records.- basic response to panel alarms covered under Spill Control

Eval Date:	12-18-2013
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Fire 1 Oversaw monitoring system certification conducted by JP Petroleum, technician John Puumala. Mr. Puumala held valid ICC and Veeder Root certifications on the day of the inspection. System is two tanks (diesel and unleaded) each feeding a dedicated dispenser via suction piping. The following sensors were tested, each providing audible and visual alarms at the monitoring panel: Unleaded annular, unleaded sump, diesel annular, diesel sump. "Sensor out" provided alarms at the monitoring panel. UDC is float and chain, each operated as designed when water added. Spill buckets held water for one hour without loss. Overfill by flapper valve in drop tube. Reviewed the following paperwork: Operating permit application (A/B)- submitted via CERS 8/1/13 Monitoring plan - submitted via CERS 8/1/13 Response plan

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS

SRI INTERNATIONAL (Continued) **1000120184**

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 25699

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 9679

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 03/06/2018. During 12-21-17 inspection several labs were inactive with no obvious activity but no posted notice on the lab door (as required) to indicate the lab was

SRI INTERNATIONAL (Continued) **1007294586**

undergoing closure. Laboratory occupants are required to prepare a checklist (found on the SRI EH&S website) of events, time schedules, and people involved with the move and to consult EH&S early in the planning process. Labs N228, N226, and PS168 appeared to have begun closure but no notice was posted on the lab door. During the 12-21-17 inspection, many old chemicals were observed in upper cabinets in PN208. The lab occupant indicated that he had "inherited" these chemicals, which were the responsibility of another scientist who was not present. Most of the bottles were bar-coded indicating registration in the SRI chemical database. The lack of awareness of what is stored in the lab is a hazard in case of an accident. During the 1-11-18 inspection, B016 appeared to have begun closure but no notice was posted [Truncated]

Violation Description: RCRA Large Quantity Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 03/19/2018. During the 2-11-18 inspection, chemicals were stored in a waste-like manner in B-218, B-246, and possibly other labs in the same building. Many of the bottles are unlabeled, stored under other supplies, on their sides, or upside down. The manner of storage does not indicate these chemicals represent valued product, in fact many chemicals appear to be abandoned. During the 12-21-17 inspection, many old chemicals were observed in upper cabinets in PN208. The lab occupant indicated that he had "inherited" these chemicals, which were the responsibility of another scientist who occupied a different lab space. It was unclear whether the chemicals (some of them expired and on site for up to 20+ years) had been abandoned, are waste, or are re-usable product. According to 22 CCR 66261.2, a material is a waste if it poses a threat to the environment or human health and it meets either, or both, of the following: 1) it is mislabeled or not adequately labeled, unless the [Truncated]

Eval Notes: Recent changes in business have reduced the number of researchers and caused a greater turn over in scientists. It appears that some inspected labs with open containers and old chemicals may be vacant. Responsible parties for remaining chemicals and abandoned experiments were not clear from SRI staff responses. SRI has a form for documenting proper lab clearance. These forms were not provided for labs observed to be vacated or for which an assigned researcher could not be found. Recommend adding a lab closure/transfer/clearance section to the hazardous waste management training describing procedures for safe decommissioning of chemicals and equipment, official forms, and accountability. SRI conserves resources by sharing chemicals (expired and otherwise) among researchers. Reusable chemicals are stored in plastic bins in individual labs and identified by interested researchers through the facility's inventory system. To ensure communication of these chemicals availability, [Truncated]

Violation Date:	03-06-2018
Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 03/06/2018. During 12-21-17 inspection several labs were inactive with no obvious activity but no posted notice on the lab door (as required) to indicate the lab was undergoing closure. Laboratory occupants are required to prepare a checklist (found on the SRI EH&S website) of events, time schedules, and people involved with the move and to consult EH&S early in the planning process. Labs N228, N226, and PS168 appeared to have begun closure but no notice was posted on the lab door. During the 12-21-17 inspection, many old chemicals were observed in upper cabinets in PN208. The lab occupant indicated that he had "inherited" these chemicals, which were the responsibility of another scientist who was not present. Most of the bottles were bar-coded indicating registration in the SRI chemical database. The lack of awareness of what is stored in the lab is a hazard in case of an accident. During the 1-11-18 inspection, B016 appeared to have begun closure but no notice was posted [Truncated]

SRI INTERNATIONAL (Continued) **1007294586**

General
Violation Notes: Returned to compliance on 03/19/2018. During the 2-11-18 inspection, chemicals were stored in a waste-like manner in B-218, B-246, and possibly other labs in the same building. Many of the bottles are unlabeled, stored under other supplies, on their sides, or upside down. The manner of storage does not indicate these chemicals represent valued product, in fact many chemicals appear to be abandoned. During the 12-21-17 inspection, many old chemicals were observed in upper cabinets in PN208. The lab occupant indicated that he had "inherited" these chemicals, which were the responsibility of another scientist who occupied a different lab space. It was unclear whether the chemicals (some of them expired and on site for up to 20+ years) had been abandoned, are waste, or are re-usable product. According to 22 CCR 66261.2, a material is a waste if it poses a threat to the environment or human health and it meets either, or both, of the following: 1) it is mislabeled or not adequately labeled, unless the [Truncated]

Eval Notes:	Recent changes in business have reduced the number of researchers and caused a greater turn over in scientists. It appears that some inspected labs with open containers and old chemicals may be vacant. Responsible parties for remaining chemicals and abandoned experiments were not clear from SRI staff responses. SRI has a form for documenting proper lab clearance. These forms were not provided for labs observed to be vacated or for which an assigned researcher could not be found. Recommend adding a lab closure/transfer/clearance section to the hazardous waste management training describing procedures for safe decommissioning of chemicals and equipment, official forms, and accountability. SRI conserves resources by sharing chemicals (expired and otherwise) among researchers. Reusable chemicals are stored in plastic bins in individual labs and identified by interested researchers through the facility's inventory system. To ensure communication of these chemicals availability, [Truncated]

COMMUTER SHELL SERVICE (Continued) **U001595839**

to retain 8 wells and continued groundwater monitoring through 2010. All wells were destroyed in 2010. Groundwater concentrations were <50 micrograms per liter (ug/L) Total Petroleum Hydrocarbons as gasoline (TPHg), <0.50 ug/L benzene, <1.0 ug/L toluene, <1.0 ug/L ethylbenzene, <1.0 ug/L xylenes, and <1.0 MTBE at that time. February 2011 Tank Removal: Paradiso Mechanical, Inc. (Paradiso) removed three 12,000-gallon gasoline USTs, three hydraulic lifts, product dispensers, and associated piping. Conestoga-Rovers & Associates (CRA) collected nine soil samples from the bottom of the UST excavation at depths of 15 to 16 fbg. TPHg and BTEX were not detected in any of the soil samples. January 2012 Phase I Environmental Site Assessment (Phase I ESA): Romig Engineers, Inc. conducted a Phase I ESA and advanced nine soil borings (RB-1 through RB-9). A maximum concentration of TPHg at 3,800 milligrams per kilogram (mg/kg) was detected in soil boring RB-5 at 29.5 to 30 fbg. Benzene was only detected in one soil boring, RB-5, at 39.5 to 40 fbg, at a concentration of 0.011 mg/kg. Maximum concentrations of MTBE and tertiary-butyl alcohol (TBA) were detected in soil boring RB-2 at 35 to 35.5 fbg, at 4.6 mg/kg and 2.5 mg/kg, respectively. Grab groundwater samples were collected from first-encountered groundwater in soil borings RB-5 and RB-9. A maximum concentration of TPHg at 1,600 ug/L was detected in boring RB-5. Up to 12 ug/L of benzene, 600 %ug/L of MTBE, and 190 ug/L of TBA were detected in first encountered groundwater from RB-5. April 2012 The fuel leak case was re-opened based on information provided to DEH in a meeting on March 15, 2012. A plan was discussed to remove the residual contamination by excavation. Erler & Kalinowski, Inc. (EKI) prepared a Soil Management Plan (SMP) to facilitate the development of the site during excavation activities. For off-site disposal pre-characterization, EKI advanced 4 depth-discrete soil borings (B-1 through B-4) and 16 composite samples (C-0-3 through C-33-38 and D-0-3 through D-28-33) and collected first-encountered grab groundwater from soil borings B-2 through B-4. Up to 406 mg/kg TPHg was detected in soil samples. No benzene, MTBE, or TBA was detected in any of the soil borings. Up to 13,400 ug/L TPHg was detected in grab groundwater from soil boring B-4. Up to 0.61 ug/L benzene was detected in soil boring B-2, and up to 1,390 ug/L of MTBE was detected in soil boring B-3. No TBA was detected in any of the grab groundwater samples. November 2013 Excavation Report: EKI submitted an excavation report summarizing excavation activities for the development of a two-story subgrade parking structure with an overlying four-story commercial building. Excavation activities occurred from August 7, 2012 through January 3, 2013. The excavation was to an approximate depth of 34 feet across the entire site and removed approximately 26,000 bank cubic yards of soil. No confirmation soil sampling was conducted. Due to the proximity of groundwater, a barrier will be installed prior to construction of the two-story underground parking garage. The site will be developed with first floor commercial with residential units above.

FINDS:

Registry ID: 110002697840

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Voluntary Cleanup Agreement
Completed Date:	08/16/2002
Comments:	Issued Voluntary Cleanup Agreement (VCA). The Joint Powers Board (JPB) and the San Francisco Regional Water Quality Control Board (SFRWQCB) entered into a Spills, Leaks, Investigation and Cleanup Program Reimbursement Process Regulatory Oversight on December 21, 2001. DTSC will provide consultative assistance to the SFRWQCB for the review of a Soil Management Plan and Risk Assessment. Soil along the right-of-way has been found to contain elevated levels of arsenic, lead, TPH and PAHs.

TOWN & COUNTRY CLEANERS (Continued) **1006012242**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	05/18/2015
Comments:	The Groundwater Monitoring Report 1st Quarter 2015 presents the groundwater monitoring event that was conducted on the site on March 4, 2015 which was fourth event since the groundwater monitoring wells were installed in April and May 2014 and completed one annual cycle of monitoring events. Tetrachloroethylene was detected in four of the six monitoring wells at concentrations ranging from 0.7 to 43 micrograms per liter.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	03/03/2015
Comments:	The Soil-Vapor Sampling Report document the soil-vapor sampling activities performed at the Site on October 20, 21, and 22, 2014. A total of 24 temporary soil-vapor sampling points were installed that consisted of the following: 1) six sub-slab points, with three points in Building 3 and three point within the footprint of the former Building 6; 2) nine points at a depth of approximately 7.5 feet below ground surface; and 3) nine points at a depth of approximately 22.5 feet below ground surface.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	10/22/2014
Comments:	Soil gas probes were installed and sampled by the mobile lab. The work was performed as outlined in the Technical Memorandum, Work Plan for Groundwater Monitoring and Work Plan Addendum for Soil Gas Sampling approved by DTSC on February 7, 2014.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Technical Report
Completed Date:	05/12/2015
Comments:	The Investigation of Buildings 3 and 4 report documents the information that was obtained on the construction and ventilation of Buildings 3 and 4 at the Site.

Completed Area Name:	PROJECT WIDE

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported

TOWN & COUNTRY CLEANERS (Continued) **1006012242**

Completed Document Type:	Site Characterization Report
Completed Date:	10/16/2015
Comments:	The Groundwater Monitoring Report 3rd Quarter 2015 Semi-Annual presents the groundwater monitoring event that was conducted on the site on September 1, 2015 which was fifth event since the groundwater monitoring wells were installed in April and May 2014. Tetrachloroethylene was detected in three of the six monitoring wells at concentrations ranging from 0.9 to 34 micrograms per liter.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Workplan
Completed Date:	02/04/2016
Comments:	The indoor air sampling work plan outlines additional indoor air sampling to be performed in Buildings 3, 4, and 5 to confirm the results of indoor air sampling in May 2011, where there were no significant detections of volatile organic compounds, and to provide indoor air data during the winter.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Workplan
Completed Date:	02/04/2016
Comments:	The Soil-Vapor Sampling Work Plan outlines additional soil vapor sampling that is to be performed to further delineate the lateral extent of impacts to soil vapor by PCE. Sampling locations are included along the northeastern boundary of the site to obtain more representative data for evaluating the potential risk to offsite residents.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Characterization Report
Completed Date:	04/18/2016
Comments:	Indoor air sampling report summarizes the results of the sampling event that took place on February 10, 2016. The PCE results for three suites in the shopping center exceeded published screening levels, possibly due to indoor sources of PCE. Re-sampling of the three suites in the warm season has been recommended.

Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 04/23/2014
Comments: The groundwater monitoring well installation outlined in the Work Plan approved by DTSC on 2/7/2014 was completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 02/07/2014
Comments: The Work Plan identifies the location of six groundwater monitoring wells to be installed at the Site and outlines the well installation, development, and sampling procedures. Additionally, the Work Plan outlines an initial round of soil gas sampling to be performed at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/26/2014
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 05/18/2015
Comments: The Groundwater Monitoring Report 1st Quarter 2015 presents the groundwater monitoring event that was conducted on the site on March 4, 2015 which was fourth event since the groundwater monitoring wells were installed in April and May 2014 and completed one annual cycle of monitoring events. Tetrachloroethylene was detected in four of the six monitoring wells at concentrations ranging from 0.7 to 43 micrograms per liter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 03/03/2015
Comments: The Soil-Vapor Sampling Report document the soil-vapor sampling activities performed at the Site on October 20, 21, and 22, 2014. A

TOWN & COUNTRY CLEANERS (Continued) **1006012242**

total of 24 temporary soil-vapor sampling points were installed that consisted of the following: 1) six sub-slab points, with three points in Building 3 and three point within the footprint of the former Building 6; 2) nine points at a depth of approximately 7.5 feet below ground surface; and 3) nine points at a depth of approximately 22.5 feet below ground surface.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 10/22/2014
Comments: Soil gas probes were installed and sampled by the mobile lab. The work was performed as outlined in the Technical Memorandum, Work Plan for Groundwater Monitoring and Work Plan Addendum for Soil Gas Sampling approved by DTSC on February 7, 2014.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 05/12/2015
Comments: The Investigation of Buildings 3 and 4 report documents the information that was obtained on the construction and ventilation of Buildings 3 and 4 at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Workplan
Completed Date: 08/03/2015
Comments: The Technical Memorandum, Work Plan for Human Health Risk Assessment summarizes the planned risk assessment methodology for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 11/13/2015
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 10/16/2015
Comments: The Groundwater Monitoring Report 3rd Quarter 2015 Semi-Annual presents the groundwater monitoring event that was conducted on the site on September 1, 2015 which was fifth event since the groundwater monitoring wells were installed in April and May 2014. Tetrachloroethylene was detected in three of the six monitoring wells at concentrations ranging from 0.9 to 34 micrograms per liter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 02/04/2016
Comments: The indoor air sampling work plan outlines additional indoor air sampling to be performed in Buildings 3, 4, and 5 to confirm the results of indoor air sampling in May 2011, where there were no significant detections of volatile organic compounds, and to provide indoor air data during the winter.

TOWN & COUNTRY CLEANERS (Continued) **1006012242**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 02/04/2016
Comments: The Soil-Vapor Sampling Work Plan outlines additional soil vapor sampling that is to be performed to further delineate the lateral extent of impacts to soil vapor by PCE. Sampling locations are included along the northeastern boundary of the site to obtain more representative data for evaluating the potential risk to offsite residents.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 04/18/2016
Comments: Indoor air sampling report summarizes the results of the sampling event that took place on February 10, 2016. The PCE results for three suites in the shopping center exceeded published screening levels, possibly due to indoor sources of PCE. Re-sampling of the three suites in the warm season has been recommended.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/19/2019
Date Data Arrived at EDR: 07/30/2019

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019
Date Data Arrived at EDR: 07/30/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/19/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

68 WILLOW ROAD
68 WILLOW ROAD
MENLO PARK, CA 94025

TARGET PROPERTY COORDINATES

Latitude (North):	37.452101 - 37° 27' 7.56''
Longitude (West):	122.166075 - 122° 9' 57.87''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	573760.2
UTM Y (Meters):	4145149.5
Elevation:	57 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640620 PALO ALTO, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

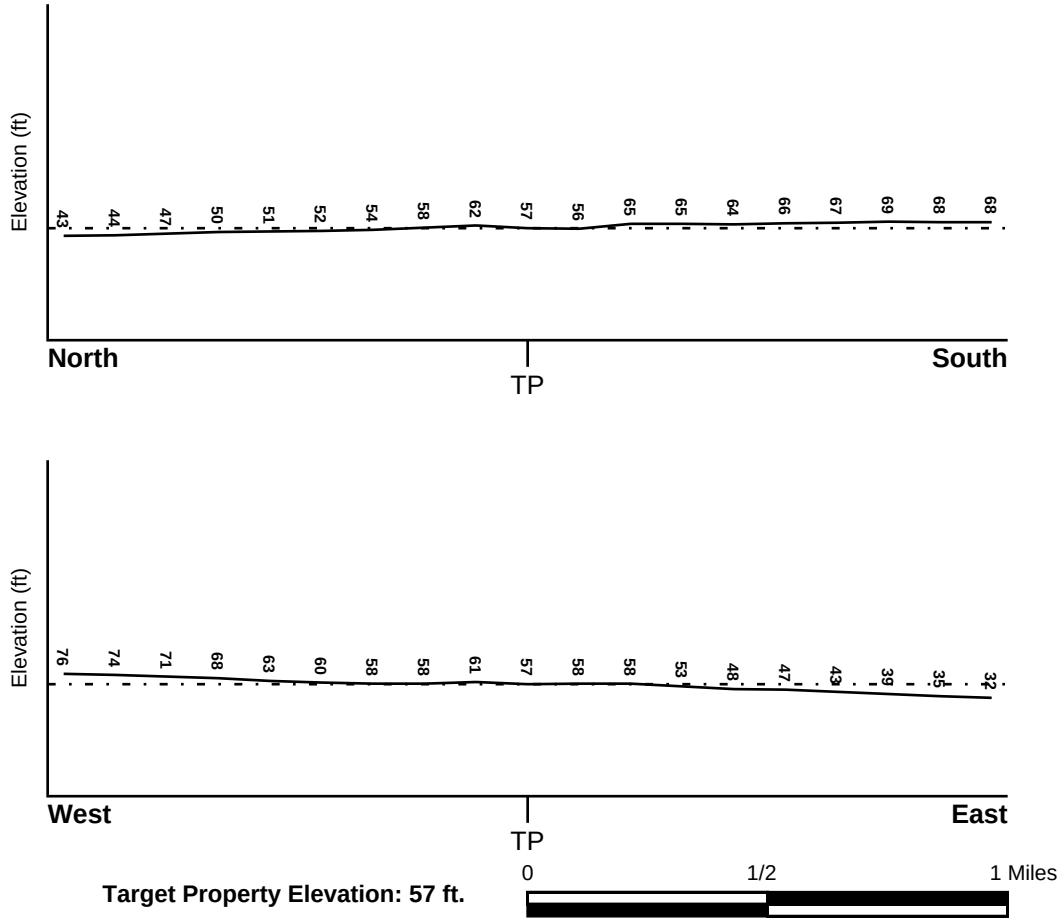

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06081C0308E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06081C0309E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
PALO ALTO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

6G	1/2 - 1 Mile WSW	E
7G	1/4 - 1/2 Mile SW	E

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Botella

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	16 inches	59 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Allwest Environmental Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

RE: FOUNDATION INVESTIGATION
ADDITIONS TO AMERICAN
HARDWARE MUTUAL INSURANCE
COMPANY BUILDING
MENLO PARK, CALIFORNIA

Gentlemen:

In accordance with your request, we have performed a foundation investigation for the subject additions. The accompanying report presents the results of our field investigation, laboratory tests, and engineering analysis. The soil and foundation conditions are discussed and recommendations for the soil and foundation engineering aspects of the project are presented. The conclusions and recommendations contained herein are based upon applicable standards of our profession at the time this report has been prepared. Copies of this report are furnished only to provide the factual data which were gathered and which were summarized in the report.

We refer you to the text of the report for detailed recommendations. If you have any questions concerning our findings, please call us.

Very truly yours,

PETER KALDVEER AND ASSOC., INC.

FOUNDATION INVESTIGATION
FOR
ADDITIONS TO AMERICAN HARDWARE
MUTUAL INSURANCE COMPANY BUILDING
MENLO PARK, CALIFORNIA

INTRODUCTION

In this report, we present the results of our foundation investigation for the proposed additions to the American Hardware Mutual Insurance Company building located at 68 Willow Road in Menlo Park, California, as shown on the Site Plan, Figure 1. The purpose of our investigation was to evaluate the foundation soils and provide recommendations concerning the soil and foundation engineering aspects of the project.

Based on the information indicated on the Site Plan as well as on our conversations with Mr. John Gatto, the project architect, it is our understanding that the additions will be single-story structures constructed adjacent to the west and east sides of the existing building. The additions will be similar to the existing building consisting of masonry walls with slab-on-grade floors. The building loads are expected to be relatively light. Some grading, consisting of 1 to 2.5 feet of fill on the west side of the existing building, will be required to develop the site. Only minor grading will be required on the east side of the site.

SCOPE

The scope of work performed in this investigation included a site reconnaissance, subsurface exploration, laboratory testing, engineering analyses of the field and laboratory data and the preparation of this report. The data obtained and the analyses performed were for the purpose of providing design and construction criteria for site earthwork, building foundations, and slab-on-grade floors.

This report has been prepared for the exclusive use of American Hardware Mutual Insurance Company and their consultants for specific application to the proposed additions in accordance with generally accepted soil and foundation engineering practices. In the event that any changes in the nature, design or location of the additions or if any other future additions are planned, the conclusions and recommendations contained in this report shall not be considered valid unless the changes are reviewed and conclusions of this report modified or verified in writing.

SITE INVESTIGATION

A subsurface investigation was performed using a truck-mounted, 6-inch diameter continuous flight auger to investigate and sample the subsurface soils. Three exploratory borings were drilled on May 15, 1979, to a maximum depth of 15 feet. The approximate locations of the borings are shown on the Site Plan, Figure 1. Logs of the borings and details regarding the field investigation are included in Appendix A, and the results of our laboratory tests are discussed in Appendix B.

A. Surface

At the time of our field investigation, the area of the proposed addition on the west side of the existing building was almost entirely landscaped. The majority of this area was covered with grass or planted with trees and shrubs. In addition, there was a concrete walkway at the entrance to the existing building which will be at the northeast corner of the proposed west addition. An irrigation sprinkler system was noted in the lawn and landscape areas. The east addition area was totally covered by an existing concrete patio.

B. Subsurface

The soils encountered in our exploratory borings generally consisted of firm to stiff silty clays which extended to the maximum depth explored of 15 feet. These soils were found to have a medium plasticity and a moderate expansion potential. Detailed descriptions of the soils encountered in each of the exploratory borings are presented in Appendix A.

The attached boring logs and related information depict subsurface conditions only at the specific locations shown on the Site Plan and on the particular date designated on the logs. Also, the passage of time may result in changes in the subsurface conditions due to environmental changes. The locations of the borings were approximately determined by pacing and should be considered accurate only to the degree implied by the method used.

C. Groundwater

Free groundwater was not encountered in any of the borings at the time of drilling. All borings were backfilled immediately after drilling. It should be noted that the borings may not have been left open for a sufficient period of time to establish equilibrium groundwater conditions. In addition, fluctuations in the groundwater level may occur due to variations in rainfall, temperature and other factors not evident at the time measurements were made.

D. Geology and Seismicity

The site is located in an alluvial valley filled with Quaternary sediments. The surficial alluvial deposits have a maximum thickness of about 200 feet and consist of silts, clay, and sand. These deposits are underlain by weakly consolidated soils of the Santa Clara Formation which is in turn underlain by more massive sandstone at a depth of greater than 1000 feet.

The San Francisco Bay Area is recognized by geologists and seismologists as one of the most active seismic regions in the United States. The significant earthquakes which occur in the Bay Area are associated with crustal movements along well defined active fault zones which trend in a northwesterly direction. The site is approximately 5 miles east, and 12 miles and 18 miles southwest of the active San Andreas, Hayward and Calaveras Fault Zones, respectively. Hence, as is the rest of the San Francisco Bay Area, the site is in a region having high seismic activity.

Although research on earthquake prediction has greatly increased in recent years, seismologists have not yet reached the point where they can accurately predict when and where an earthquake will occur. Nevertheless, on the basis of current technology, as well as historical evidence, it is reasonable to assume that the proposed additions will be subjected to at least one moderate to severe earthquake that will cause strong shaking of the site. However, during such an earthquake, the danger from fault offset through the site is remote.

CONCLUSIONS AND RECOMMENDATIONS

From a soil and foundation engineering standpoint, it is our opinion that the site is suitable for the proposed additions. However, all of the conclusions and recommendations presented in this report should be incorporated in the design and construction of the project to avoid possible soil and foundation problems. The moderate expansion potential of the clayey surface soils encountered at the site is the primary consideration for foundation design at the site. These materials could be subjected to volume changes during seasonal fluctuations in moisture content. In order to minimize possible damage to the proposed additions resulting from swelling and shrinkage of these materials, we recommend that the additions be supported on footings extended somewhat deeper than normal. In addition, we recommend that all slabs-on-grade be supported on a layer of imported non-expansive fill. Detailed earthwork and foundation recommendations for use in design and construction of the project are presented below.

We recommend that our firm be provided the opportunity for a general review of the final design and specifications in order that the earthwork and foundation recommendations may be properly interpreted and implemented in the design and specifications. If our firm is not accorded the privilege of making this recommended review, we can assume no responsibility for misinterpretation of our recommendations.

A. Earthwork

1. Clearing and Site Preparation

The site should be cleared of all obstructions including designated walkways, landscaping, buried utility and irrigation lines and debris. Holes resulting from the removal of underground obstructions that extend below the proposed finish grade should be cleared and backfilled with suitable material compacted to the requirements given below under Item A.4, "Compaction". We recommend that the backfilling operations for any excavations to remove deleterious material be carried out under the observation of the soil engineer, so that these excavations will be properly backfilled.

After clearing, the portions of the site containing surface vegetation or organic laden topsoil should be stripped to an appropriate depth to remove these materials. At the time of our field investigation, we estimated that a stripping depth of approximately 3 inches would be required. The amount of actual stripping should be determined in the field by the soil engineer at the time of construction. The cleared and stripped materials should be

removed from the site or stockpiled for later use in landscaping, if desired.

2. Subgrade Preparation

After the site has been properly cleared and stripped and any necessary excavations made, the exposed soils in those areas to receive structural fill or slabs-on-grade should be scarified to a depth of 6 inches, moisture conditioned to slightly above optimum water content and compacted to the requirements for structural fill.

3. Material for Fill

All on-site soils below the stripped layer and having an organic content of less than 3 percent by volume can be used as fill except where non-expansive import is required beneath the slabs. However, all fill placed at the site including on-site soils should not contain rocks or lumps larger than 6 inches in greatest dimension with not more than 15 percent larger than 2.5 inches. In addition, the required import fill should be predominantly granular with a plasticity index of 12 or less.

4. Compaction

All structural fill should be compacted to at least 90 percent relative compaction as determined by ASTM Test Designation D 1557-70. Fill material should be spread and compacted in lifts not exceeding 8 inches in uncompacted thickness. We should note that if construction proceeds during the wet winter months, it may require time to dry the on-site clayey soils to be used as fill since their moisture content will probably be appreciably above optimum.

5. Trench Backfill

Pipeline trenches should be backfilled with fill placed in lifts not exceeding 8 inches in uncompacted thickness. If on-site soil is used, the material should be compacted to at least 85 percent relative compaction by mechanical means only. Imported sand may also be used for backfilling trenches provided it is compacted to at least 90 percent relative compaction. If imported sand is used, sufficient water should be added during the trench backfilling operations to prevent the soil from "bulking" during compaction. In slab areas, the upper 3 feet of trench backfill should be compacted to at least 90 percent relative compaction for on-site soils, and 95 percent where imported sand backfill is used. In addition, in pavement areas, the upper 6 inches of trench backfill should be compacted to 95 percent relative compaction.

As noted above, if any construction proceeds during or shortly after the wet winter months, it may require time to dry the on-site clayey soils to be used as trench backfill since their moisture content will probably be appreciably above optimum.

6. Drainage

Positive surface gradients should be provided adjacent to the building so as to direct surface water away from foundations and slabs toward suitable

discharge facilities. Ponding of surface water should not be allowed adjacent to the structure.

7. Guide Specifications

All earthwork should be performed in accordance with the Guide Specifications -Site Earthwork presented in Appendix C. It should be pointed out, however, that these specifications are only general in nature and the actual job specifications should also incorporate all requirements contained in this report.

B. Foundations

1. Footings

We recommend that the proposed additions be supported on conventional continuous and isolated spread footings bearing on undisturbed natural soils or compacted fills. All footings should be founded at least 18 inches below lowest adjacent finished grade. However, where footings will be placed adjacent to footings supporting the existing building, they should be founded at the same depth as the existing footing. In addition, footings located adjacent to other footings or utility trenches should have their bearing surfaces situated below an imaginary 1.5 horizontal to 1 vertical plane projected upward from the bottom edge of the adjacent footings or utility trench.

At the above depths, the footings may be designed for an allowable bearing pressure of 1500 pounds per square foot due to dead loads, 2000 pounds per square foot due to dead plus live loads and 3000 pounds per square foot for all loads including wind or seismic. These allowable bearing pressures are net values; therefore, the weight of the footing can be neglected for design purposes. Footings should not, however, have a width of less than 12 inches.

All continuous footings should be designed with adequate top and bottom reinforcement to provide structural continuity and to permit spanning of local irregularities. Any visible cracks in the bottoms of the footing excavations should be closed by wetting prior to construction of the foundations. To assure that footings are founded on appropriate material, we recommend that we observe the footing excavations prior to placing reinforcing steel or concrete.

Settlements under building loads are expected to be within tolerable limits for the proposed structure.

2. Slabs-on-Grade

Due to the moderately expansive nature of the surface soils at the site, we recommend that slabs-on-grade be supported on a minimum of 12 inches of imported non-expansive compacted fill. Prior to final construction of the slab, the subgrade surface should be proof-rolled to provide a smooth, firm surface for slab support. Slab reinforcing should be provided in accordance with the anticipated use and loading of the slab.

In areas where floor wetness would be undesirable, 4 inches of free draining, rounded gravel should be placed beneath the floor slab to serve as a capillary barrier between the subgrade soil and the slab. In order to minimize vapor transmission, an impermeable membrane should be placed over the gravel. The membrane should be covered with 2 inches of sand to protect it during construction. The sand should be lightly moistened just prior to placing the concrete. The sand, membrane and gravel may be used in lieu of the upper 6 inches of the imported non-expansive fill. For economical reasons, if 6 inches of the nonexpansive fill is used it may be desirable to use gravel for the entire lower 10 inches of non-expansive fill, the remaining 2 inches being made up of the sand overlying the membrane.

3. Lateral Loads

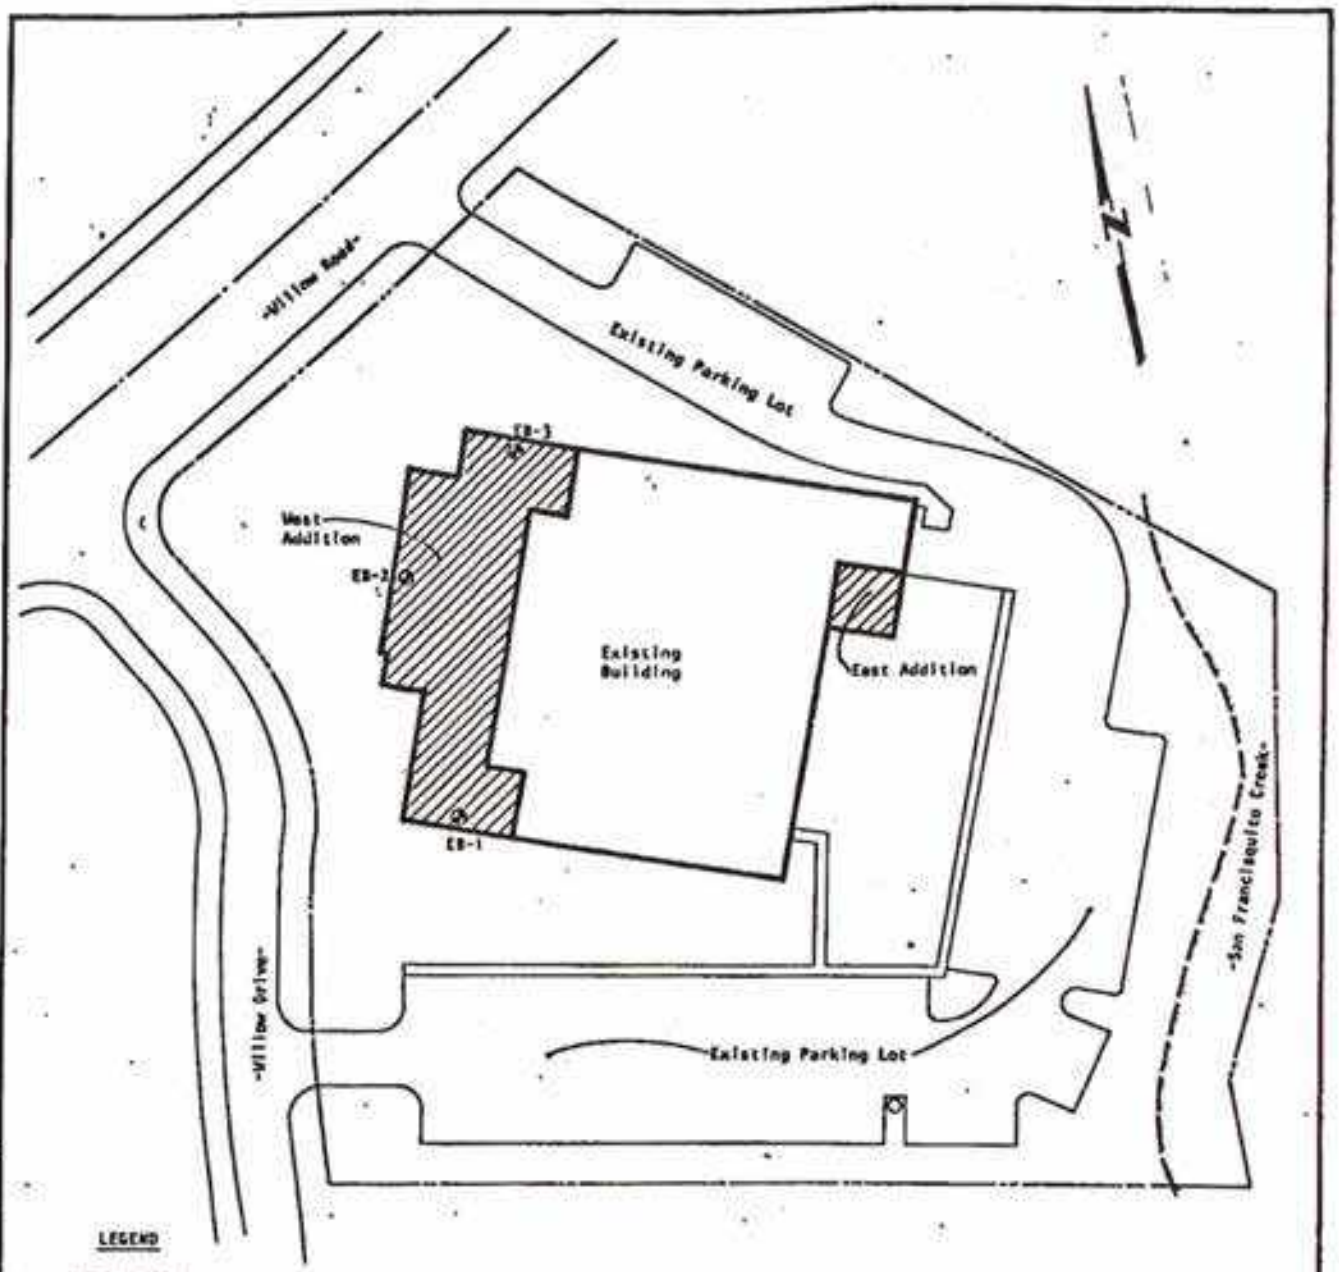

Lateral load resistance for the building and walls may be developed in friction between the foundation bottom and the supporting subgrade. A friction coefficient of 0.35 is considered applicable. As an alternative, a passive resistance equal to an equivalent fluid weighing 350 pounds per cubic foot acting against the foundations may be used. If the foundations are poured neat against the soil, friction and passive resistance may be used in combination.

C. Construction Observation

The analysis and recommendations submitted in this report are based in part upon the data obtained from the three soil borings. The nature and extent of variations between the borings may not become evident until construction. If variations then become apparent, it will be necessary to re-evaluate the recommendations of this report.

We recommend that our firm be retained to provide soil engineering services during the excavation and foundation construction phases of the work. This is to observe compliance with the design concepts, specifications and recommendations and to allow design changes in the event that subsurface conditions differ from that anticipated prior to the start of construction.

SITE PLAN

AMERICAN HARDWARE MUTUAL INSURANCE COMPANY ADDITION
Menlo Park, California

PROJECT NO.	DATE	Figure 1
6156-28	May 1979	

APPENDIX A - FIELD INVESTIGATION

The field investigation consisted of a surface reconnaissance and a subsurface exploration program using a truck-mounted, continuous flight auger. Three 6-inch diameter exploratory borings were drilled on May 15, 1979, to a maximum depth of 15 feet. The locations of the exploratory borings are shown on the Site Plan, Figure 1. The soils encountered in the borings were continuously logged in the field by our representative. The soils are described in accordance with the Unified Soil Classification System (ASTM D-2487). The logs of the borings as well as a key for the classification of the soil (Figure A-1) are included as part of this appendix.

Representative soil samples were obtained from the exploratory borings at selected depths appropriate to the soil investigation. Undisturbed samples were obtained using a 3-inch O.D. Modified California sampler and disturbed samples were obtained using the 2-inch O.D. split spoon sampler. All samples were transmitted to our laboratory for evaluation and appropriate testing. Both sampler types are indicated in the "Sampler" column of the boring logs as designated below:

Split Spoon

Modified California

Resistance blow counts were obtained with the samplers by dropping a 140-pound hammer through a 30-inch free fall. The sampler was driven 18 inches and the number of blows were recorded for each 6 inches of penetration. The blows per foot recorded on the boring logs represent the accumulated number of blows that were required to drive the last 12 inches. When the split spoon sampler was used, these blow counts are the standard penetration resistance values. However, due to the larger diameter of the Modified California sampler, the blow counts recorded for this sampler are not standard penetration resistance values. Consequently, these values are followed by an asterisk (*) on the boring logs. In order to convert these values to standard penetration resistance values, the indicated blow counts should be multiplied by a factor of 0.56.

The attached boring logs and related information show our interpretation of the subsurface conditions at the dates and locations indicated, and it is not warranted that they are representative of subsurface conditions at other locations and times.

APPENDIX B - LABORATORY INVESTIGATION

The laboratory testing program was directed toward a quantitative and qualitative evaluation of the physical and mechanical properties of the soils underlying the site.

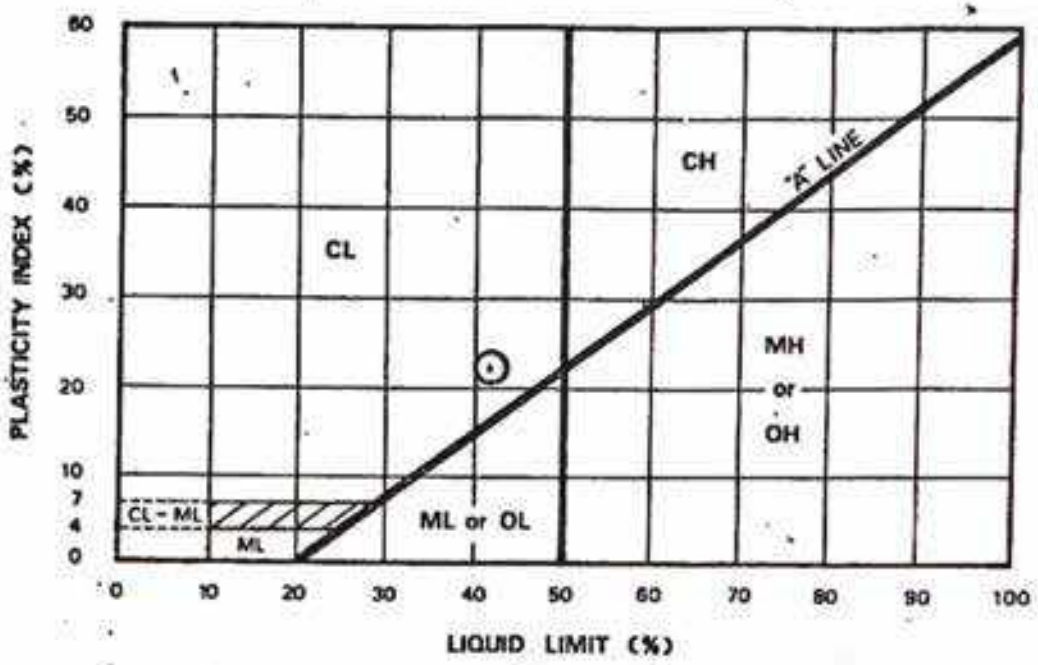

The natural water content was determined on 13 samples of the materials recovered from the borings in accordance with ASTM Test Designation D-2216. These water contents are recorded on the boring logs at the appropriate sample depths.

Dry density determinations were performed on six samples of the subsurface soils to evaluate their physical properties. The results of these tests are shown on the boring logs at the appropriate sample depths.

Atterberg Limit determinations were performed on one sample of the subsurface soil to determine the range of water content over which this material exhibits plasticity. The Atterberg Limits were determined in accordance with ASTM Test Designations D-428 and D-424. These values are used to classify the soil in accordance with the Unified Soil Classification System and to indicate the soil's compressibility and expansion potentials. The results of this test are presented on Figure B-1 and on the log of Boring 2 at the appropriate sample depth.

The percent passing the #200 sieve was determined on one sample of the subsurface soils to aid in the classification of this soil. This test was performed in accordance with ASTM Test Designation D-1140. The results of this test are shown on the log of Boring 2 at the appropriate sample depth.

Unconfined compression tests were performed on five undisturbed samples of the clayey subsurface soils to evaluate the undrained shear strengths of these materials. The unconfined tests were performed in accordance with ASTM Test Designation D-2166 on samples having a diameter of 2.4 inches and a height-to-diameter ratio of at least two. Failure was taken as the peak normal stress. The results of these tests are presented on the boring logs at the appropriate sample depths.

APPENDIX C
GUIDE SPECIFICATIONS - SITE EARTHWORK
FOR
ADDITIONS TO AMERICAN HARDWARE MUTUAL INSURANCE COMPANY BUILDING
MENLO PARK, CALIFORNIA

1. GENERAL

A. Scope of Work

These specifications and applicable plans pertain to and include all site earthwork including, but not limited to, the furnishing of all labor, tools, and equipment necessary for site clearing and stripping, disposal of excess materials, excavation, preparation of foundation materials for receiving fill, and placement and compaction of fill to the lines and grades shown on the project grading plans.

B. Performance

The Contractor warrants all work to be performed and all materials to be furnished under this contract against defects in materials or workmanship for a period of _____year(s) from the date of written acceptance of the entire construction work by the Owner.

Upon written notice of any defect in materials or workmanship during said_____ year period, the Contractor shall, at the option of the Owner, repair or replace said defect and any damage to other work caused by or resulting from such defect without cost to the Owner. This shall not limit any rights of the Owner under the "acceptance and inspection" clause of this contract.

The Contractor shall be responsible for the satisfactory completion of all site earthwork in accordance with the project plans and specifications. This work shall be observed and tested by a representative of Peter Kaldveer and Associates, Inc., hereinafter known as the Soil Engineer. Both the Soil Engineer and the Architect/ Engineer are the Owner's representatives. If the Contractor should fail to meet the technical or design requirements embodied in this document and on the applicable plans, he shall make the necessary readjustments until all work is deemed satisfactory as determined by the Soil Engineer and the Architect/ Engineer. No deviation from the specifications shall be made except upon written approval of the Soil Engineer or Architect/Engineer.

No site earthwork shall be performed without the physical presence or approval of the Soil Engineer. The Contractor shall notify the Soil Engineer at least twenty-four hours prior to commencement of any aspect of the site earthwork.

The Soil Engineer shall be the Owner's representative to observe the grading operations during the site preparation work and the placement and compaction of fills. He shall make enough visits to the site to familiarize himself generally with the progress and quality of the work. He shall

make a sufficient number of tests and/or observations to enable him to form an opinion regarding the adequacy of the site preparation, the acceptability of the fill material, and the extent to which the compaction of the fill, as placed, meets the specification requirements. Any fill that does not meet the specification requirements shall be removed and/or recompacted until the requirements are satisfied.

In accordance with generally accepted construction practices, the Contractor shall be solely and completely responsible for working conditions at the job site, including safety of all persons and property during performance of the work. This requirement shall apply continuously and shall not be limited to normal work hours.

Any construction review of the Contractor's performance conducted by the Soil Engineer is not intended to include review of the adequacy of the Contractor's safety measures in, on or near the construction site.

Upon completion of the construction work, the Contractor shall certify that all compacted fills and foundations are in place at the correct locations, have the correct dimensions, are plumb, and have been constructed in accordance with sound construction practice. In addition, he shall certify that the materials used are of the types, quantity and quality required by the plans and specifications.

C. Site and Foundation Conditions

The Contractor is presumed to have visited the site and to have familiarized himself with existing site conditions and the soil report titled "Foundation Investigation, Additions to American Hardware Mutual Insurance Company Building, Menlo Park, California", dated May 25, 1979.

The Contractor shall not be relieved of liability under the contract for any loss sustained as a result of any variance between conditions indicated by or deduced from the soil report and the actual conditions encountered during the course of the work.

The Contractor shall, upon becoming aware of surface and/or subsurface conditions differing from those disclosed by the original soil investigation, promptly notify the Owner as to the nature and extent of the differing conditions, first verbally to permit verification of the conditions, and then in writing. No claim by the Contractor for any conditions differing from those anticipated in the plans and specifications and disclosed by the soil investigation will be allowed unless the Contractor has so notified the Owner, verbally and in writing, as required above, of such changed conditions.

D. Dust Control

The Contractor shall assume responsibility for the alleviation or prevention of any dust nuisance on or about the site or off-site borrow areas. The Contractor shall assume all liability, including court costs of codefendants, for all claims related to dust or windblown materials attributable to his work.

II. DEFINITION OF TERMS

STRUCTURAL FILL - All soil or soil-rock material placed at the site in order to raise grades or to backfill excavations, and upon which the Soil Engineer has made sufficient tests and/or observations to enable him to issue a written statement that, in his opinion, the fill has been placed and compacted in accordance with the specification requirements.

ON-SITE MATERIAL - Material obtained from the required site excavations.

IMPORT MATERIAL - Material obtained from off-site borrow areas.

ASTM SPECIFICATIONS - The 1977 edition of the American Society for Testing and Materials Standards.

DEGREE OF COMPACTION - The ratio, expressed as a percentage, of the in-place dry density of the compacted fill material to the maximum dry density of the same material as determined by ASTM Test Designation D 1557-70.

III. SITE PREPARATION

A. Clearing and Grubbing

The Contractor shall accept the site in its present condition and shall remove from the area of the designated project earthwork all obstructions including designated walkways and landscaping, buried utility and irrigation lines, and any other matter determined by the Soil Engineer to be deleterious. Such material shall become the property of the Contractor and shall be removed from the site. Holes resulting from the removal of underground obstructions that extend below finish grades shall be cleared and backfilled with structural fill.

B. Stripping

Where vegetation exists, the site shall be stripped to a minimum depth of 3 inches or to such greater depth as the Soil Engineer in the field may consider as being advisable to remove all surface vegetation and organic laden topsoil. Stripped topsoil with an organic content in excess of 3 percent by volume shall be stockpiled for possible use in landscaped areas.

IV. EXCAVATION

All excavation shall be performed to the lines and grades and within the tolerances specified on the project grading plans. All overexcavation below the grades specified shall be backfilled at the Contractor's expense and shall be compacted in accordance with the specifications. The Contractor shall assume full responsibility for the stability of all temporary construction slopes at the site.

V. SUBGRADE PREPARATION

Surfaces to receive compacted fill, and those on which concrete slabs and pavements will be constructed, shall be scarified to a minimum depth of 6

inches and compacted. All ruts, hummocks, or other uneven surface features shall be removed by surface grading prior to placement of any fill materials. All areas which are to receive fill material shall be approved by the Soil Engineer prior to the placement of any fill material.

VI. GENERAL REQUIREMENTS FOR FILL MATERIAL

All fill material must be approved by the Soil Engineer. The material shall be a soil or soil-rock mixture which is free from organic matter or other deleterious substances. The fill material shall not contain rocks or rock fragments over 6 inches in greatest dimension and not more than 15 percent shall be over 2.5 inches in greatest dimension. Some larger rocks may be incorporated into the lower portions of the fill if the rocks are widely spaced and if the spacing method is approved by the Soil Engineer. On-site material having an organic content of less than 3 percent by volume is suitable for use as fill in all areas except where non-expansive import material is specified.

All imported fill material shall be nonexpansive with a plasticity index of 12 or less.

VII. PLACING AND COMPACTING FILL MATERIAL

All structural fill shall be compacted by mechanical means to produce a minimum degree of compaction of 90 percent as determined by ASTM Test Designation D 1557-70. Field density tests shall be performed in accordance with either ASTM Test Designation D 1556-64 (Sand-Cone Method) or ASTM Test Designation D 2922-71 and D 3017-72 (Nuclear Probe Method). The locations and number of field density tests shall be determined by the Soil Engineer. The results of these tests and compliance with these specifications shall be the basis upon which satisfactory completion of work shall be judged by the Soil Engineer.

VIII. TRENCH BACKFILL

Pipeline trenches shall be backfilled with compacted structural fill placed in lifts not exceeding 8 inches in uncompacted thickness. If onsite soil is used, the material shall be compacted by mechanical means to a minimum degree of compaction of 85 percent. Imported sand may also be used for backfilling trenches provided it is compacted to at least 90 percent. If imported sand backfilling is used, sufficient water shall be added during the trench backfilling operations to prevent the soil from bulking during compaction. In all building pad areas, the upper 3 feet of trench backfill shall be compacted to a minimum degree of compaction of 90 percent for onsite soils and 95 percent where imported sand backfill is used.

IX. TREATMENT AFTER COMPLETION OF EARTHWORK

After the earthwork operations have been completed and the Soil Engineer has finished his observation of the work, no further earthwork operations shall be performed except with the approval of and under the observation of the Soil Engineer.

It shall be the responsibility of the Contractor to prevent erosion of freshly graded areas during construction and until such time as permanent drainage and erosion control measures have been installed.

Chief Building Inspector
Building Department
City of Menlo Park
Menlo Park, California 94025

Re: Geologist Plan Check Comments (6/13/79)
American Hardware Mutual Insurance Company
68 Willow Road, Menlo Park

Dear Mr. Peterson:

Please find enclosed a letter dated June 22, 1979 from Peter Kaldveer and Associates, Inc. in response to items 1, 3, 5, 6 of the referenced plan check comments. We will comply with all recommendations as described in this letter.

In addition, the following are in response to plan check items 2 and 4.

2. Revise specifications section 28 - Earthwork, paragraph (6)G to read:

> "Degree of Compaction is the ratio of the in-place dry density of the constructed fill to the maximum dry density determined by laboratory compaction test specified below."

4. All references in the specifications which require soils engineer approval and read "... approved by the soil engineer or architect...", delete "or architect". Specifically revise specification section 28 - Earthwork, paragraph (14)G to read:

> "All areas which are to receive fill materials shall be approved by the Soil Engineer prior to placing any fill materials. Such requirements may be omitted only when approved in writing by the Soil Engineer."

Sincerely,

JAMES W. FOUG AND ASSOCIATES

Attention: Mr. Larry Phelan

RE: SUPPLEMENTAL RECOMMENDATIONS
ADDITIONS TO AMERICAN
HARDWARE MUTUAL INSURANCE
COMPANY BUILDING
MENLO PARK, CALIFORNIA

Gentlemen:

This letter is in response to the letter from Mr. Larry Phelan of your office, dated June 15, 1979, concerning the comments submitted to you by the City of Menlo Park subsequent to their plan check at the subject project. Our firm previously performed a foundation investigation for the project and the results were presented in our report titled "Foundation Investigation, Additions to American Mutual Insurance Company Building, Menlo Park, California", dated May 25, 1979.

We have evaluated the comments as requested and the following additional information is meant to supplement our original report. Our response is keyed to the items as delineated by Mr. Bob Peterson, Chief Building Inspector, City of Menlo Park, and are as follows:

1. In our report we recommend that ASTM method D 1557-70, be used for laboratory compaction tests. It is true, this method employs a higher compaction effort than Cal. Method No. 216 F, however, when non-cohesive, granular soil such as clean sands are tested, it is our opinion that the 216F method is preferable because the compaction mold apparatus confines the sand during the compacting providing a more accurate result.

   We recommend, that all laboratory compaction tests be performed using the ASTM method unless the California Method is specifically requested by the soil engineer.

2. In our opinion it is not sufficient to define materials for use as fill, using classification symbols as presented in ASTM Method D 2487-69. Specifically in section 6J, clayey gravel (GC) is defined as suitable material, however, this type material is capable of having a high

plasticity index due to its clay content and consequently may be highly expansive and unsuitable for use as fill material.

In our report on page 4, paragraph 3, we present our recommendations for both onsite and import fill materials. We recommend that paragraph 6J, 6K and 6L of section 2B page 2 of the specifications be deleted and replaced with our recommendations. In addition, all fill materials should be approved by the soil engineer.

5. In our report on page 4, paragraph 5, we state that import sand may be used as trench backfill in lieu of using onsite clayey soils. In our opinion, "plugs" of onsite clayey soil should be placed the full depth of trenches' adjacent areas such as landscape planters where water infiltration is possible. We also recommend that a one foot cap of onsite soils be placed over these trenches to prevent surface water infiltration.

   We have reviewed the applicable foundation details in regards to the coarse rock placed adjacent to the footings. In our opinion the minimum footing depth should remain 18 inches as recommended in our original report.

6. It is our understanding that the retaining walls in question are to be unrestrained and on the order of 2 to 3 feet in maximum height. These walls should be backfilled with non-expansive predominantly granular fill which has a plasticity index of 12 or less.

   We recommend that retaining walls be designed to resist an equivalent fluid pressure of 35 pounds per cubic foot. Backfill placed behind the wall should be compacted to at least 90 percent relative compaction using light compaction equipment. The preceding pressure assumes sufficient drainage behind the walls to prevent the build-up of hydrostatic pressures from surface water infiltration and/or a rise in the groundwater level. Adequate drainage should be provided by means of a subdrain consisting of a 4-inch diameter perforated pipe embedded in Class 2 permeable material. The drainage system used should be designed to flow into a suitable discharge facility. Retaining walls can be supported on drilled pier foundations. Lateral loads may be resisted by a passive resistance equal to an equivalent fluid weight of 350 pounds per cubic foot acting against a projected area equal to twice the diameter of individual drilled pier shafts. Vertical loads may be resisted using an allowable skin friction of 500 pounds per square foot for dead plus live loads with a one-third increase for all loads including seismic.

   The bottoms of pier excavations should be dry and free of all loose cuttings and soil fall-in prior to placing concrete. Any accumulated water in pier excavations should be removed prior to placing concrete.

If you have any questions, please call our office.

Very truly yours,

File No. 5766-S3
January 20, 2007

Vance Brown Builders
3197 Park Boulevard
Palo Alto, CA 94306

Attention: Mr. Mike Becker

Subject: Proposed Renovations
Existing Building
68 Willow Road
Menlo Park, California
PAVEMENT DESIGN

Dear Mr. Becker:

We are pleased to transmit herein the results of our pavement design for the proposed renovations. The subject site is the existing building located at 68 Willow Road in Menlo Park, California (Figure 1).

PROJECT DESCRIPTION

1. At the time of our investigation on January 18, 2007, the site was relatively flat parcel of land, occupied by an existing building, parking area, hardscape and heritage trees. Based on the preliminary plan for the subject site, the development will include new hardscape and renovation of the parking area. Location of the development and soil sample are shown on the Figure 2 – Site Plan.

FLEXIBLE PAVEMENT DESIGN

2. Due to the uniformity of the near-surface soil at the site, one R-Value Test was performed on a representative bulk sample. The result of the R-Value test is enclosed in this report. The following alternate sections are based on our laboratory resistance R-Value test of near-surface soil samples and traffic indices (T.I.) of 4.5 for parking stalls and 5.5 for driveway, light truck traffic. Alternate pavement section designs which satisfy the State of California Standard Design Criteria, and above traffic indices are presented in Table I.

RIGID PAVEMENT DESIGN

3. Based on the laboratory test results of the subgrade soil at the site (Coefficient of Subgrade Reaction, k = 80 p.c.i.). The concrete should have expansion joint spacing at a minimum of 10 feet for the patio areas and 5 feet for walkways in both longitudinal and transverse direction. The concrete should be reinforced with minimum #3 rebars spacing at 18 inches on center. Rigid pavement design sections are presented in Table II.

GRADING

4. The placement of fill and control of any grading operations at the site should be performed in accordance with the recommendations of this report. These recommendations set forth the minimum standards to satisfy other requirements of this report.

5. All existing surface and subsurface structures, if any, that will not be incorporated in the final development shall be removed from the project site prior to any grading operations. These objects should be accurately located on the grading plans to assist the field engineer in establishing proper control over their removal.

6. The depressions left by the removal of subsurface structures should be cleaned of all debris, backfilled and compacted with clean, native soil. This backfill must be engineered fill and should be conducted under the supervision of a USE representative.

7. All organic surface material and debris, including grass and weeds shall be stripped prior to any other grading operations, and transported away from all areas that are to receive structures or structural fills. Soil containing organic material may be stockpiled for later use in landscaping areas only.

8. After removing all the subsurface structures, if any, asphalt concrete, concrete, or baserock layer, the native soil should be scarified by machine to a depth of 12 inches for the parking area and 6 inches for the hardscape area. These areas should be thoroughly cleaned of vegetation and other deleterious matter. However, subgrade area located in the heritage tree canopy should not be ripped or scarified.

9. After stripping, scarifying and cleaning operations, native soil should be re-compacted to not less than 90% relative maximum density using ASTM D1557-91 procedure over the entire parking area.

10. All engineered fill or imported soil should be placed in uniform horizontal lifts of not more than 6 to 8 inches in un-compacted thickness, and compacted to not less than 90% relative maximum density using ASTM

D1557-91 procedure. This should extend a minimum of 3 feet beyond the perimeter of the parking area. The baserock, however, should be compacted to not less than 95% relative maximum density. Before compaction begins, the fill shall be brought to a water content that will permit proper compaction by either; 1) aerating the material if it is too wet, or 2) spraying the material with water if it is too dry. Each lift shall be thoroughly mixed before compaction to assure a uniform distribution of water content.

11. When fill material includes rocks, nesting of rocks will not be allowed and all voids must be carefully filled by proper compaction. Rocks larger than 4 inches in diameter should not be used for the final 2 feet of the fill areas.

12. USE should be notified at least two days prior to commencement of any grading operations so that our office may coordinate the work in the field with the contractor. All imported borrow must be approved by USE before being brought to the site. Import soil must have a plasticity index no greater than 12 and an R-Value greater than 25. The fill material in the parking area can include recycled asphalt concrete and/or crushed concrete, provided the recycled material contains at least 30% of fine passing the # 4 sieve.

13. All grading work shall be observed and approved by a representative from USE. The geotechnical engineer shall prepare a final report upon completion of the grading operations.

WATER WELLS

14. Any water wells and/or monitoring wells on the site which are to be abandoned, shall be capped according to the requirements of the San Mateo County Department of Health Services. The final elevation of the top of the well casing must be a minimum of 3 feet below the adjacent grade prior to any grading operation.

EXCAVATION

15. No difficulties due to soil conditions are anticipated in excavating the on-site material. Conventional earth moving equipment will be adequate for this project.

16. Any vertical cuts deeper than 5 feet must be properly shored. The minimum cut slope for excavation to the desired elevation is one horizontal to one vertical. The cut slope should be increased to 2:1 if the excavation is conducted during the rainy season or when the soil is highly saturated with water.

ON-SITE UTILITY TRENCHING

17. All on-site utility trenches must be backfilled with native on-site material or imported fill and compacted to at least 90% relative maximum density in accordance with ASTM D1557-91. Backfill should be placed in 6 to 8 inch lifts and compacted. Jetting of trench backfill is not recommended. An engineer from our firm should be notified at least 48 hours before the start of any utility trench backfilling operations.

18. The utility trenches running parallel to building/structure foundation, if any, should not be located in the building foundation influence zone.

19. If utility trench excavation is to encounter groundwater or seepage water, our office should be notified for dewatering recommendations.

DRAINAGE

20. It is considered essential that positive drainage be provided during construction and be maintained throughout the life of the proposed development.

21. Surface drainage should flow away from any building structure.

22. Consideration should be given to collection and diversion of runoff and the elimination of planted areas or other surfaces, which could retain water in areas adjacent to the existing building or parking area.

LIMITATIONS AND UNIFORMITY OF CONDITIONS

1. The recommendations presented herein are based on the soil conditions revealed by our test borings and evaluated for the proposed construction planned at the present time. If any unusual soil conditions are encountered during the construction, or if the proposed construction will differ from that planned at the present time, United Soil Engineering, Inc. should be notified for supplemental recommendations.

2. This report is issued with the understanding that it is the responsibility of the owner, or his representative, to ensure that the necessary steps are taken to see that the contractor carries out the recommendations of this report in the field.

3. The findings of this report are valid, as of the present time. However, the passing of time will change the conditions of the existing property due to natural processes, works of man, from legislation or the broadening of

knowledge. Therefore, this report is subjected to review and should not be relied upon after a period of three years.

4. The conclusions and recommendations presented in this report are professional opinions derived from current standards of geotechnical practice and no warranty is intended, expressed, or implied.

5. This report has been prepared solely for the purpose of a pavement design and no toxic contamination studies have been performed by our firm.

If you have any questions or require additional information, please feel free to contact our office at your convenience.

Very truly yours,

NEGATIVE DECLARATION

Project Description and Location: An addition to the existing building located at 68 Willow Road.

Finding and Basis for a Negative Declaration:

The Community Development Department has reviewed the Initial Study for the project and finds the following:

1. The project will not adversely affect water or air quality or increase noise levels substantially.
2. The project will not have adverse impacts on the flora or fauna of the area.
3. The project will not degrade the aesthetic quality of the area.
4. The project will not have adverse impacts on traffic or land use.
5. In addition, the project will not:
   a. Create impacts which have the potential to degrade the quality of the environment.
   b. Create impacts which achieve short-term to the disadvantage of long-term environmental goals.
   c. Create impacts which are individually limited, but cumulatively considerable.
   d. Create environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly.

It may therefore be determined that the potential environmental impact of the project will be insignificant.

Initial Study:

Copy of the Initial Study on which the findings for a Negative Declaration have been based is attached.

Review Period: November 7, 1978 - November 20, 1978

All comments on this Negative Declaration should be submitted in writing to the Department of Community Development no later than 5:00 p.m. of November 20, 1978.

California Environmental Quality Act:

This Negative Declaration has been prepared in accordance with the California Environmental Quality Act of 1970 and its applicable guidelines, as amended.

STAFF REPORT

MENLO PARK

Department of Community Development

Planning Division

DIMENSIONS/AREA: 2.4 acres ±

APPLICANT: American Hardware Mutual Insurance Co.

EXISTING USE: Insurance Office

APPLICATION FOR: Use Permit and Architectural Control

PROPOSED USE: Same

ZONING: C-1

LOCATION: 68 Willow Road

PROPOSAL:

The proposal is to add 6,800 ± of floor space to the existing office building located at the above address. Accordingly, the applicant is requesting Planning Commission approval of a Use Permit to allow the proposed expansion and Architectural Control approval of the plans for the new construction.

PROJECT DETAILS:

The major portion of the proposed improvements will occur at the front of the property. The proposed addition has been designed to match the architectural style of existing building.

Presently there are 85 on-site parking spaces. The expanded facilities will require 118 on-site parking spaces.

Existing building coverage is 16.5%. The new addition will increase building coverage to 22%. Forty percent is the maximum allowed in the C-1 Zoning District.

Presently, there are approximately 100 employees at these facilities. It is projected that with the added floor area this figure could rise to 120 employees.

ANALYSIS:

The proppsed addition will come within approximately 52 feet from the Willow Road frontage. Presently the existing building is set back approximately

100 feet, and the front yard is appropriately landscaped. However, the proposed addition will displace a considerable amount of the existing landscaping.

The projection of the new construction into the front yard and the removal of the mature landscaping will make the expanded facilities highly visible from Willow Road area. This visual impact may be mitigated by the addition of appropriate landscaping to complement the building.

In order to meet the parking requirements, some of the parking spaces would have to be developed at the front of the property. Field observations indicate that most of the existing parking is utilized, so additional parking should be provided. However, it would seem that sufficient additonal parking could be provided at the rear and the parking spaces proposed at the front of the property could be retained in landscaping until they are needed.

The applicant's representative has indicated that he has investigated the sewer capacity needs for the expanded facilities and that it appears that no additional sewer capacity would be necessary to serve the project.

RECOMMENDATIONS:

Recommend as follows:

1) Direct the Staff to file a Negative Declaration.

2) Approve the Use Permit and Architectural Control application subject to the following conditions:

   a) Develop additional parking to conform with the Zoning Ordinance.

   b) Submit a detail landscaping plan for Staff approval.

   c) Submit grading plan for City Engineer approval.

PROPOSAL

The applicant constructed a temporary storage shed in the parking lot at the rear of the their existing office building located in the C-1 Zoning District at 68 Willow Road. The applicant was unaware that a use permit is required to have a temporary storage shed in the C-1 District. They are now requesting use permit approval from the Planning Commission to allow the temporary storage shed to remain.

BACKGROUND

A use permit was approved by the Planning Commission on January 31, 1955 to allow construction of an office building for executive offices On November 20, 1978 the Planning Commission approved use permit and architectural control requests that allowed the existing office building to be expanded. At that time, the Planning Commission permitted 24 off-street parking spaces to be placed into landscape reserve, to be developed if needed in the future.

The building was occupied in 1978 by an insurance company with approximately 100-120 employees. The building is presently occupied by Price Waterhouse and has 63 employees on the premises.

ANALYSIS

The tenant, Price Waterhouse, has constructed a temporary storage shed in the rear parking lot to store office furniture.

The propose storage shed is located at the rear southeast corner of the parking lot behind the existing building. The storage shed is 450 square feet in size and 10 feet high It has a sloped flat roof and is constructed of T&G plywood painted to match the color of the exterior of the existing building. The storage shed will require building Division review and approval.

Three existing off-street parking spaces have been displaced by the construction of the storage shed. There were 81 parking spaces in the parking lot that serves the subject property. Construction of the storage shed has reduced the number of off-street parking spaces to 78.

The proposed 78 off-street parking spaces will be adequate to serve the 63 employees occupying the building. If there is an additional need for more off-street parking, the 24 spaces in landscape reserve can be developed. The area being held in landscape reserve is adjacent to the south side of the building along the Willow Place street frontage.

COMMENTS

Allowing the temporary storage shed for a period of five years should not be a problem provided all of the requirements of the Building and Engineering Division are complied with.

CEQA–ENVIRONMENTAL REVIEW

The project is exempt under Class 1 of the current State CEQA Guidelines and the City of Menlo Park's Environmental Review and Implementing Procedures.

RECOMMENDATION

Grant the temporary use permit to allow the storage shed for a period of five years subject to the following:

1 Make the finding that the project is exempt under Class 1 of the current State CEQA Guidelines and the City of Menlo Park's Environmental Review and Implementing Procedures

2. Make findings, as per Section 16.82.030 of the Zoning Ordinance pertaining to the granting of use permits, that the proposed use will not be detrimental to the health, safety, morals, comfort and general welfare of the persons residing or working in the neighborhood of such proposed use, and will not be detrimental to property and improvements in the neighborhood or the general welfare of the City

3. The applicant shall comply with all requirements of the Building Division and Engineering Division that are directly applicable to the new construction.

4. All businesses operating within the City of Menlo Park are required to have a current City business license. This includes contractors and construction companies working to improve the property, as well as businesses occupying the finished space.

GENERAL CONDITIONS TO THE WORK AUTHORIZATION AGREEMENT

It is hereby agreed that the Client retains AllWest to provide services as set forth in the Work Authorization attached hereto (the "Work"). This contract shall be controlled by the following terms and conditions, and these terms and conditions shall also control any further assignments performed pursuant to this Work Authorization. Client's signature on this Work Authorization constitutes Client's agreement to the all terms to this contract, including these General Conditions.

FEES AND COSTS

1. AllWest shall charge for work performed by its personnel at the rates identified in the Work Authorization. These rates are subject to reasonable increases by AllWest upon giving Client 30 days advance notice. Reimbursable Costs will be charged to the Client in addition to the fees for the basic services under this Agreement and all Additional Services (defined below) under the Agreement. Reimbursable Costs include, but are not limited to, expenses for travel, including transportation, meals, lodging, long distance telephone and other related expenses, as well as the costs of reproduction of all drawings for the Client's use, costs for specifications and type-written reports, permit and approval fees, automobile travel reimbursement, costs and fees of subcontractors, and soil and other materials testing. No overtime is accrued for time spent in travel. All costs incurred which relate to the services or materials provided by a contractor or subcontractor to AllWest shall be invoiced by AllWest on the basis of cost plus twenty percent (20%). Automobile travel reimbursement shall be at the rate of fifty- eight cents ($0.58) per mile. All other reimbursable costs shall be invoiced and billed by AllWest at the rate of 1.1 times the direct cost to AllWest. Reimbursable costs will be charged to the client only as outlined in the Work Authorization if the scope of work is for Phase I Environmental Site Assessment, Property Condition Assessment, Seismic Assessment or ALTA survey. Invoices for work performed shall be submitted monthly. Payment will be due upon receipt of invoice. Client shall pay interest on the balance of unpaid invoices which are overdue by more than 30 days, at a rate of 18% per annum as well as all attorney fees and costs incurred by AllWest to secure payment of unpaid invoices. AllWest may waive such fees at its sole discretion.

STANDARD OF CARE

2. AllWest will perform its work in accordance with the standard of care of its industry, as it is at the time of the work being performed, and applicable in the locale of the work being performed. AllWest makes no other warranties, express or implied regarding its work.

LIMITATION OF REMEDIES

3. Client expressly agrees that to the fullest extent permitted by law, Client's remedies for any liability incurred by AllWest, and/or its employees or agents, for any and all claims arising from AllWest's services, shall be $50,000 or its fees, whichever is greater.

Client may request a higher limitation of remedies, but must do so in writing. Upon such written request, AllWest may agree to increase this limit in exchange for a mutually negotiated higher fee commensurate with the increased risk to AllWest. Any such agreed increase in fee and limitation of remedies amount must be memorialized by written agreement which expressly amends the terms of this clause.

As used in this section, the term "limitation of remedies" shall apply to claims of any kind, including, but not limited to, claims brought in contract, tort, strict liability, or otherwise, for any and all injuries, claims, losses, expenses, or damages whatsoever arising out of or in any way related to AllWest's services or the services of AllWest's subcontractors, consultants, agents, officers, directors, and employees from any cause(s). AllWest shall not be liable for any claims of loss of profits or any other indirect, incidental, or consequential damages of any nature whatsoever. Client & AllWest have specifically negotiated this limitation.

INDEMNIFICATION

4. Notwithstanding any other provision of this Agreement, Client agrees, to the fullest extent permitted by law, to waive any claim against, release from any liability or responsibility for, and , indemnify and hold harmless AllWest, its employees, agents and sub-consultants (collectively, Consultant) from and against any and all damages, liabilities, claims, actions or costs of any kind, including reasonable attorney's fees and defense costs, arising or alleged to arise out of or to be in any way connected with the Project or the performance or non-performance of Consultant of any services under this Agreement, excepting only any such liabilities determined by a court or other forum of competent jurisdiction to have been caused by the negligence or willful misconduct of Consultant. This provision shall be in addition to any rights of indemnity that Consultant may have under the law and shall survive and remain in effect following the termination of this Agreement for any reason. Should any part of this provision be determined to be unenforceable, AllWest and Client agree that the rest of the provision shall apply to the maximum extent permitted by law. The Client's duty to defend AllWest shall arise immediately upon tender of any matter potentially covered by the above obligations to indemnify and hold harmless.

MEDIATION & JUDICIAL REFERENCE

5. In an effort to resolve any conflicts or disputes that arise regarding the performance of this agreement, the Client & AllWest agree that all such disputes shall be submitted to non-binding mediation, using a mutually agreed upon mediation service experienced in the resolution of construction disputes. Unless the parties mutually agree otherwise, such mediation shall be a condition precedent to the initiation of any other adjudicative proceedings. It is further agreed that any dispute that is not settled pursuant to such mediation shall be adjudicated by a court appointed referee in accordance with the Judicial Reference procedures as set forth in California Code of Civil Procedure Section 638 et seq. The parties hereby mutually agree to waive any right to a trial by jury regarding any dispute arising out of this agreement.

The parties further agree to include a similar mediation, Judicial Reference & waiver of jury trial provision in their agreements with other independent contractors & consultants retained for the project and require them to similarly agree to these dispute resolution procedures. The cost of said Mediation shall be split equally between the parties. This agreement to mediate shall be specifically enforceable under the prevailing law of the jurisdiction in which this agreement was signed.

HAZARDOUS WASTE

6. Client acknowledges that AllWest and its sub-contractors have played no part in the creation of any hazardous waste, pollution sources, nuisance, or chemical or industrial disposal problem, which may exist, and that AllWest has been retained for the sole purpose of performing the services set out in the scope of work within this Agreement, which may include, but is not necessarily limited to such services as assisting the Client in assessing any problem which may exist and in assisting the

Client in formulating a remedial program. Client acknowledges that while necessary for investigations, commonly used exploration methods employed by AllWest may penetrate through contaminated materials and serve as a connecting passageway between the contaminated material and an uncontaminated aquifer or groundwater, possibly inducing cross contamination. While back-filling with grout or other means, according to a state of practice design is intended to provide a seal against such passageway, it is recognized that such a seal may be imperfect and that there is an inherent risk in drilling borings of performing other exploration methods in a hazardous waste site.

AllWest will not sign or execute hazardous waste manifests or other waste tracking documents on behalf of Client unless Client specifically establishes AllWest as an express agent of Client under a written agency agreement approved by AllWest. In addition, Client agrees that AllWest shall not be required to sign any documents, no matter requested by whom, that would have the effect of AllWest providing any form of certification, guarantee, or warranty as to any matter or to opine on conditions for which the existence AllWest cannot ascertain. Client also agrees that it shall never seek or otherwise attempt to have AllWest provide any form of such certification, guarantee or warranty in exchange for resolution of any disputes between Client and AllWest, or as a condition precedent to making payment to AllWest for fees and costs owing under this Agreement.

Client understands and agrees that AllWest is not, and has no responsibility as, a generator, operator, treater, storer, transporter , arranger or disposer of hazardous or toxic substances found or identified at the site, including investigation-derived waste. The Client shall undertake and arrange for the removal, treatment, storage, disposal and/or treatment of hazardous material and investigation derived waste (such as drill cuttings) and further, assumes full responsibility for such wastes to the complete exclusion of any responsibility, duty or obligation upon AllWest. AllWest's responsibilities shall be limited to recommendations regarding such matters and assistance with appropriate arrangements if authorized by Client.

FORCE MAJUERE

7. Neither party shall be responsible for damages or delays in performance under this Agreement caused by acts of God, strikes, lockouts, accidents or other events or condition (other than financial inability) beyond the other Party's reasonable control.

TERMINATION

8. This Agreement may be terminated by either party upon ten (10) days' written notice should the other party substantially fail to perform in accordance with its duties and responsibilities as set forth in this Agreement and such failure to perform is through no fault of the party initiating the termination. Client agrees that if it chooses to terminate AllWest for convenience, and AllWest has otherwise satisfactorily performed its obligations under this Agreement to that point, AllWest shall be paid no less than eighty percent (80%) of the contract price, provided, however, that if AllWest shall have completed more than eighty percent of the Work at the time of said termination, AllWest shall be compensated as provided in the Work Authorization for all services performed prior to the termination date which fall within the scope of work described in the Work Authorization and may as well, at its sole discretion and in accordance with said Schedule of Fees, charge Client, and Client agrees to pay AllWest's reasonable costs and labor in winding up its files and removing equipment and other materials from the Project.

Upon notice of termination by Client to AllWest, AllWest may issue notice of such termination to other consultants, contractors, subcontractors and to governing agencies having jurisdiction over the Project, and take such other actions as are reasonably necessary in order to give notice that AllWest is no longer associated with the Project and to protect AllWest from claims of liability from the work of others.

DOCUMENTS

9. Any documents prepared by AllWest, including, but not limited to proposals, project specifications, drawings, calculations, plans and maps, and any ideas and designs incorporated therein, as well as any reproduction of the above are instruments of service and shall remain the property of AllWest and AllWest retains copyrights to these instruments of service. AllWest grants to Client a non-exclusive license to use these instruments of service for the purpose of completing and maintaining the Project. The Client shall be permitted to retain a copy of any instruments of service, but Client expressly agrees and acknowledges that the instruments of service may not be used by the Client on other projects, or for any other purpose, except the project for which they were prepared, unless Client first obtains a written agreement expanding the license to such use from AllWest, and with appropriate compensation to AllWest. Client further agrees that such instruments of service shall not be provided to any third parties without the express written permission of AllWest.

Client shall furnish, or cause to be furnished to AllWest all documents and information known to Client that relate to the identity, location, quantity, nature, or characteristics of any asbestos, PCBs, or any other hazardous materials or waste at, on or under the site. In addition, Client will furnish or cause to be furnished such reports, data, studies, plans, specifications, documents and other information on surface or subsurface site conditions, e.g., underground tanks, pipelines and buried utilities, required by AllWest for proper performance of its services. IF Client fails to provide AllWest with all hazardous material subject matter reports including geotechnical assessments in its possession during the period that AllWest is actively providing its services (including up to 30 days after its final invoice), Client shall release AllWest from any and all liability for risks and damages the Client incurs resulting from its reliance on AllWest's professional opinion. AllWest shall be entitled to rely upon Client - provided documents and information in performing the services required in this Agreement; however, AllWest assumes no responsibility or liability for the accuracy or completeness of Client-provided documents. Client-provided documents will remain the property of the Client.

ACCESS TO PROJECT

10. Client grants to AllWest the right of access and entry to the Project at all times necessary for AllWest to perform the Work. If Client is not the owner of the Project, then Client represents that Client has full authority to grant access and right of entry to AllWest for the purpose of AllWest's performance of the Work. This right of access and entry extends fully to any agents, employees, contractors or subcontractors of AllWest upon reasonable proof of association with AllWest. Client's failure to provide such timely access and permission shall constitute a material breach of this Agreement excusing AllWest from performance of its duties under this Agreement.

CONFIDENTIAL INFORMATION

11. Both Client and AllWest understand that in conjunction with AllWest's performance of the Work on the project, both Client and AllWest may receive or be exposed to Proprietary Information of the other. As used herein, the term "Proprietary Information" refers to any and all information of a confidential, proprietary or secret nature which may be either applicable to, or relate in any way to: (a) the personal, financial or other affairs of the business of each of the Parties, or (b) the

research and development or investigations of each of the Parties. Proprietary Information includes, for example and without limitation, trade secrets, processes, formulas, data, know-how, improvements, inventions, techniques, software technical data, developments, research projects, plans for future development, marketing plans and strategies. Each of the Parties agrees that all Proprietary Information of the other party is and shall remain exclusively the property of that other party. The parties further acknowledge that the Proprietary Information of the other party is a special, valuable and unique asset of that party, and each of the Parties agrees that at all times during the terms of this Agreement and thereafter to keep in confidence and trust all Proprietary Information of the other party, whether such Proprietary Information was obtained or developed by the other party before, during or after the term of this Agreement. Each of the Parties agrees not to sell, distribute, disclose or use in any other unauthorized manner the Proprietary Information of the other party. AllWest further agrees that it will not sell, distribute or disclose information or the results of any testing obtained by AllWest during the performance of the Work without the prior written approval of Client unless required to do so by federal, state or local statute, ordinance or regulation.

INDEPENDENT CONTRACTOR

12. Both Client and AllWest agree that AllWest is an independent contractor in the performance of the Work under this Agreement. All persons or parties employed by AllWest in connection with the Work are the agents, employees or subcontractors of AllWest and not of Client. Accordingly, AllWest shall be responsible for payment of all taxes arising out of AllWest's activities in performing the Work under this Agreement.

ENTIRE AGREEMENT

13. This Agreement contains the entire agreement between the Parties pertaining to the subject matter contained in it and supersedes and replaces in its entirety all prior and contemporaneous proposals, agreements, representations and understandings of the Parties. The Parties have carefully read and understand the contents of this Agreement and sign their names to the same as their own free act.

INTEGRATION

14. This is a fully integrated Agreement. The terms of this Agreement may be modified only by a writing signed by both Parties. The terms of this Agreement were fully negotiated by the Parties and shall not be construed for or against the Client or AllWest but shall be interpreted in accordance with the general meaning of the language in an effort to reach the intended result.

MODIFICATION / WAIVER / PARTIAL INVALIDITY

15. Failure on the part of either party to complain of any act or omission of the other, or to declare the other party in default, shall not constitute a waiver by such party of its rights hereunder. If any provision of this Agreement or its application be unenforceable to any extent, the Parties agree that the remainder of this Agreement shall not be affected and shall be enforced to the greatest extent permitted by law.

INUREMENT / TITLES

16. Subject to any restrictions on transfers, assignments and encumbrances set forth herein, this Agreement shall inure to the benefit of and be binding upon the undersigned Parties and their respective heirs, executors, legal representatives, successors and assigns. Paragraph titles or captions contained in this Agreement are inserted only as a matter of convenience, and for reference only, and in no way limit, define or extend the provisions of any paragraph. , et al., incurred in that action or proceeding, in addition to any other relief to which it or they may be entitled.

AUTHORITY

17. Each of the persons executing this Agreement on behalf of a corporation does hereby covenant and warrant that the corporation is duly authorized and existing under the laws of its respective state of incorporation, that the corporation has and is qualified to do business in its respective state of incorporation, that the corporation has the full right and authority to enter into this Agreement, and that each person signing on behalf of the corporation is authorized to do so. If the Client is a joint venture, limited liability company or a partnership, the signatories below warrant that said entity is properly and duly organized and existing under the laws of the state of its formation and pursuant to the organizational and operating document of the entity, and the laws of the state of its formation, said signatory has authority act on behalf of and commit the entity to this Agreement.

COUNTERPARTS

18. This Agreement may be signed in counterparts by each of the Parties hereto and, taken together, the signed counterparts shall constitute a single document.

THIRD PARTY BENEFICIARIES / CONTROLLING LAW

19. There are no intended third party beneficiaries of this Agreement. The services, data & opinions expressed by AllWest are for the sole use of the client, are for a particular project and may not be relied upon by anyone other than the client. This Agreement shall be controlled by the laws of the State of California and any action by either party to enforce this Agreement shall be brought in San Francisco County, California.

TIME BAR TO LEGAL ACTION

20. Any legal actions by either party against the other related to this Agreement, shall be barred after one year has passed from the time the claimant knew or should have known of its claim, and under no circumstances shall be initiated after two years have passed from the date by which AllWest completes its services.

Public Records Request No. 2019-11-0064

Public Records <PublicRecords@baaqmd.gov>

Thu 11/7/2019 8:12 AM

To: Marc Hachey <marchachey@hotmail.com>

Dear Marc Hachey,

Thank you for your request. We have searched our records and have no records that respond to your below request for:

68 willow road
menlo park

If you have any questions or concerns, please call or e-mail me.

Sincerely,

Magnolia Vinluan-Chan for
Rochelle Henderson

Public Records Act Request :: P001440-110619

City of Menlo Park Public Records Center <menloparkca@mycusthelp.net>

Wed 11/6/2019 7:55 PM

To: marchachey@hotmail.com <marchachey@hotmail.com>

Dear Marc:

Thank you for your interest in public records of the City of Menlo Park. Your request has been received and is being processed. Your request was submitted to this office on 11/6/2019 and given the reference number P001440-110619 for tracking purposes.

If your request is received after business hours or on a weekend or holiday, the next business day will be considered the date of receipt. The 10-day response period starts with the first calendar day after the date of receipt. If the 10th day falls on a weekend or holiday, the next business day is considered the deadline for responding to the request.

Record Requested: Hello, I am doing an assessment of a property in Menlo Park, and I am hoping to get documents from the following departments for the site: - Fire Department - hazardous materials -Building Department - historical permits - Environmental Review Department The address is 68 Willow Road Thanks!

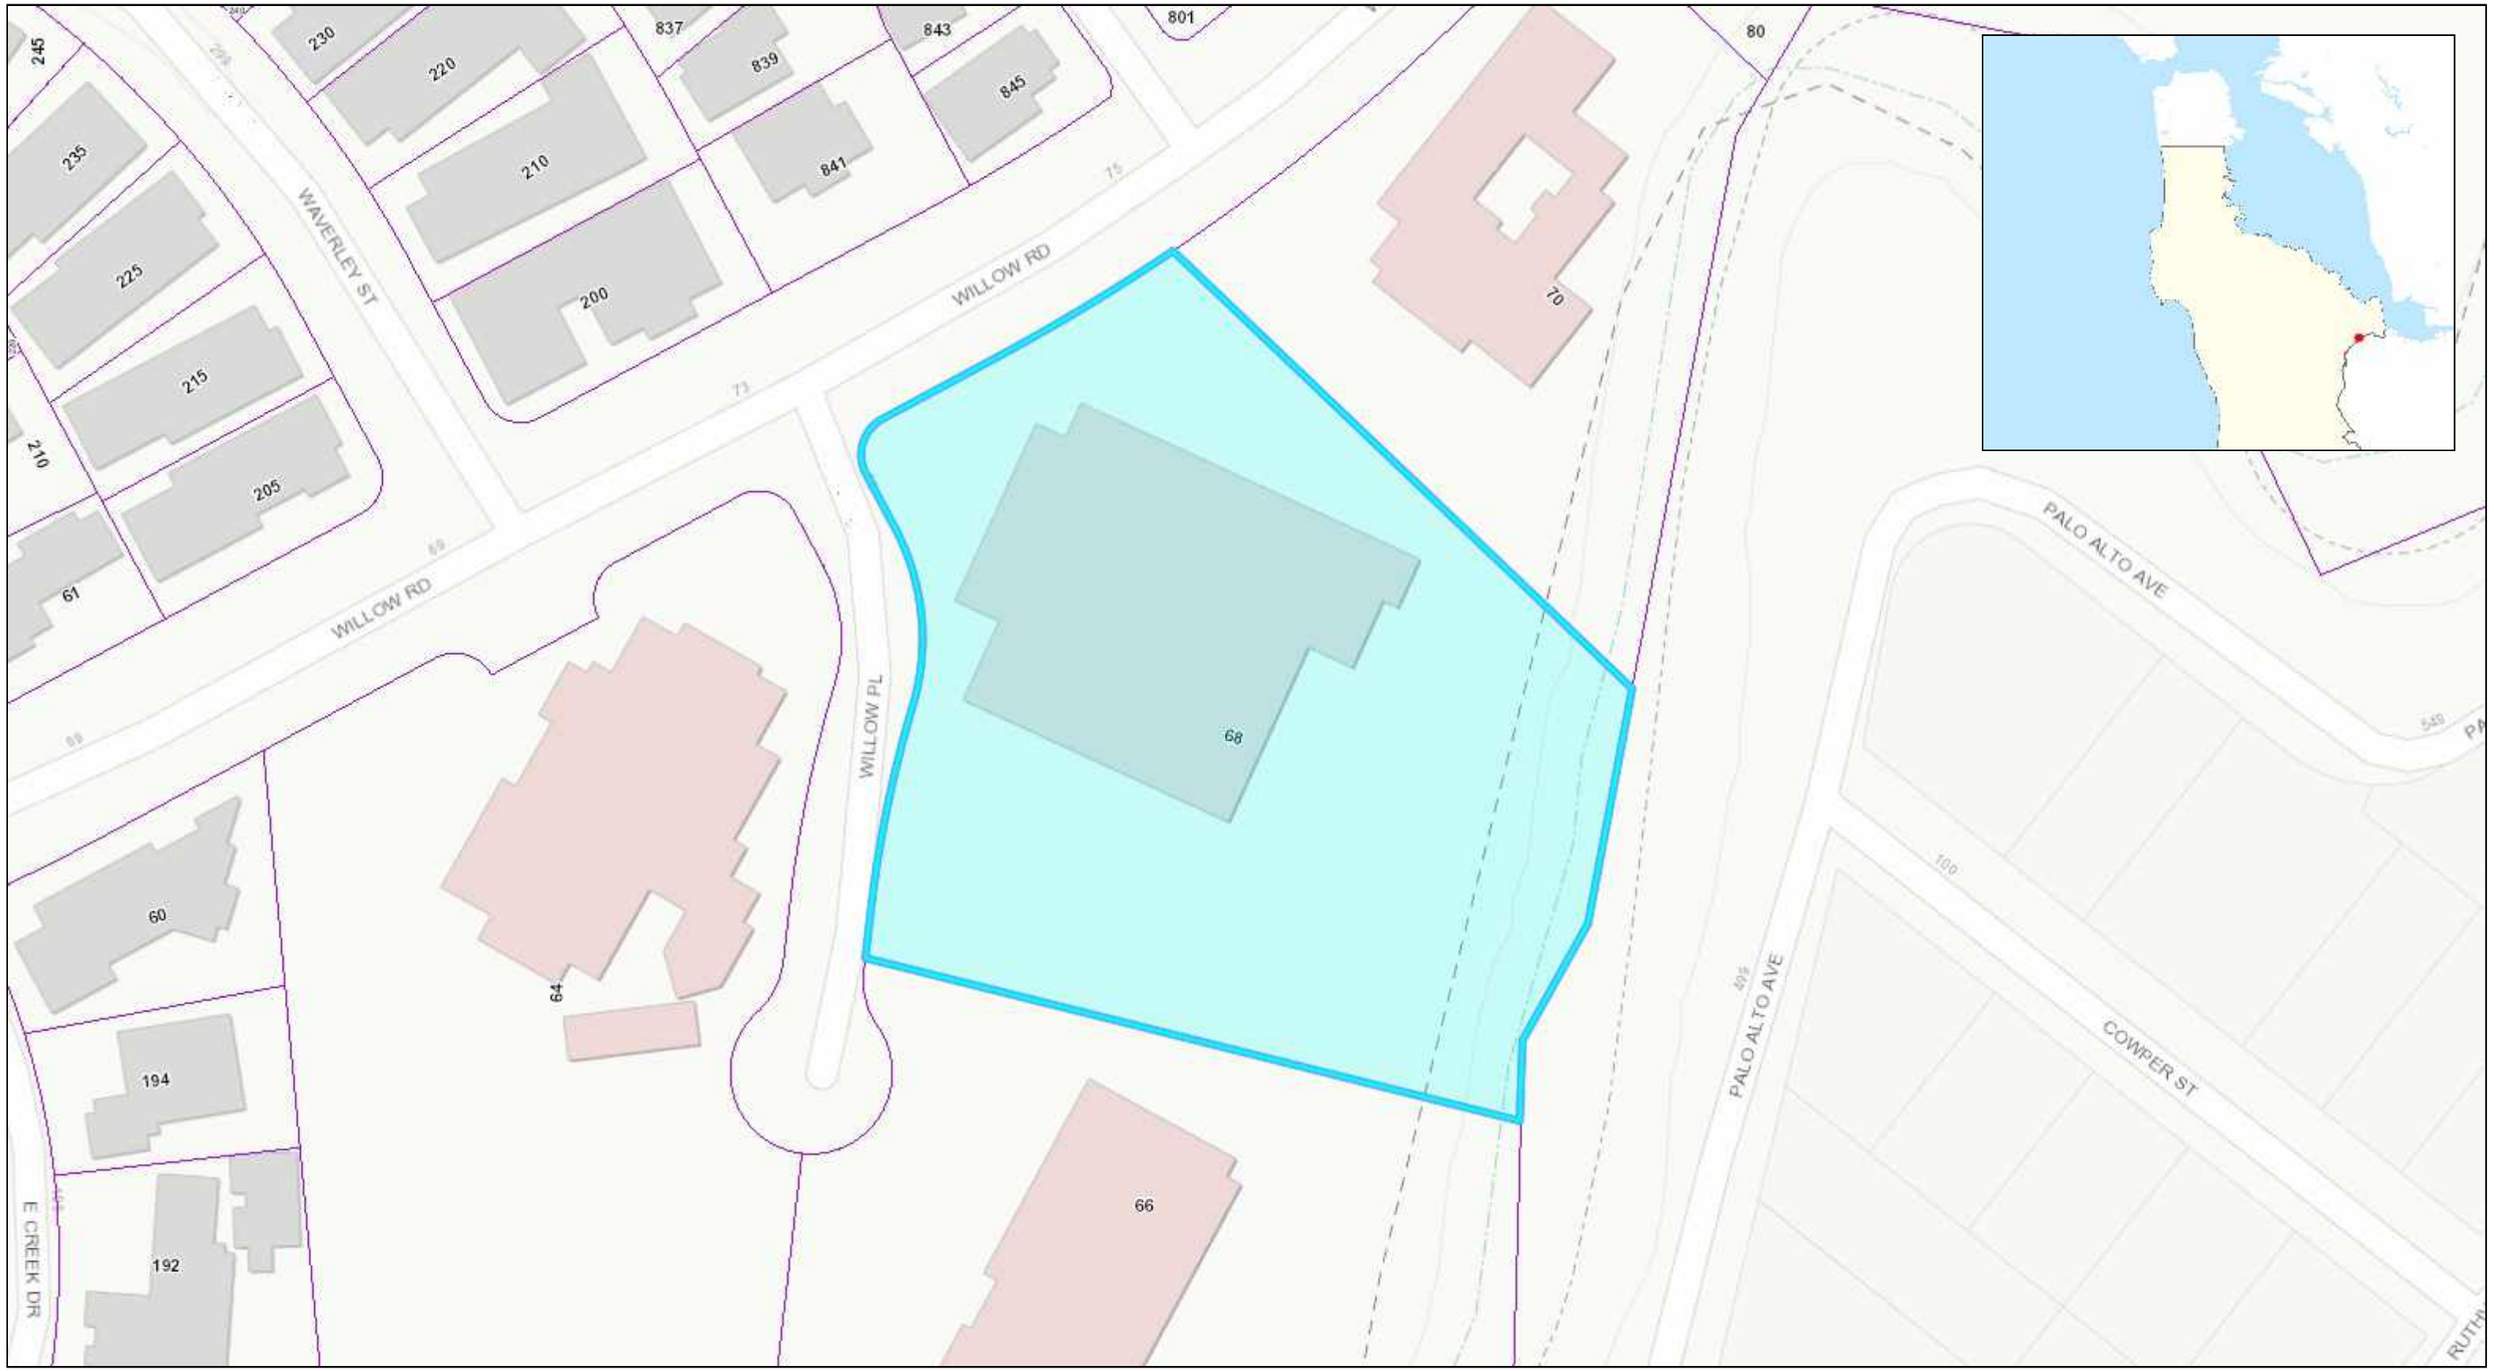

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the City of Menlo Park's Public Records Center.

City of Menlo Park

To track your request and respond, visit the **Public Records Center**, then click on "View My Public Records Requests."

APPENDIX G

QUALIFICATIONS

Steven H. Yekich – National Client Manager

B.S. – Earth Science, State University of New York at Brockport

AHERA Asbestos Inspector – The Environmental Institute

Annual 40 Hour HAZWOPER

Mr. Yekich has over 16 years of experience in the environmental consulting field and has performed ASTM Phase I-II Environmental Site Assessments (ESAs) and subsequent phases of investigation/cleanups for banks, Certified Development Companies (CDCs), private investment groups, private landowners and large commercial/industrial facilities throughout the United States. This work has included dozens of subsurface investigations of contaminated soil and/or groundwater and vapor intrusion, involving underground storage tanks, manufacturing facilities, and dry-cleaning facilities. Mr. Yekich worked for an in/ex-site chemical oxidation/reduction company which designed and implemented injections throughout the Southeast which involved the use of several chemical agents. In addition, Mr. Yekich has been a Senior Author for over 1500 ASTM Phase I's, Phase II's, Environmental Transaction Screens (ETS), and SBA Record Search's (RSRA).

Project experience for Mr. Yekich includes:

- **WOOD TREATING FACILITY, EAST POINT, GEORGIA**

  Mr. Yekich provided technical and field support associated with semi-annual monitoring of existing well network which included clustered shallow, intermediate, and deep wells along with assistance of RCRA Part B permitting for an operating wood treatment facility contaminated with pentachlorophenol (PCP), cresol, naphthalene, chlorinated solvents, and petroleum-type constituents. The facility was documented to contain several Solid Waste Management Units (SWMUs) along with Hazardous Waste Management Units (HWMUs), consisting of a former waste disposal pit and pressure vessel areas utilizing PCP. In addition, Mr. Yekich developed a sampling protocol following US EPA guidance documentation and implemented the sampling event using field staff, which was overseen by the Georgia Environmental Protection Division (GA EPD) personnel during sampling events. A semi-annual Corrective Action Report (CAR) was prepared and submitted to the Georgia Environmental Protection Division (GA EPD) using the data collected.

- **FORMER COTTON MILL,BUILDING RENOVATION & BROWNFIELD SITE, MONROE, GEORGIA**

  Mr. Yekich performed an extensive Phase I/II assessment followed by preparation of a Prospective Purchaser Corrective Action Plan (PPCAP) at a late-1800's cotton mill. Environmental concerns were identified through a review of historic Sanborn maps, aerials, and interviews and included former diesel ASTs, USTs, ruptured transformers, a cooling pit, and a dry pond previously used to dispose of coal ash. The assessment also identified the presence of asbestos containing piping throughout the facility. Mr. Yekich oversaw the abatement of damaged areas of the piping and prepared an Operation & Maintenance Plan for addressing materials left in-place. Extensive Phase II Site Investigations were performed on a "rush" basis to investigate the subsurface RECs. The results indicated the presence of several RCRA metals and PAHs in soils exceeding regulatory limits, particularly in the pond area due to coal ash layer. A Brownfield CAP was prepared and approved by the Georgia EPD along with a plan for additional assessment and eventual remedial action.

- **FORMER COMMERCIAL PRINTER, OAKWOOD, GEORGIA**

  Mr. Yekich provided technical and field support associated with a Phase I/II ESA prior to redevelopment into a Wal-Mart Supercenter. The Phase I ESA identified the mixing of paint along with raw materials located in underground storage tanks (USTs), which included both hazardous and petroleum-type substances. In addition, the facility was identified to have utilized two septic tank systems. Mr. Yekich installed 12 monitoring wells, which included Type II and II wells in order to delineate the horizontal and vertical extent of dissolved phase petroleum hydrocarbons, hazardous solvents, and RCRA Metals, associated with past printing operations, USTs, hazardous storage room, and septic tank systems. Contamination was confirmed resulted from the former operations released in soil and groundwater. Mr. Yekich also established site specific metal background concentration and also assisted in preparation of the Prospective Purchaser Corrective Action Plan (PPCAP) report which recommended Dig and Haul to remove the constituents of concern (COCs) to below the applicable Risk Reduction Standard (RRS).

- **FORMER SERVICE STATION, ATLANTA, GEORGIA**

  Mr. Yekich provided technical and field support associated with a Corrective Action Plan – Part "B", which included the installation of 5 monitoring well to further delineate the horizontal and vertical extent of Free Product and dissolved phase petroleum hydrocarbons in soil and groundwater. Mr. Yekich assisted in preparation of the CAP-B report which recommended In-site Chemical Oxidation (ISCO) to treat petroleum hydrocarbons.

- **MISCELLANEOUS ASSESSMENT/REMEDIATION PROJECTS**

  Mr. Yekich has extensive experience in subsurface soil and groundwater assessments and remediation in a variety of geologic/hydrogeologic provinces (Piedmont, Coast, Valley & Ridge, and Blue Ridge). His drilling assessment experience includes: direct-push technology (DPT), NQ rock coring, air-rotary, hollow-stem auger, and rotosonic drilling methods. Remediation methods utilized have included Chemical Oxidation/Reduction (ISCO/ISCR), both in-situ or ex-situ, Enhanced Bioremediation, Soil Vapor Extraction (SVE), Air-Sparging (AS), Dual-Phase Extraction (DPE) and other related technologies.

  Technical reports prepared by Mr. Yekich have included Phase I/II/III property assessments, CAP/CSRs, PPCAPs, Quarterly/Semi-Annual monitoring reports for UST/RCRA facilities, SPCC Plans, Storm Water Plans, Asbestos Survey Reports, and U.S. Army Corps of Engineers (USACE) Wetland Delineation/Permitting reports and permits.

- **AEROSPACE PARTS MANUFACTURER PORTFOLIO, THROUGHOUT THE U.S.**

  Mr. Yekich provided technical review support associated with eight (8) aerospace manufacturing facilities located throughout the United States for a large regional banking client. Several of the facilities dated back into the 1940s and 50s. The facilities manufactured aerospace parts which involved shaping, bending, grinding, sandblasting, and chemical etching. Several of the facilities utilized vapor degreasers, wastewater lagoons, vats/pits, and numerous hazardous solvents as part of their operations, which included trichloroethene (TCE), 1,1,1-trichloroethane (1,1,1-TCA).

- **MISCELLANEOUS CHEMICAL INJECTION PROJECTS**

  Mr. Yekich provided technical design of chemical oxidation/reduction along with implementation of sodium persulfate (Klozur), sodium permanganate, Fenton's reagent, surfactants, and chemical reduction using Zero Valent Iron (ZVI) to various environmental consulting companies throughout the United States, and worked closely with manufacturers of these chemicals which included FMC Corporation, Carus Corporation, Adventus Group, and VeruTek Technologies. Mr. Yekich attended Battelle Symposium, AIGP events, and gave numerous PowerPoint presentations to consulting companies and their clients. Mr. Yekich also presented at the Alabama Department of Environmental Management (ADEM), groundwater conference in Montgomery, Alabama, in addition to hosting a large presentation for environmental consultants in Alabama, which included the presentation of all the chemical manufacturers listed above, discussion of their products, case studies, and audience participation. Mr. Yekich also prepared case studies using activated persulfate (Klozur), which are posted on the FMC Corporation website.

- **FORMER INDUSTRIAL MANUFACTURER, OPELIKA, AL**

  Mr. Yekich assisted in the design and implementation of a former large manufacturing plant which manufactured exercise equipment. This facility was contaminated with chlorinated ethene's and ethane's, in addition to petroleum related constituents. Over 1,000 injections points were installed throughout the interior and exterior portions of the subject buildings, which received various concentrations of activated persulfate using sodium hydroxide, over the course of several injections.

- **FORMER TRUCKING FACILITY, ATLANTA, GA**

  Mr. Yekich helped design and implement a large ex-situ soil blending project on behalf of the GEPD and their client, in order to reduce Free Product and dissolved petroleum-impacted groundwater. This project involved the excavation of petroleum-impacted soils; transportation of soil via front end loaders into industrial sieves, placement of sieved soils into a modified soil blending machine, which applied activated persulfate with iron and hydrogen peroxide as the activators. The material was stockpiles pending laboratory analysis, and placed back into the excavation. Monitoring wells were installed within the excavation area to document the decreasing concentrations. Dewatering of petroleum-impacted groundwater was placed inside aboveground storage tanks (ASTs), pending transportation to an off-site waste facility.

Marc A. Hachey – Associate Consultant

Education:
BA Geology, Colby College, Waterville, ME (1998)
MS Geological Engineering, Rollo, MO (2011)

Training/Licenses/Registrations:
Professional Geologist CA, OR, WA, UT, AZ
Certified Engineering Geologist CA
LEED certified

Summary of Professional Experience:
Mr. Hachey started his career as a staff Geologist in 1998. In 2001 he worked as a Senior Engineering Geologist. His responsibilities included Phase I Environmental Site Assessments as well as project management, proposal preparation, and supervision of soil technicians. He performed geologic hazard investigations, fault and landslide investigations, and geologic field mapping. As a Professional Geologist, his responsibilities include preparation of Transaction Screen Assessments, preparation of Phase I ESAs and fieldwork for Phase II and Phase III ESAs. His geotechnical capabilities and investigations include pier drilling and foundation excavation observation, soil bore and test pit logging, report preparation and drafting, fault investigations, as well as grading observation and testing.

Select project experience for Mr. Hachey includes:

- **Livermore Regional Theater, Livermore CA** – Mr. Hachey performed a geotechnical and geologic investigation, as well as Phase I ESA for a proposed theater in the downtown area. A deep basement was proposed, and past environmental issues at the site were addressed. The investigation included soil borings for geotechnical investigation, and preliminary analytical soil testing which addressed the potential environmental concerns.

- **Crystal Springs Watershed, San Francisco, CA** – Mr. Hachey performed a large-scale geologic mapping and subsurface sampling investigation for a proposed land rehabilitation project proposed by the San Francisco Public Utilities Commission. The mapping and sampling were performed to determine the presence of naturally occurring asbestos contained within the Franciscan Formation bedrock underlying the site in San Mateo County. Extensive sampling was conducted, and the results were presented on aerial photographic site plans to ensure worker safety during excavation activities.

- **Kaiser Parking Structure, San Rafael, CA** – Mr. Hachey performed a geologic and geotechnical investigation for a large addition to an existing parking structure. The structure is located adjacent to a large bedrock cut slope. Mr. Hachey coordinated and observed the drilling of soil borings and seismic refraction study along the cut slope face. The bedrock was observed to be Franciscan melange and generally stable resulting in no special mitigation requirements during construction.

- **Kaiser Medical Center, Modesto, CA** – Mr. Hachey performed a geotechnical and geologic hazards investigation for a new hospital facility. He coordinated and observed the drilling of approximately 100 soil borings, including mud rotary for deeper borings and cone penetration tests. He prepared a geotechnical and geologic report, including extensive drafting preparation.

Our Environmental Lien and AUL report provides a summary of recorded information on a specific property from the time the current owner purchased the property, to present time. The report is intended to assist in the search for environmental liens filed in land title records. The report will verify property ownership and provide information on recorded environmental liens and/or Activity and Use Limitations that have been recorded from the time the current owner purchased the property, forward.

Our professional network of trained researchers follow established industry protocols and use client-supplied property information to complete this Environmental Lien and AUL report. The research is conducted at all appropriate government offices based on the location of the subject property. This would include city, county, state, federal and tribal offices as needed. The report includes:

- Current deed information (i.e. grantor, grantee, recording dates)
- Legal Description
- Environmental Lien information
- Activity and Use Limitation information
- Any Environmental Liens and/or documents referencing AULs that are listed within our summary report

DISCLAIMER

This report was prepared for the intended use of AFX Research, LLC (AFX) and client, exclusively. This report is not a guarantee of title, nor a commitment to insure, nor a policy of title insurance. No warranty, expressed or implied, is made whatsoever in connection with this report. AFX Research, LLC specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular use or purpose. The information contained in this report is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.

APPENDIX G

QUALIFICATIONS

Jason Fuller

Project Manager, Due Diligence

EDUCATION

- B.S. - Legal Studies, American Military University

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Fuller provides expertise in environmental project management, consulting, and due diligence services for large- and small-scale industrial, commercial, multifamily residential, and rural properties.

PROJECT EXPERIENCE

Project experience for Mr. Fuller includes:

- Phase I Environmental Site Assessments (PHI ESAs)
- Limited Environmental Site Assessments (LESAs)
- Environmental Transaction Screens (ETSs)
- Records Research with Risk Assessments (RSRAs)
- Regulatory Database Reviews
- Historical Records Reviews

Prior to joining AEI Consultants, Mr. Fuller served 21 years in the U.S. Army where he conducted numerous Environmental Site surveys, sampling, and remediation operations (Operational Environmental Health Site Assessments, DoD) both in Afghanistan and in various locations across the Sahel region of Africa. He conducted radiological sampling and surveillance in Sendai, Japan after the Fukushima Daiichi Nuclear plant meltdown. He also consulted with Bexar County Water Control and Improvement District (WCID) on aquifer health, flood water control, and storm water drainage to San Antonio Water Systems (SAWS) in Texas which provides water and wastewater services to more than two million customers in the greater San Antonio region.

Megan Salcido

National Client Manager, Due Diligence

EDUCATION

- BA- Environmental Studies, Brown University, Providence, RI

CERTIFICATIONS

- EPA Accredited Asbestos Building Inspector

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Salcido has been in the environmental industry since 2014 and provides project management and oversight to ensure compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Real Estate Transaction Screens, Database Reviews, and other similar environmental assessments. She has successfully completed assessments on a variety of residential, agricultural, commercial and complex industrial sites. Ms. Salcido is accustomed to all aspects of Due Diligence Property Assessments and the needs and requirements of a variety of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), and customized client formats.

PROJECT EXPERIENCE

Project experience for Ms. Salcido includes:

- Phase I Environmental Site Assessments
- Limited Environmental Site Assessments
- Environmental Transaction Screens
- Records Research with Risk Assessments
- Regulatory Database Reviews
- Historical Records Reviews
- ACM, Radon, LBP, and drinking water sampling

In addition, prior to joining the environmental consulting industry, Ms. Salcido spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

Justin Hertz

Project Engineer

EDUCATION

- Bachelor of Science, Mechanical Engineering, Loyola Marymount University

CERTIFICATIONS

- OSHA 40- Hour HAZWOPER

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Hertz has approximately one year of experience in the environmental consulting industry. His project experience in environmental consulting includes soil, groundwater and soil investigations, remediation activities, indoor air monitoring and sampling, authoring of technical reports, vapor intrusion mitigation system sampling, peer reviews, and general project management and oversight. Additionally, Mr. Hertz has experience with Property Condition Assessments (PCA's) from his summer internship in 2021.

PROJECT EXPERIENCE

Project experience for Mr. Hertz includes:

- Conduct site-specific reports including Phase II Environmental Site Assessments, quarterly groundwater monitoring, health and safety plans, and soil management plans.
- Design and implement scope of work for Phase II Subsurface Investigations including project planning and execution, cost estimates, coordinating and scheduling subcontractors, and municipal/State/federal regulatory permitting and compliance.
- Evaluate laboratory analytical reports and compare to applicable screening levels.
- Site assessment techniques include logging and classifying subsurface soil based on Unified Soil Classification System; soil, groundwater, soil vapor, and ambient air collection; and groundwater and soil vapor well installation and development.
- Review technical reports and analytical data to assess validity of conclusions and quality of the work performed.
- Construction phase observation of Engineering Controls at significant milestones

Mr. Hertz has served as project engineer for several Phase II's at AEI and former employers.

APPENDIX H

COMMONLY USED ACRONYMS & ABBREVIATIONS

Units	
µg/L	Micrograms per Liter
mg/kg	Milligrams per Kilogram
mg/L	Milligrams per Liter

Acronyms & Abbreviations	
AACEI	Association for the Advancement of Cost Engineering International
AC	Air Conditioner, or Acre
ACM	Asbestos-Containing Material
ADA	The Americans with Disabilities Act
ADAAG	ADA Accessibility Guidelines
ADJ	Adjoining Site
ADU	Accessory Dwelling Unit
AEI	AEI Consultants
AFUE	Annual Fuel Utilization Efficiency
AHERA	Asbestos Hazard Emergency Response Act
AHU	Air Handling Unit
AIA	American Institute of Architects
Allow	Allowance
ALTA	American Land Title Association
Amp	Amperage, or Ampere
APN	Assessor Parcel Number
ASCE	American Society of Civil Engineers
ASHRAE	American Society of Heating, Refrigerating and Air-Conditioning Engineers
AST	Aboveground Storage Tank
ASTM	ASTM International
AUL	Activity and Use Limitation
bgs	Below Ground Surface
BOMA	Building Owners & Managers Association
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes
BTU	British Thermal Unit (measurement of heat)
BTUH	British Thermal Units per Hour
BUR	Built-up Roof System
CERCLA	Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System
CESQG	Conditionally Exempt Small Quantity Generator
CH	Clubhouse
CO	Certificate of Occupancy
COC	Contaminant of Concern, or Chemical of Concern
COP	Coefficient of Performance
CRA	Construction Risk Assessment
CREC	Controlled Recognized Environmental Condition
CUP	Conditional Use Permit
CWH	Compact Water Heater, or Cold Water Heater
DHW	Domestic Hot Water
DWV	Drainage, Waste, Ventilation
EA	Each
EC	Engineering Controls
ECM	Energy Conservation Measure
EDR	Environmental Data Resources, Inc.
EEM	Energy Efficiency Measures
EER	Energy Efficiency Ratio

Units	
pCi/L	PicoCuries per Liter
ppb	Parts per Billion
ppm	Parts per Million

Acronyms & Abbreviations	
LBP	Lead-Based Paint
LCP	Lead-Containing Paint
LED	Light Emitting Diode
LEED	Leadership in Energy and Environmental Design
LFCA	Limited Facility Condition Assessment
LLP	Landowner Liability Protection
LQG	Large Quantity Generator
LS	Lump Sum
LUST	Leaking Underground Storage Tank
M	Model
MAP	Multifamily Accelerated Processing
MBH	1,000 BTUs per Hour
MCL	Maximum Contaminant Level
MDP	Main Distribution Panel
MEP	Mechanical, Electrical and Plumbing
MHP	Mobile Home Park
MMI	Modified Mercalli Intensity
MPH	Miles per Hour
MRL	Machine Room-Less
MTBE	Methyl Tertiary Butyl Ether
MTCO2e	Metric Tons of Carbon Dioxide Equivalent
NA or N/A	Not Applicable
ND	None Detected
NESHAP	National Emission Standards for Hazardous Air Pollutants
NFA	No Further Action
NFPA	National Fire Protection Association
NFRAP	No Further Remedial Action Planned
NLR	No Longer Regulated
NOV	Notice of Violation
NPL	National Priorities List
NPV	Net Present Value
NRA	Net Rentable Area
NRI	National Risk Index
O	Occupied
O&M	Operations and Maintenance
OEC	Other Environmental Consideration
OFC	Office
OH&PR / OH&P	Overhead and Profit
OPC	Opinion of Probable Cost
OSHA	Occupational Safety and Health Administration
PCA	Property Condition Assessment
PCB	Polychlorinated Biphenyl
PCE / PERC	Perchloroethylene, or Tetrachloroethylene, or Tetrachloroethene
PCR	Property Condition Report
PE	Professional Engineer
PFAS	Per- and Polyfluoroalkyl Substances

Acronyms & Abbreviations	
EFF AGE	Effective Age
EIFS	Exterior Insulation Finishing Systems
EMF	Electro Magnetic Fields
EMS	Energy Management System
EPA	Environmental Protection Agency
EPDM	Ethylene Propylene Diene Monomer (rubber membrane roof)
ERNS	Emergency Response Notification System
ESA	Environmental Site Assessment
ESG	Environmental, Social and Governance
EUI	Energy Use Intensity
EUL	Estimated Useful Life
EWEM	Energy and Water Efficiency Measure
F	Fahrenheit
FAR	Floor Area Ratio
FCA	Facility Condition Assessment
FCU	Fan Coil Unit
FEMA	Federal Emergency Management Agency
FF&E	Furniture, Fixtures and Equipment
FFHA	Federal Fair Housing Act
FHA	Forced Hot Air, or Fair Housing Act, or Fair Housing Adminitration
FHW	Forced Hot Water
FIRM	Flood Insurance Rate Map
FLS	Fire and Life Safety
FM	Factory Mutual
FOIA	US Freedom of Information Act
FOIL	Freedom of Information Law
FRP	Fiber Reinforced Plastic
FRT	Fire Retardant Treated
FTRP	Fire Retardant Treated Plywood
Gal	Gallon
GFA	Gross Floor Area
GFCI	Ground Fault Circuit Interrupter
GFI	Ground Fault Interrupt (circuit)
GHG	Greenhouse Gas
GIS	Geographic Information System
GPF	Gallons per Flush
GPM	Gallons per Minute
GPNA	Green Physical Needs Assessment
GPR	Ground-Penetrating Radar
GSF	Gross Square Footage
GWB	Gypsum Wall Board
HID	High Intensity Discharge
HREC	Historical Recognized Environmental Condition
HSPF	Heating Seasonal Performance Factor
HUD	Department of Housing and Urban Development
HVAC	Heating, Ventilation and Air Conditioning
IAQ	Indoor Air Quality
IBC	International Building Code
IC	Institutional Control
IM / IR	Immediate Repair
IRR	Internal Rate of Return
ISR	Impervious Surface Ratio
kBTU	Kilo-British Thermal Unit
kGal	Kilogallon
kW	Kilowatt
kWh	Kilowatt Hour

Acronyms & Abbreviations	
PGA	Peak Ground Acceleration
PML	Probable Maximum Loss
POC	Point of Contact
PSF	Pounds per Square Foot
PSQ	Pre-Survey Questionnaire
PTAC	Packaged Through-Wall Air Conditioning (Unit)
PVC	Polyvinyl Chloride
R&M	Repair and Maintain - Routine Maintenance
RCRA	Resource Conservation and Recovery Act
REC	Recognized Environmental Condition
RM	Room
ROI	Return On Investment
ROW	Right-of-Way
RP	Responsible Party
RR	Replacement Reserve
RTU	Rooftop Unit
RUL	Remaining Useful Life
SDS	Safety Data Sheet
SEDI	Statement of Energy Design Intent
SEER	Seasonal Energy Efficiency Ratio
SEL	Scenario Estimated Loss
SEMS	Superfund Enterprise Management System
SEP	Statement of Energy Performance
SF	Square Footage, or Square Feet
SIR	Savings to Investment Ratio
SL	Scenario Loss
SP	Subject Property
SQG	Small Quantity Generator
SRA	Seismic Risk Assessment
ST	Short Term
SUL	Scenario Upper Loss
SUP	Special Use Permit
SVOC	Semi-Volatile Organic Compound
SY	Square Yard
TCE	Trichloroethylene, or Trichloroethene
TE	Thermal Efficiency
TPH	Total Petroleum Hydrocarbons
TPHd / TPH-d	Total Petroleum Hydrocarbons (diesel range)
TPHg / TPH-g	Total Petroleum Hydrocarbons (gasoline range)
TPHo / TPH-o	Total Petroleum Hydrocarbons (oil range)
TPO	Thermoplastic Polyolefin Roof Membrane
TRPH	Total Recoverable Petroleum Hydrocarbons
TSD	Treatment, Storage, and Disposal
UBC	Uniform Building Code
USDA	United States Department of Agriculture
USGS	United States Geological Survey
UST	Underground Storage Tank
V	Vacant
VAV	Variable Air Volume Box
VCP	Voluntary Cleanup Program
VOC	Volatile Organic Compound
VSQG	Very Small Quantity Generator
WDO	Wood Destroying Organism
ZAR	Zoning Analysis Report
