Phase I Environmental Site Assessment

REPORT DATE: October 2, 2025

PROPERTY INFORMATION:
800 Oak Grove Avenue
Menlo Park, San Mateo County, California 94025

PROJECT INFORMATION:
AEI Project No. 516668
Site Assessment Date: September 25, 2025

PREPARED FOR:
800 Oak Grove Owner, LLC.
P.O. Box 1672
Palo Alto, California 94301

PREPARED BY:

P.O. Box 1672
Palo Alto, California 94301

Subject: **Phase I Environmental Site Assessment**
800 Oak Grove Avenue
Menlo Park, California 94025
AEI Project No. 516668

Dear Rob:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or jhertz@aeiconsultants.com.

Sincerely,

Justin Hertz

Justin Hertz
Business Development Manager
AEI Consultants

PROJECT SUMMARY

800 Oak Grove Avenue, Menlo Park, San Mateo County, California 94025
AEI Project No. 516668

REC: Recognized Environmental Condition
CREC: Controlled Recognized Environmental Condition
HREC: Historical Recognized Environmental Condition
OEC: Other Environmental Concerns (business environmental risks & de minimis conditions)
SDG: Significant Data Gap

REPORT VIABILITY

Regulatory Database	September 14, 2025
Site Visit	September 25, 2025
Interview(s)	Property Owner: N/A Key Site Manager: September 25, 2025
EP Declaration	October 2, 2025
Environmental Lien Search (if conducted by AEI)	N/A
Report Viability per ASTM E1527-21	March 13, 2026

The dates listed are required for Users who are using the report in connection with CERCLA liability protections. The User may have their own criteria when the report is being used for business risk purposes, and not CERCLA liability protections.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by 800 Oak Grove Owner, LLC. to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 800 Oak Grove Avenue, Menlo Park, San Mateo County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	800 Oak Grove Avenue, Menlo Park, San Mateo County, California 94025
Property ID (APN or Block/Lot)	071-091-520
Location	West corner of the intersection of Oak Grove Avenue and Crane Street
Site and Building Information	
Approximate Site Acreage/Source	0.75/Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1973/Assessor
Building Square Footage (SF)/Source	13,431/Assessor
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified
Use/Occupancy of Basement or Subgrade Area(s)	N/A
Number of Units	Five
Additional Improvements	Trash enclosure, asphalt-paved parking areas, and associated landscaping
Property Type	Office
On-site Occupant(s)	Karuna Advisors, Rimon Law, and three vacant units
Current On-site Operations/Use	Administrative activities
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	RCRA NonGen/NLR, FINDS, ECHO, E MANIFEST, HWTS, HAZNET

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; refer to Section 1.6.1	Topographic maps
1939-1968	Developed with residences (1201-1235 Crane Street)	Aerial photographs, city directories, Sanborn maps
1973-Present	Developed with the current building, occupied as a multi-tenant office building (800 Oak Grove Avenue)	Aerial photographs, city directories, Sanborn maps, site observations, agency records, previous reports

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	Crane Street, followed by: Residence (1230 Crane Street) Nativity of the Holy Virgin Orthodox Church (1220 Crane Street) Office Building (724 Oak Grove Avenue)	Yes; refer to Section 5.1
East	Intersection of Oak Grove Avenue and Crane Street, followed by: Parking lot (APN 071-094-180)	None identified
Southeast	Oak Grove Avenue, followed by: AJ Tutoring (1155 Crane Street) Offices (825 Oak Grove Avenue)	Yes; refer to Section 5.1
South	Menlo Companies (850 Oak Grove Avenue) Massage For Therapy (846 Oak Grove Avenue) Residence (836 Oak Grove Avenue)	None identified
Southwest	University Gardens (1220-1244 University Drive)	Yes; refer to Section 5.1
Northwest	Medical Office (1225 Crane Street)	Yes; refer to Section 5.1

Findings and Opinions

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the current ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the current ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory

authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) include, but are not limited to, de minimis conditions and/or business environmental risks such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the ASTM Standard. These may also affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Due to the age of the subject property building, there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.
- Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-21, of 800 Oak Grove Avenue, Menlo Park, San Mateo County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

RECOMMENDATIONS

AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 800 Oak Grove Avenue, Menlo Park, San Mateo County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- The San Mateo County Environmental Health Services was contacted for information on the subject property in order to identify historical tenants/use, property development, and/or hazardous substance/petroleum product handling. Due to the time frame of this assessment, records were not available for review. However, based on the quality of information obtained from other sources including a previous report, this limitation is not expected to significantly alter the findings of this assessment.

- AEI observed a representative sample of interior units: 100, 205, 210, and 250. In addition, AEI observed common and exterior areas of the property. Based on the nature of property occupancy, this method of assessment is presumed to be appropriate due to the size of the subject property.

1.6 Data Failure and Data Gaps

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	As noted in Section 3.0, the earliest historical resource obtained during this assessment indicated that the subject property was developed with a residence. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, Sanborn fire insurance maps, city directories, historical topographic maps, agency records, interview

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of 800 Oak Grove Owner, LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns.

Reliance is provided in accordance with 800 Oak Grove Owner, LLC. and AEI's contract and Terms and Conditions dated September 11, 2025. The limitation of liability defined in the contracted terms is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

Property Information	
Site Address(es)	800 Oak Grove Avenue, Menlo Park, San Mateo County, California 94025
Property ID (APN or Block/Lot)	071-091-520
Location	West corner of the intersection of Oak Grove Avenue and Crane Street
Site and Building Information	
Approximate Site Acreage/Source	0.75/Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1973/Assessor
Building Square Footage (SF)/Source	13,431/Assessor
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified
Use/Occupancy of Basement or Subgrade Area(s)	N/A
Number of Units	Five
Additional Improvements	Trash enclosure, asphalt-paved parking areas, and associated landscaping
Property Type	Office
On-site Occupant(s)	Karuna Advisors, Rimon Law, and three vacant units
Current On-site Operations/Use	Administrative activities
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	RCRA NonGen/NLR, FINDS, ECHO, E MANIFEST, HWTS, HAZNET

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of Menlo Park
Sewage Disposal/Treatment	City of Menlo Park

Utility source/system information listed in the table above is provided by Mr. Robert Lobedzinski, property manager, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a commercial and residential area of Menlo Park, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	Crane Street, followed by: Residence (1230 Crane Street) Nativity of the Holy Virgin Orthodox Church (1220 Crane Street) Office Building (724 Oak Grove Avenue)	Yes; refer to Section 5.1

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
East	Intersection of Oak Grove Avenue and Crane Street, followed by: Parking lot (APN 071-094-180)	None identified
Southeast	Oak Grove Avenue, followed by: AJ Tutoring (1155 Crane Street) Offices (825 Oak Grove Avenue)	Yes; refer to Section 5.1
South	Menlo Companies (850 Oak Grove Avenue) Massage For Therapy (846 Oak Grove Avenue) Residence (836 Oak Grove Avenue)	None identified
Southwest	University Gardens (1220-1244 University Drive)	Yes; refer to Section 5.1
Northwest	Medical Office (1225 Crane Street)	Yes; refer to Section 5.1

2.4 PHYSICAL SETTING

Geologic Unit	Rock Stratigraphic Unit Era: Cenozoic System: Quaternary Series: Quaternary Code: Q Geologic Age Identification Category: Stratified Sequence Source: EDR GeoCheck®
Soil Series	Soil Component Name: Botella Soil Surface Texture: Clay Loam Hydrologic Group: Class B - Moderate infiltration rates Soil Drainage Class: Not provided Source: EDR GeoCheck®
Groundwater Flow Direction	North Source: SLIC case data for nearby site at 995 El Camino Real, obtained via GeoTracker
Estimated Depth to Groundwater	40 feet bgs Source: SLIC case data for nearby site at 995 El Camino Real, obtained via GeoTracker
Surface waters on the subject property or adjoining properties	None
Additional Notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, historical topographic maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1939	Unknown use/Data failure; refer to Section 1.6.1	Topographic maps
1939-1968	Developed with residences (1201-1235 Crane Street)	Aerial photographs, city directories, Sanborn maps
1973-Present	Developed with the current building, occupied as a multi-tenant office building (800 Oak Grove Avenue)	Aerial photographs, city directories, Sanborn maps, site observations, agency records, previous reports

The following historical addresses were associated with the subject property: 12031-1235 Crane Street. These addresses were also researched as part of this assessment.

AEI did not identify potential environmental concerns in association with the current or historical use of the subject property.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2020, non-inclusive):

Year(s)	Subject Property Description	Adjoining Property Descriptions
1939 1943 1948	Developed with residential buildings	NORTHEAST: Roadway, followed by residences EAST: Intersection, followed by residences SOUTHEAST: Roadway, followed by residences SOUTH: Residences SOUTHWEST: Vacant land NORTHWEST: Residences
1950 1958	No significant changes	NORTHEAST: No significant changes EAST: No significant changes SOUTHEAST: No significant changes SOUTH: No significant changes SOUTHWEST: Residences NORTHWEST: No significant changes
1963 1968	No significant changes	NORTHEAST: Roadway, followed by residences and a commercial building EAST: Intersection, followed by a parking lot SOUTHEAST: Roadway, followed by commercial buildings

Year(s)	Subject Property Description	Adjoining Property Descriptions
		SOUTH: No significant changes SOUTHWEST: No significant changes NORTHWEST: No significant changes
1974 1982	Developed with the current building	NORTHEAST: No significant changes EAST: Intersection, followed by a parking lot SOUTHEAST: No significant changes SOUTH: No significant changes SOUTHWEST: No significant changes NORTHWEST: No significant changes
1991 1998	No significant changes	NORTHEAST: Roadway, followed by commercial and residential buildings EAST: No significant changes SOUTHEAST: No significant changes SOUTH: No significant changes SOUTHWEST: Residential building NORTHWEST: No significant changes
2005 2009 2012 2016 2020	No significant changes	NORTHEAST: No significant changes EAST: Intersection, followed by a parking lot SOUTHEAST: No significant changes SOUTH: Commercial and residential buildings SOUTHWEST: No significant changes NORTHWEST: No significant changes

Subject property:

- No potential environmental concerns identified

Adjoining properties:

- No potential environmental concerns identified

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed (1891-1968, non-inclusive):

Year(s)	Subject Property Description (Listed Address)	Adjoining Property Descriptions
1891	Not depicted	NORTHEAST: Not depicted EAST: Oak Grove Avenue, followed by a dwelling SOUTHEAST: Oak Grove Avenue, followed by a dwelling and a public school SOUTH: Not depicted SOUTHWEST: Not depicted NORTHWEST: Not depicted
1897 1904 1908	Not depicted	NORTHEAST: Not depicted EAST: Oak Grove Avenue, followed by a dwelling

Year(s)	Subject Property Description (Listed Address)	Adjoining Property Descriptions
		SOUTHEAST: Oak Grove Avenue, followed by dwellings SOUTH: Not depicted SOUTHWEST: Not depicted NORTHWEST: Not depicted
1925	Not depicted	NORTHEAST: Crane Avenue, followed by vacant land EAST: Intersection of Oak Grove Avenue, followed by dwellings SOUTHEAST: Oak Grove Avenue, followed by dwellings SOUTH: Not depicted SOUTHWEST: Not depicted NORTHWEST: Not depicted
1931 1944	Not depicted	NORTHEAST: Not depicted EAST: Intersection of Oak Grove Avenue, followed by dwellings SOUTHEAST: Oak Grove Avenue, followed by dwellings SOUTH: Dwellings SOUTHWEST: Dwelling NORTHWEST: Dwellings
1954	Developed with two residences and associated garages (1201-1235 Crane Street)	NORTHEAST: Not depicted EAST: Intersection of Oak Grove Avenue, followed by dwellings SOUTHEAST: Oak Grove Avenue, followed by dwellings SOUTH: Dwellings SOUTHWEST: Dwelling NORTHWEST: Dwellings
1968	Developed with two residences and associated garages (1201-1235 Crane Street)	NORTHEAST: Crane Avenue, followed by dwellings and a church EAST: Intersection of Oak Grove Avenue, followed by a parking lot SOUTHEAST: Oak Grove Avenue, followed by stores, offices, and a dwelling SOUTH: Dwellings SOUTHWEST: Dwellings NORTHWEST: Dwellings

Subject property:

- No potential environmental concerns identified

Adjoining properties:

- No potential environmental concerns identified

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1957-2020, non-inclusive. Refer to the appendices for a complete list of historical subject property tenants identified by EDR.

The first listing for the subject property appeared in 1957. No potential tenants of concern were identified based on AEI's review of the historical city directories.

The following table summarizes the results of the city directory search for the subject property.

Subject Property

Year(s)	Address - Occupant Listed
1957, 1963	1201 Crane Street - Blanchard, Marguerite 1221 Crane Street - Gardiner, Robert
1969	1201 Crane Street - Byner, Alex 1221 Crane Street - Harwood, Janice
1973, 1978	800 Oak Grove Avenue - Office building; several office tenants listed
1981, 1986	800 Oak Grove Avenue - Office building; several office tenants listed 1201 Crane Street - XXXX 1221 Crane Street - XXXX
1992, 1995, 2000, 2005, 2010, 2014, 2017, 2020	800 Oak Grove Avenue - Several office tenants listed 1225 Crane Street - Several office tenants listed

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

The table below summarizes the search of historical city directories conducted for the adjoining properties. Refer to the appendices for a complete list of historical adjoining occupants identified during the review of city directories obtained from EDR.

Adjoining Properties

Direction	Address(es)	Potential Listings of Concern
Northeast	1220-1230 Crane Street and 724 Oak Grove Avenue	None identified
East	N/A	None identified
Southeast	1155 Crane Street and 825 Oak Grove Avenue	None identified
South	836-850 Oak Grove Avenue	None identified
Southwest	1220-1244 University Drive	None identified
Northwest	1225 Crane Street	None identified

Subject property:

- No potential environmental concerns identified

Adjoining properties:

- No potential environmental concerns identified

3.4 Historical Topographic Maps

AEI reviewed historical topographic maps utilizing EDR. Historical topographic maps were reviewed for the years 1897-2021, non-inclusive. No additional historical information was obtained from available topographic maps.

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Mateo County Environmental Health Services (SMCEHS)	September 15, 2025	Online	N/A	Response pending, refer to Section 1.5

4.2 Fire Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Fire Department (MPFD)	September 15, 2025	Online	Ms. Michelle Kneier	No subject property records on file

4.3 Building Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Building Department (MPBD)	September 26, 2025	Online	N/A	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
2005	N/A	Install 4 wide counter and sink; install insta-hot and disposal
2010	N/A	Re-roofing permit
2010	N/A	Install 16 HVAC units on rooftop
2012	N/A	Tenant improvements for Comerica Bank
2015	N/A	Sewer lateral replacement

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the MPBD.

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Menlo Park Planning Department (MPPD)	September 26, 2025	Online	N/A	No evidence indicating the existence of AULs on file for the subject property

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Mateo County Assessor's Office	September 26, 2025	Online	N/A	Information obtained is discussed below

Records Summary

APN	071-091-520
Acreage	0.752 acre
Construction Date	1973
Building Square Footage	13,431 square feet
Current Owner	Not provided
Additional Information	N/A

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	September 26, 2025	Online	N/A	No subject property records on file
SWRCB GeoTracker PFAS Map	September 26, 2025	Online	N/A	No subject property records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	September 26, 2025	Online	N/A	No subject property records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	September 26, 2025	Online	N/A	Records discussed below
CA DTSC EnviroStor	September 26, 2025	Online	N/A	No subject property records on file
CalEPA Regulated Site Portal	September 26, 2025	Online	N/A	No subject property records on file
Bay Area Air Quality Management District (BAAQMD)	September 15, 2025	Online	N/A	No subject property records on file

California DTSC HWTS Database Summary

Occupant	Year(s)	Hazardous Waste Generated	Amount (Tons)
Comerica Bank	2020	Asbestos-containing waste	0.23

Based on the nature of waste generated and the short duration of time that these wastes were reported to be generated in the HWTS database which were disposed of off-site under waste manifest control and regulatory oversight, this information is not expected to constitute a REC.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Department of Conservation Geologic Energy Management Division (CalGEM)	September 26, 2025	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	September 26, 2025	NPMS Public Map Viewer	No

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining properties and/or nearby sites of concern that were determined to warrant additional discussion, if any, are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Properties	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	0.5			
Federal CERCLA removals/orders sites	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generators (LQG, SQG, VSQG)	SP/ADJ			
Federal RCRA NonGen/NLR sites	SP/ADJ	✔	✔	
Federal IC/EC sites	SP			
Federal ERNS sites	SP			
State/tribal "Superfund" equivalent sites	1.0			
State/tribal hazardous waste facilities	0.5			
State/tribal landfill and solid waste disposal facilities	0.5			
State/tribal leaking storage tanks	0.5			
State/tribal registered storage tanks	SP/ADJ			

Database	Search Distance (Miles)	Subject Property	Adjoining Properties	Other Nearby Sites of Concern
State/tribal voluntary cleanup sites	0.5			
State/tribal IC/EC registries	SP			
State/tribal brownfield sites	0.5			
Orphans	N/A			
Additional Environmental Record lists	SP/ADJ	✔	✔	

Facility Name	Comerica Bank
Address	800 Oak Grove Avenue
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	RCRA NonGen/NLR, FINDS, ECHO, E MANIFEST, HWTS, HAZNET
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified the site as "not a generator, verified" in 2020. The NAICS Description provided for the business is "All Other Waste Management Services". No violations were identified in connection with the RCRA or ECHO listings. According to the HAZNET listings, the subject property generated 0.23 ton of asbestos-containing waste in 2020. Based on the small quantity and nature of the waste generated, these listings are not expected to represent a REC.

Facility Name	Jumpstart MD / Chaulong Nguyen Dental Group
Address	724 Oak Grove Avenue
Distance & Direction	Adjoining to the northeast, across Crane Street (approximately 40 feet)
Hydrologic Position	Down-gradient
Databases Listed	San Mateo Co. BI
Comments	The northeast adjoining property is listed in the San Mateo Co. BI database twice for previously operating in the medical waste program. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	California Vitreoretinal Ctr / MPOMG / Recia Blumenkranz, MD
Address	1225 Crane Street
Distance & Direction	Adjoining to the northwest
Hydrologic Position	Cross-gradient
Databases Listed	San Mateo Co. BI
Comments	The northwest adjoining property is listed in the San Mateo Co. BI database three times for previously operating in the medical waste program. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	Medi Points Acupuncture / Dale Pearlman, M.D. / Meridian Medicine Acupuncture
Address	1220 University Avenue
Distance & Direction	Adjoining to the southwest
Hydrologic Position	Up-gradient
Databases Listed	San Mateo Co. BI

Comments	The southwest adjoining property is listed in the San Mateo Co. BI database three times for previously operating in the medical waste program. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	R Glenn Kitasoe DDS / Dr. Scott Hoffman DDS / Peninsula Endodontics
Address	825 Oak Grove Avenue
Distance & Direction	Adjoining to the southeast, across Oak Grove Avenue (approximately 40 feet)
Hydrologic Position	Cross-gradient
Databases Listed	RCRA NonGen/NLR (2), San Mateo Co. BI
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listings identified the site as "not a generator, verified" in 1992 and 1993. The NAICS Description provided for the business is "Office of Dentists". No violations were identified in connection with the RCRA listings. The site is listed in the database for previously operating in the medical waste program. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

5.2 Vapor Migration

A vapor encroachment condition (VEC) is the presence or likely presence of Chemical(s) of Concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property.

AEI conducted a limited screening for potential VECs that may affect the subject property. The VEC screening focused on the current and historical usage of the subject property and also utilized the aforementioned regulatory agency database report provided by EDR to evaluate identified Chemicals of Concern (COCs), including petroleum hydrocarbons.

Determination of AOC

To identify the area of concern (AOC) for contaminated sites with non-petroleum hydrocarbon COCs, AEI utilized the approximate minimum search distance defined by the current ASTM E2600 of 1,760 feet (1/3 mile) from the subject property boundary for COC-contaminated sites. For sites contaminated with petroleum hydrocarbon COCs, AEI utilized the AOC approximate minimum search distance of 528 feet (1/10 mile). The AOC was adjusted accordingly based on review of physical setting characteristics, known release information, property and land features, groundwater flow direction, and soil type, et al.

ASTM's Vapor Encroachment guidance indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or downgradient radius distances can be significantly reduced. AEI calculated the reduced AOC distances when considering groundwater flow direction by utilizing the following default distances, which were determined using the Buonicore Methodology:

Non-petroleum hydrocarbon COCs:

- 1,760 feet in the upgradient direction
- 365 feet in the cross-gradient direction

- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if Light, Non-Aqueous Phase Liquid, (LNAPL, i.e. floating product) is suspected:

- 528 feet in the upgradient direction
- 165 feet in the cross-gradient direction
- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if LNAPL is *not* suspected:

- 528 feet in the upgradient direction
- 95 feet in the cross-gradient direction
- 30 feet in the downgradient position

Additional adjustment of the AOC may be conducted based on AEI's professional judgment.

Conclusions

Source	VEC Identified	VEC Not Identified	Comments
Subject Property		✔	N/A
Adjoining and/or Nearby Site(s)		✔	N/A

5.3 Per- and Polyfluoroalkyl Substances (PFAS)

As defined in Section 3.2.36 of the current ASTM Standard E1527, hazardous substance means "those substances defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts." Hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA are outside of the scope of the current ASTM Standard E1527.

On July 8, 2024, the Final EPA rule became effective that designates perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) as CERCLA hazardous substances. Per the current ASTM Standard E1527, once this rule went into effect, these substances are evaluated within the scope of this standard, and a release or likely release of PFOA and/or PFOS is considered a REC.

Other than PFOA/PFOS, compounds classified as PFAS are not currently classified as hazardous substances under CERCLA, and thus the potential presence of PFAS (other than PFOA/PFOS) is outside of the scope of the current ASTM Standard E1527, and does not constitute a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change.

AEI's research of potential PFAS contamination focuses on the release/likely release of PFOA/PFOS. However, if additional information pertaining to other PFAS is identified, AEI will also assess/discuss these compounds, as deemed applicable/appropriate within the scope of this investigation.

It should be noted that AEI's screening of PFOA/PFOS and other PFAS is based solely on review of the resources cited within this report. Identification, or lack thereof, is not a warranty that PFOA/PFOS or other PFAS contamination is present or absent at a site. Additionally, it should be noted that given the evolving nature of science and regulatory oversight of PFOA/PFOS and other PFAS, additional sources of contamination may exist at the subject property, adjoining properties and/or other nearby sites that were not identified by the limited data and screening tools cited within this report.

5.3.1 Potential On-Site PFAS Sources/Concerns

AEI researched the standard historical and regulatory sources cited within this report to determine if a release or likely release of PFOA/PFOS has occurred at the subject property.

A voluntary industry phaseout of PFOA and PFOS was first implemented in the late 1990s and was fully implemented for PFOS by 2002 and PFOA by 2015. Although PFOA and PFOS have been generally phased out since 2015, studies have found that precursor PFAS in wastewater treatment systems may form PFOA and PFOS. As such, even after 2015, the presence of PFAS in wastewater discharges is considered a likely source of PFOA and PFOS contamination.

Potential Source	Yes	No
Past or present industrial operations that potentially included the use of PFAS (if "yes" see *Potential PFAS Sources from Industrial Uses* section/table below)		✔
The use or discharge of AFFF (if "yes" see *Potential Sources of AFFF* section/table below)		✔
Electroplating (1950s-present) NOTE: Electroplating (specifically hard chromium plating) is an industrial activity where PFAS-containing mist suppressants may have been used		✔
Agricultural uses, specifically 1970s-present that included application of biosolids/WWTP sludge that potentially contained PFAS		✔
Wastewater treatment plant (WWTP) (1960s-present)		✔
Landfill operations / waste disposal areas (1960s-present)		✔
Mining / quarrying / oil production		✔
Commercial carwash (1989-2010)		✔
Dry cleaner and/or commercial laundry (1970s-2010)		✔

AEI did not identify any obvious potential sources of PFAS contamination originating from on-site operations/sources.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	N/A	N/A	N/A	N/A	Not interviewed; refer to Section 1.5
Key Site Manager	Mr. Robert Lobedzinski, Property Manager	September 25, 2025	In Person	2010	Interviewed; see Interview Summary table below

INTERVIEW SUMMARY

Question	Key Site Manager Response/ Comment
Are you aware of any known plans for site redevelopment or change in site use?	No
Do you have any knowledge of previous environmental investigations conducted on site?	No
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No
Are you aware of any fire incidents requiring fire department response?	No

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property?	Information not provided

Question	Response/ Comment
(b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided
Purpose/reason for conducting Phase I ESA:	Information not provided; AEI assumes the purpose is to qualify for an LLP to CERCLA liability

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 Environmental Lien and AUL Search Information Reports

To meet the requirements of 40 CFR 312.20 and 312.25, a search for the existence of environmental liens and AULs that are filed or recorded against the subject property must be conducted. The current ASTM Standard E1527 recognizes two acceptable methods to meet this requirement:

- **Method 1** consists of a review of title documents by the User (or a title professional engaged by the User) for environmental liens and AULs.

  Note: this method must be completed by the User (or a title professional engaged by the User), and thus cannot be completed by AEI.

  Refer to Section 6.2 User Provided Information for information (if any) provided by the User via the User Questionnaire.

- **Method 2** consists of obtaining and relying on title search information reports designed to search for environmental liens and AULs.

  Note: these reports are not included within the scope of the current ASTM E1527 Standard. Thus, these reports can only be obtained by a consultant if explicitly added to the agreed upon scope of work between the consultant and the client.

The inclusion of a title search information report designed to search for environmental liens and AULs was not part of AEI's approved scope of services.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	September 25, 2025
AEI Site Assessor(s)	Clinton Look
Property Escort(s)/ Relationship(s) to Property	Mr. Robert Lobedzinski/Property Manager
Units/Areas Observed	Units: 100, 205, 210, and 250 Representative interior common areas such as: • Corridors • Restrooms Exterior areas: All exterior areas
Area(s) not accessed and reason(s)	Units: 200 Refer to Section 1.5 for discussion of limiting condition(s)
Other Physical Constraints	None
General Observations	The property includes a two-story office building

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use (including drums, totes, and intermediate bulk containers)		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	✔
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems or Cesspools		
Biomedical Wastes		
Other		

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformer

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/ No)	Non-PCB Label (Yes/ No)
Pad-Mounted	One	PG&E	1973	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformer. Based on the good condition of the equipment, the transformer is not considered evidence of a REC.

7.1.2 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not considered evidence of a REC.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Transformer

One pole-mounted transformer was observed on an adjoining property during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformer. Based on the good condition of the equipment, the transformer is not a REC.

7.2.2 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not considered evidence of a REC.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.

Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 Naturally-Occurring Radon

Radon is a naturally-occurring, odorless, and invisible radioactive gas. According to the United States EPA, radon is the second leading cause of lung cancer. Natural radon levels vary and are closely related to geologic formations, soils, and foundation construction. Radon may enter buildings through basement sumps or other openings such as cracks and other holes in foundations.

US EPA Map

In 1993 the United States EPA prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map identifies counties of the US with the greatest potential for elevated indoor radon levels based on indoor radon measurement data, geology, soil parameters, and foundation types. The map divides the country into three radon zones based on potential radon accumulation, but is not to be considered predictive of radon accumulation.

The 1993 EPA map identifies the following three radon zones:

- Zone 1 - Highest potential for radon accumulation; average indoor radon levels may be greater than 4 pCi/L
- Zone 2 - Moderate potential for radon accumulation; average indoor radon levels may be between 2 and 4 pCi/L
- Zone 3 - Low potential for radon accumulation; average indoor radon levels may be less than 2 pCi/L

It is important to note that elevated levels of radon can be found in all three zones, and the EPA and other agencies recommend site-specific testing to determine radon levels at a specific property. Therefore, while the map does give an indication of the propensity of radon gas accumulation in structures in a county, elevated radon levels may be found in all three radon zones.

It should also be noted that EPA's 1993 Map of Radon Zones, while useful, was based on limited data collected prior to 1993 and therefore may be supplemented with available state-developed or other data to further understand the radon potential for a specific area.

According to the US EPA, the radon zone level for the County is Zone 2, which has a moderate potential for radon accumulation.

California Department of Health Services Radon Database

According to additional data obtained from California Department of Health Services Radon Database, of 153 tests conducted in the subject property zip code (94025) in 2016, 25 of the tests were above 4.0 pCi/L. While a relatively small percentage of the test results exceeded the EPA threshold, the majority of the locations sampled were below 4.0 pCi/L.

Radon sampling would be necessary to determine site-specific radon conditions. Radon sampling was not requested as part of this assessment.

8.4 Suspect Mold or Microbial Growth Conditions

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of suspect mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/21/2025 has revealed that there are 13 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within

approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 58 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 10 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 06/12/2025 has revealed that there are 12 Cortese sites within approximately 0.5 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 4 DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

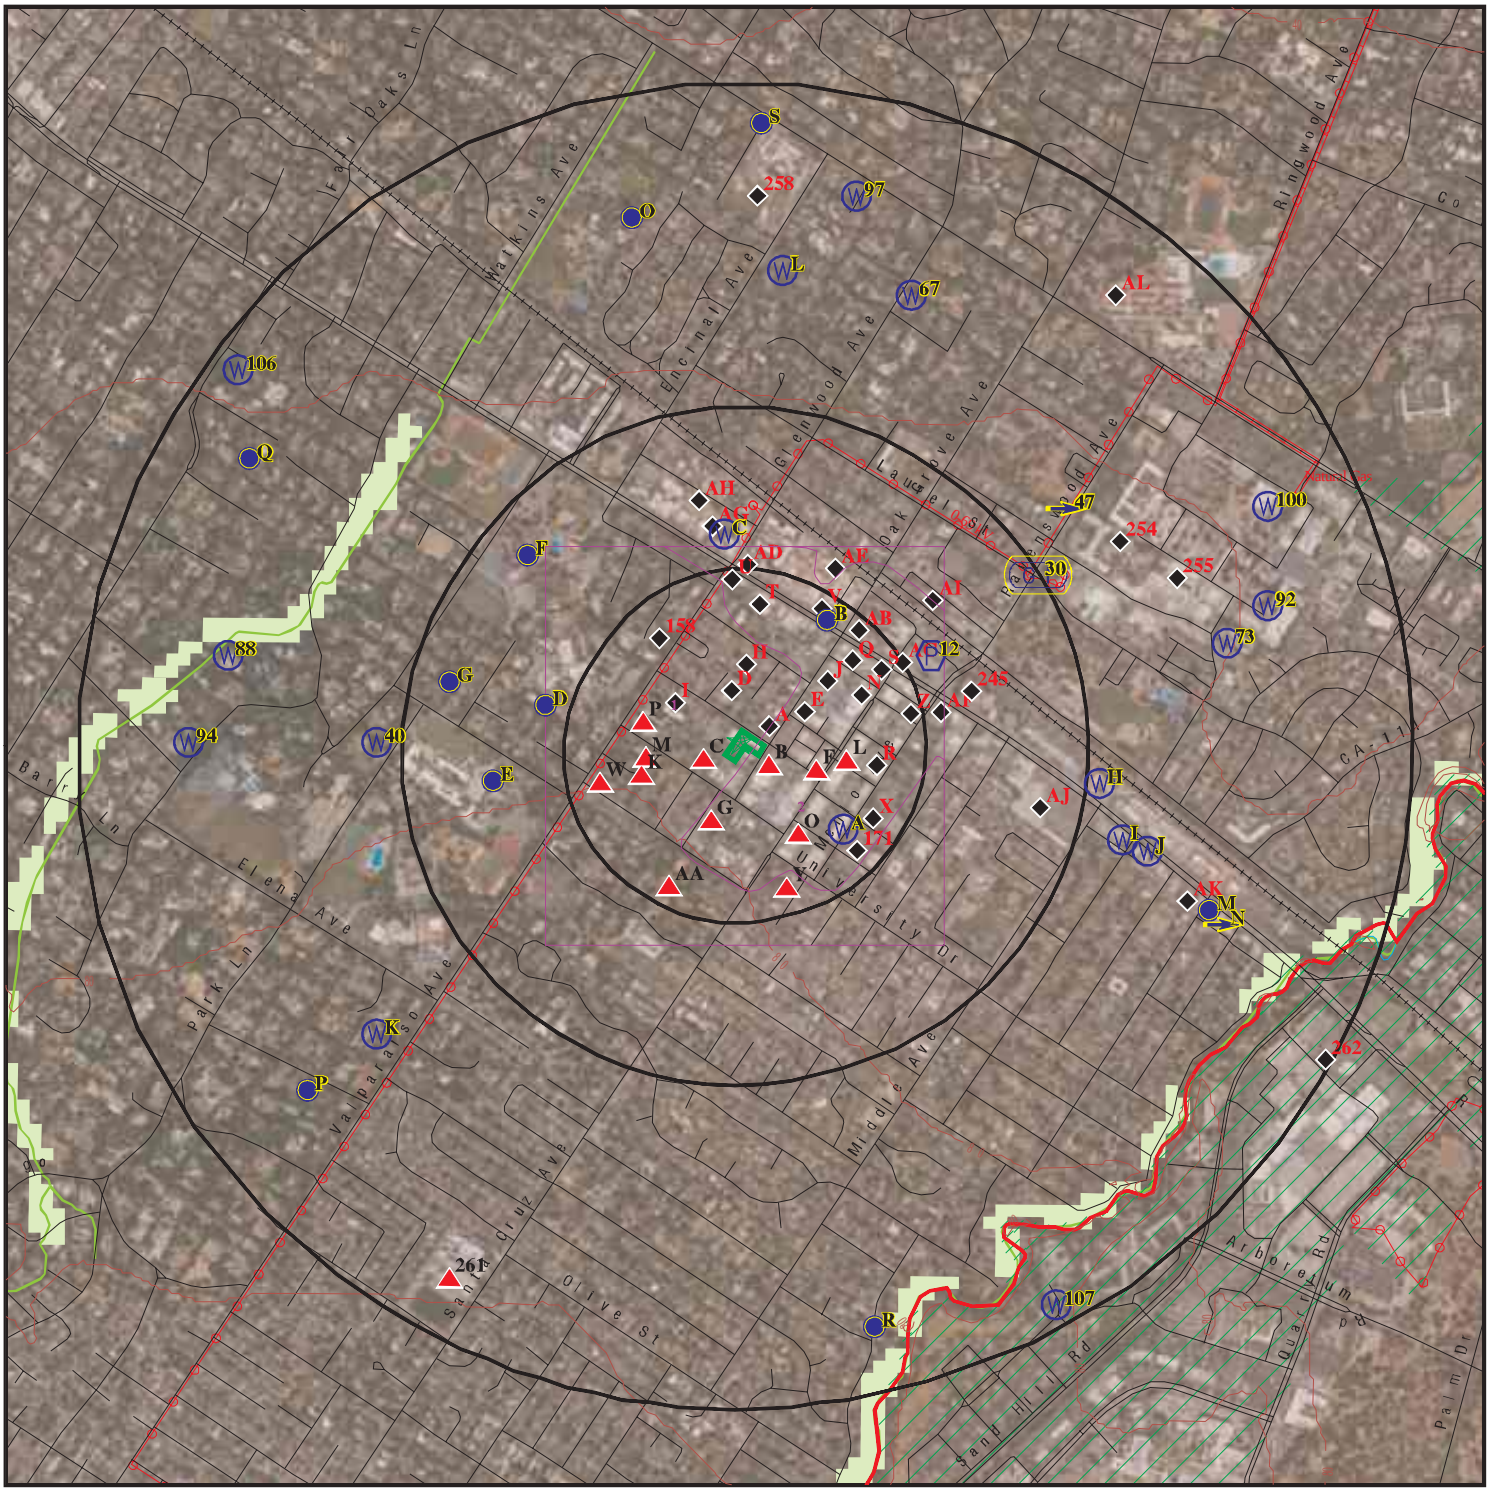

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

CA Enviroscreen 4 Score:	80-85%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	TPH-d and VOCs were detected on the Site, which was previously used for petroleum fuel storage (both above-ground and below-ground). VOCs were mobilized onto site via groundwater contamination from the nearby former Rohm & Haas site (800 Chestnut St). Contaminated soil was excavated, aerated, and backfilled. The case was closed in January of 1999 after all site-specific cleanup goals were met.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
Registry ID: 110001171240

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110071740760

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
Registry ID: 110001151379

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste Code:	D022

WALGREEN (Continued) **1016954322**

Waste Description: Chloroform

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U059
Waste Description: 5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin

Waste Code: U072

WALGREEN (Continued) **1016954322**

Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U187
Waste Description: Acetamide, N-(4-Ethoxyphenyl)- (Or) Phenacetin

Waste Code: U188
Waste Description: Phenol

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U236
Waste Description: 2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue

WALGREEN (Continued) **1016954322**

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U279
Waste Description: U279

Waste Description: Methyl Ethyl Ketone

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

WALGREEN (Continued) **1016954322**

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U059
Waste Description: 5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin

Waste Code: U072
Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

WALGREEN (Continued) **1016954322**

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U187
Waste Description: Acetamide, N-(4-Ethoxyphenyl)- (Or) Phenacetin

Waste Code: U188
Waste Description: Phenol

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U236
Waste Description: 2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U279
Waste Description: U279

CERS HAZ WASTE:

Name:	WALGREENS #7087
Address:	643 SANTA CRUZ AVE
City,State,Zip:	MENLO PARK, CA 94025
Site ID:	84324
CERS ID:	10340467
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	84324
Site Name:	Walgreens #7087
Violation Date:	08-28-2015
Citation:	40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description:	Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an

WALGREENS #7087 (Continued) **S113149191**

emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 03/15/2016. The waste tubs in the back receiving area were all blocked in and unaccessible by new product containers. You waste containers must be accessible. Correct immediately and maintain accessibility. Provide verification to the County within 30 days
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 84324
Site Name: Walgreens #7087
Violation Date: 09-01-2017
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 09/01/2017. Access to hazardous waste storage area blocked by cart and new boxes. Moved during inspection.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Evaluation:

Eval Date: 03-15-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Onsite to assess status of corrective action. Waste bins are now accessible and not blocked in. Facility will maintain accessibility routinely. Violation corrected
Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown

WALGREENS #7087 (Continued) **S113149191**

Eval Date: 08-30-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: rarely LQG but >27 g/y - revise fee cat
Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-24-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: High volume, low space store with almost daily delivery. Uses this as opportunity to return for reverse distribution at least 3 times weekly. The reverse distribution bin was empty during the inspection. Dropped pills disposed as HW. "Salvage" which includes expired pharmaceuticals are sent back to Walgreens warehouse for credit. Some of these may be HW. Facility was a small quantity generator at time of inspection.
Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-17-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility generates small quantities of retail waste, damaged non RCRA waste, as well as some pharmaceutical waste.

Violations:
Site ID: 414914
Site Name: Trader Joe's Store #069
Violation Date: 06-06-2023
Citation: HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized.
Violation Notes: Returned to compliance on 06/06/2023. OBSERVED: Trader Joes has the latest 2022 manifest on-site that is signed by the generator and transporter, but the 2022 was not signed by the waste destination facility REQUIRED ACTION: ensure you also receive the signed manifest for all outgoing waste. The signed manifest proves it reached its final destination You may contact the Department of Toxic Substance Control for the signed manifest. You may also contact the hazardous waste destination facility whose business name is located on the manifest Please update me by the end of next week via e-mail at JeGonzales@smcgov.org

Violation Date:	05-24-2022
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 06/06/2023. OBSERVED: In general, the handling and storage of hazardous materials and waste did not seem like a topic that is known well by staff members. The safety-related binder on-site did have training information, but a staff member thinks it is only conducted upon initial hire. Based how the hazardous waste was stored, unlabeled, and inaccessible, I do feel an initial or refresher training is needed. REQUIRED ACTION: All staff who handle, sort, store and/or cleans-up small spills/release relating to hazardous materials and/or waste should be trained in how to handle/store/segregate/and clean-up said material. NES in partnership with San Mateo County Environmental Health offer an online training in hazardous waste management. You may follow the link to find the next available training: https://www.smchealth.org/hazwaste to register for the training. The next scheduled training in July 14, 2022, from 8-10am. Notify me via e-mail at JeGonzales@smcgov.org when the or [Truncated]

Violation Date:	05-24-2022
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 07/05/2023. OBSERVED: The facility had a few safety-related binders on-site, one of which contained the manifests for the hazardous waste, but the most recent I saw was from 2020. Observed on the Department of Toxic Substances Control website has two manifests from 2021 for alcohol and acetone. REQUIRED ACTION: Provide the most recent manifests for 2021 and 2022 (if applicable) to me via e-mail at JeGonzales@smcgov.org within 30 days. All hazardous waste manifest are to be kept on-site as you have done in the past.

Eval Notes: Trader Joe recently registered this store as a VSQG. According to the manager, bind should have arrived for the purpose of containing hazardous waste. None have arrived yet. Hazardous waste stored on the second floor include fluorescent tubes, various types of paint, turpentine, and aerosols in various states. None of these were in stored in labeled containers altho all containers were closed and in good condition. One aerosol and a 1-2 gallon metal can observed randomly stored near the CO2 on the first floor. Determine whether these are waste or product and store appropriately.

Eval Type: Routine done by local agency
Eval Notes: Dermot and myself conducted a Hazardous Waste Generator inspection at this facility. Both staff we spoke with seemed unfamiliar with hazardous materials and hazardous waste. Hazardous waste was stored upstairs in the loft/attic space. Hazardous waste streams: including products stored in a box, which needs to be sorted by hazard category [toxic, reactive, corrosive (acid and bases), ignitable], a 5-gallon, plastic bucket of batteries, about 12 aerosols/misc sprays in a crate, ~5-gallon metal container of presumed motor oil, and a couple of bags of charcoal that can be disposed of in the trash. The latest manifest in the binder that I saw was from 1/17/2020 for 10lbs of alcohol/acetone. DTSC has two manifests from 2021, which were not seen at time of inspection, both for alcohol and acetone

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a Hazardous Waste Inspection. The facility generates the following hazardous waste streams: flammable aerosols, corrosives, oxidizers, manifests are in the binder on-site, Clean Earth is their Hazardous Waste Hauler, their hazardous checklist is completed weekly and is logged in binder. Examples of their waste streams include: steel polish cleaner, leaf shine, room spray, spray enamel, batteries and light bulbs. Fire Extinguishers last serviced on: September 20, 2023
Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-24-2024
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine Hazardous Materials Business Plan inspection. The facility stores the following hazardous materials: R-22 & R-448A at 7,000 cubic feet Documented training completed recently on hazardous waste. Files are kept with HR. 448A is on the roof. helium is throughout. 292 cubic feet. There is another helium tank in the floral department of the same cubic feet.
Eval Division: San Mateo County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-07-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility generates the following hazardous waste streams: aerosols: 7

DRAEGER'S MARKET (MENLO PARK, CA) (Continued) **S121766232**

aerosol cans at time of inspection alkaline batteries: a few plastic sandwich-sized bags of batteries and some e-waste spent light tubes

Eval Division: San Mateo County Environmental Health
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-07-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility stores the following hazardous materials: Gases: refrigerant -- R448A AKA Solstice N40. Several 25lbs canisters of R22 and R448A stored on the roof, laying on their sides with about 6 stored upright. Also on the roof is a generator supplied by natural gas. Gases: 6 cylinders of R22 in the employee area, 3 of which were empty. Per Corrine, they will be stored on the roof and then transported as needed to their other store CERS HMBP states chemical inventory is R-44 at 14,000 cubic feet -- verify accuracy.

M & R AUTOMOTIVE INC (Continued) **S102268254**

Violation Date:	01-14-2022
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 11/22/2022. OBSERVED: The used antifreeze and used metal oil filters accumulation start dates are in compliance, but the used oil paper filters and the four, red used oil drums have exceeded their accumulation time period. The accumulation start date for the used oil paper filters was 4/2021 & the last pick-up date for the used oil is 6/2021. REQUIRED ACTION: Please have both the used paper filters/oily solids and the used oil picked-up as soon as possible, thank you. Please inform me when this has been completed and as you have been doing, please keep the manifests on-site. You can e-mal me the manifests to JeGonzales@smcgov.org once complete, thank you.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	131975
Site Name:	M & R AUTOMOTIVE INC
Violation Date:	01-14-2022
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 03/03/2023. OBSERVED: Used oil metal filters drum lid was open and several caps on the product drums were open. Several black oil containers/pans were draining into the waste oil drums. REQUIRED ACTION: Please ensure the lid to the used oil metal filter drum is secured and locked. Please ensure all caps are secured to the drums once draining is complete.

Violation Date:	01-14-2022
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 03/03/2023. OBSERVED: Within the shop/garage, one, opened 5-gallon bucket containing metal used oil

M & R AUTOMOTIVE INC (Continued) **S102268254**

filters that were waiting to be punctured and drained, a few used oil paper filters on top of the used oil metal filter drum, one used oil paper filter on top of one of the red 55-gallon used oil drums & another opened, 5-gallon bucket of punctured metal used oil filters sitting in front of the red used oil drums. REQUIRED ACTION: Please ensure all used oil paper and metal filters are disposed of in their appropriate drums with lids closed and caps secured when not draining or puncturing. You may store the soon-to-be punctured metal used oil filters in the 5-gallon bucket but ensure it has a secure lid and is labeled as hazardous waste with the label marked as, "Empty Daily". Please rectify this and submit pictures to me at JeGonzales@smcgov.org. Alternatively, I can come out again and conduct a reinspection. Thank you.

Eval Notes: On-site to follow-up on open violations with my primary focus on the possible sump pump outside in the back of the shop. Per Manager, it is a sump pump for their steam cleaning machine. They clean engines and cars where the waste water is filtered out to the sump pump. The waste water is then recycled back into the shop and the sludge is disposed of as hazardous waste. The only other violation is that I would prefer the Site Map to be more detailed as it appears to have less hazardous waste than what is present. Hazardous waste is documented by a HWS rectangle. Please also add the storage shed and drums on the side.

Eval Notes: On-site for OPE inspection. Conducted the HMBP and HW Inspections as well. Facility no longer generates hazardous waste as he has closed up his shop. He did have a garage/shop connected to the food mart, but it is now gutted with only the propane and fire extinguisher remaining. There are two, black 55-gallon drums on the side of the facility which are due for pick-up in two weeks. The used oil filters and oil have been picked-up already. Please send me the manifests for everything once completed. We also checked the back sheds where the used oil tank was. It is still there so please denote that is is closed with a closure date. OVerall the facility looks clean and in compliance. Thank you.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine inspection for the Underground Storage Tank system. On 12/12/2024, an Annual Monitoring Certification was conducted. On 12/13/2024, the SB989 was conducted. I was present for both, but do not have a 12/12/2024 report. I do have a report for 12/13/2024. The facility has three tanks on-site. Tank 1 Tank install date: 1986 10,000 gallons of gasoline DW FG Tanks and Piping Flapper Valve for OPE 208 Sensors 407 Sensors - wrap-around sensors Tank 2 1986 Tank Install Date 10,000 gallons of gasoline DW FG Tank DW FG Pipes 208 Sensors 407 Sensors Flapper Valve for OPE Tank 3 Tank install date is 1986 12,000 gallons of diesel DW FG Tanks DW FG Pipes 208 Sensors 407 Sensors Flapper Valves for OPE Designated Binder not on-site at time of inspection, but he will send me the documents as soon as he can. Ensure when components begin to rust that you consider replacing or buying a desiccant to place in the sumps.

Eval Notes: Ensure the most recent UST submission to the portal is printed and maintained onsite. Keep online UST paperwork up to date with DO data including ICC expiration date and financial responsibility information. For next UST update, add piping to the UST monitoring plan diagram. Inspector will send link to make request for historical documents to aid in this request. Ensure your DO prints out monthly history for all alarms; DO monthly reports were missing alarm history for electronic line leak detectors (Q).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
Registry ID: 110071744324

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Site ID: 32960
CERS ID: 10066051
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 32960
Site Name: GEORGE & BOBS SERVICE
Violation Date: 08-10-2021
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 09/24/2021. Both spill buckets failed the bucket tests. The spill buckets are direct bury type; any spill will reach the environment. Have the spill buckets replaced ASAP but no later than 2 weeks. At the meantime, the owner shall supervisor the fuel drop making sure no overfill occurs. If the buckets are not replaced, the facility may not be allowed to pump fuel after two weeks.

Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description:	Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes:	Returned to compliance on 08/23/2023. MLLD failed for one of the fuel grades, then the Veeder Root LLD was replaced by the Franklin Fueling

Violation Date:	08-03-2022
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes:	Returned to compliance on 11/22/2022. OBSERVED: Based on the angle, the 208 sensor's wire cord in the 87 STP sump is barely long enough to lay flat on the bottom of the tank. The 208 passed the liquid alarm test. REQUIRED ACTION: As soon as possible, and at most within the next 30 day, demonstrate to me that the 208 sensor is properly touching the bottom of the lowest point in sump, or replace the 208 with a 209 sensor which has a longer wire or remove the existing 208 sensor from the sleeve and place it on the bottom of the tank. Please inform me via email at JeGonzales@smcgov.org which you decide to do.

Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7,

UNION OIL SS 3652 (Continued) **1000167122**

	Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 11/22/2022. OBSERVED: The 91 direct bury spill bucket failed the test. Technician drained spill bucket partial way to remove cap. No liquid observed inside by any of us. Owner was notified of spill bucket failure. REQUIRED ACTION: Repair and/or replace spill bucket as soon as possible as it is a direct bury spill bucket. No fuel drops are allowed until this has occurred. Notify me via e-mail at JeGonzales@smcgov.org as to the progress of the repair or replacement. Please consider placing your gasoline spill buckets in sumps, but it will require permits.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 08/12/2019. Waste filters did not have accumulation start date. We estimated that last pick up was in May, so we dated label 5/1/2019. Both metal and paper filter drums were less than 1/2 full at time of inspection

Eval Notes: Your facility located has been identified as having a Used Oil Underground Storage Tank with single-walled riser or vent piping that does not meet the secondary containment exemptions requirements of the California Code of Regulations, Title 23, Section 2636(a) and 2635(c)(1)(B) or (C). https://www.waterboards.ca.gov/ust/regulatory/docs/CCR_Ch16_10_2018.pdf According to the above regulations, your facility is required to install overfill prevention equipment, construct secondary containment for single-walled vent and tank risers, or properly remove the used oil tank. Failure to comply with these requirements will lead to enforcement, with penalties of $500 to $5,000 per day for systems out of compliance. San Mateo County Environmental Health is committed to minimize the number of facilities that are out of compliance with these regulations in our county. That said, we cannot extend the deadline or waive the violations. We will however continue to assist you to help keep your...

Eval Date: 10-27-2023
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to conduct a follow-up inspection on the SB989. Last I heard the facility owner was unfamiliar with the UST System components so explained to him what a UDC was and how they can be single-walled or double-walled. He replied that he called four contractors but there were capable but busy. Today, facility representative stated the owner will be in around 11AM but that they were already repaired and tested. I cannot check my laptop Outlook at this time as it is non-functional and the County Outlook app displayed as No Search Results for facility related emails which there are many so I will have to place this as an open violation still until I speak with the owner and have in my possession the e-mail of the repair/pass. Facility representative opened up the UDC's, but I cannot tell if there have been repairs. Facility rep said they had and they even marked the time down in chalk. This inspector will verify as soon as possible.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

FORMER NORGE / ATHERTON VILLAGE CLEANERS (Continued) **S109117802**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 07/25/2017
Comments: This document was not prepared with DTSC oversight.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: PA/SI Site Screening
Completed Date: 10/15/2015
Comments: Site is currently a Japanese Restaurant. Previously, two different dry cleaning businesses operated at the site. Based on the results of other investigations in the area, the former dry cleaning operations are the likely source of tetrachloroethylene, aka perchloroethylene (PCE) present in the soil, soil gas, and groundwater in the area. Concentrations of PCE in the immediate vicinity exceeds ESLs for all media tested. Information request letters were previously sent by the County Health Department (2008). No response was received from the current land owner, and the County referred the site to the State. It is recommended that an information request letter be sent by DTSC to the current land owner, and that the site be referred to OLC if no response is received.

Completed Date: 07/25/2017
Comments: This document was not prepared with DTSC oversight.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: PA/SI Site Screening
Completed Date: 10/15/2015
Comments: Site is currently a Japanese Restaurant. Previously, two different dry cleaning businesses operated at the site. Based on the results of other investigations in the area, the former dry cleaning operations are the likely source of tetrachloroethylene, aka perchloroethylene (PCE) present in the soil, soil gas, and groundwater in the area. Concentrations of PCE in the immediate vicinity exceeds ESLs for all media tested. Information request letters were previously sent by the County Health Department (2008). No response was received from the current land owner, and the County referred the site to the State. It is recommended that an information request letter be sent by DTSC to the current land owner, and that the site be referred to OLC if no response is received.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Extracted from BAGG's October 10, 2008 Invetigation of Motor Oil in Groundwater, San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced report. The subject site is located on the north side of El Camino Real a short distance northwest of Glenwood Avenue, in a mixed residential/commercial area of the City of Menlo Park. The site is an irregularly shaped property with plan dimensions of approximately 225 by 300 feet. The surface of the property is relatively flat and contains four large and one small one-story buildings each containing a small business. The current occupants of the site include a contractor/handyman office, a water fountain sales operation, office use and a various open-space storage areas in the northeastern portion of the property. The remaining buildings on the property are now vacant because of the difficulty of renting with the pending commencement of the approved development. It is our understanding that a major portion of the site had been used as a welding shop beginning in the 1920s and continuing to the early

BELTRAMO PROPERTY (Continued) **S108086636**

1930s, followed by a lumber yard and hardware store until 2001. After 2001 this area had an assortment of uses including a flooring store, a window retail store, a garden furniture store, and outdoor storage areas. The remaining portion of the site was used by a gardening and small tool repair shop between 1965 and 1985, followed by an antique store, then a nail salon as well as office and storage uses. One of the lots on the north east portion of the site was used as a residence until the 1950s and another lot was used as a residence until 1967. The site also contained three dry wells, which were installed many years ago for the purpose of the disposal of runoff from the parking areas. The dry wells were removed and decommissioned on March 15 and 16, 2007. In April of 2006, BAGG advanced three borings at the site near each of the former dry wells to evaluate the soil and groundwater conditions adjacent to these features. The borings were advanced with hollowstem augers, logged by one of our geologists, and sampled at five-foot-intervals using a Modified California sampler lined with 6-inch brass liners. Soil and groundwater samples were collected for analytical testing. The results of the analytical and inorganic tests performed as a part of that investigation have been presented earlier in our report dated May 15, 2007, and are discussed below as well. Tetrachloroethene (PCE) was detected in two of the eight soil samples collected from B-2 and seven of the eight soil samples collected from B-3. Maximum concentrations of PCE in the soil samples above the groundwater table were 56 micrograms per kilogram (8g/kg) and 95 8g/kg in borings B-2 and B-3, respectively. Volatile organic compounds (VOCs), or total petroleum hydrocarbons (TPH) as diesel or motor oil were not detected above the laboratory detection limits in the soil samples from any of the borings. THP-d was detected in the groundwater sample collected from B-1 (3.45 milligrams per liter [mg/l]) and TPH-mo was detected in the sample collected from B-2 (12.8 mg/l). PCE was detected in the groundwater samples collected from B-2 and B-3 at respective concentrations of 196 micrograms per liter (8g/L) and 652 8g/l. Low concentrations of PCE daughter products were also detected in B-2, including cis-1,2-dichlorothene (cis-1,2-), sec-butylbenzene (sec-butyl), trans-1, 2-dichloroethene (trans-1, 2-), and trichloroethene (TCE). Other VOCs were not present in the groundwater samples collected from the borings above the laboratory detection limits. In March of 2007, Case Pacific Company (CPC) removed the concrete caps of two of the three dry wells, and measured the diameter of the dry wells to be 36 inches. A 4-inch diameter perforated pipe existed at the center of two of the three dry wells and the drain rock in these features were approximately 1+ to 2 inch in size. CPC decommissioned the three dry wells at the site under the supervision of a BAGG geologist and as permitted by the GPP. Mr. Charles Ice of GPP was present at the site on three occasions to observe the dry well decommissioning activities. The dry wells were over-drilled with a 42-inch auger. The drain rock depth was approximately 18 feet in Dry Well 1. This dry well was over-drilled to a depth of 22 feet. In Dry Wells 2 and 3, the drain rock was encountered to an approximate depth of 28 feet. These dry wells were then over-drilled to a depth of 30 feet. The dry wells were backfilled with 20 feet of neat cement; Dry well 1 was capped with 2 feet of slurry flyash, and Dry Wells 2 and 3 were capped with 10 feet of slurry flyash. Soil from the dry wells were separately stockpiled at the site, environmentally profiled before disposal, and disposed of at a landfill by CPC. Grab soil samples were collected from the

BELTRAMO PROPERTY (Continued) **S108086636**

tip of the auger at the terminus of each dry well to determine if any contaminants are present at the bottom of these features.

Feature Description:	The War Department Acquired 128.15 Acres From Wells Fargo Bank & Union Trust Company In Two Fee Acquisitions Using A Declaration Of Taking Filed 11 August 1943 For 127.23 Acres And A Declaration Of Taking Filed 4 April 1944 For .92 Acres. A Leasehold Agreement For 11.94 Acres Was Signed With Claude T. Lindsay, A Private Individual, On 15 February 1945. Total Acreage Acquired For The Site Was 140.09 Acres Plus A Permitted Easement To Run A Sewer Line .75 Mile To Connect With The Sewer Line For The Palo Alto Veterans Association Hospital. The Site Was Used As A 2,700-Bed Army General Hospital During World War Ii. There Were 115 Buildings Constructed On The Site By The End Of 1943. On 31 October 1945, The General Services Administration (Gsa) Terminated 7.52 Lease Acres And Returned The Land To The Owner, Claude T. Lindsay. On 31 July 1946, 127.27 Fee Acres And 4.42 Lease Acres Were Transferred To The Federal Public Housing Authority (Fpha). On 5 August 1946, The Remaining 0.88 Fee Acres Were Disposed To The War Assets Administration (Waa). The Fpha Returned The 4.42 Lease Acres Back To The Owner, Claude T. Lindsay. On 7 May 1947, Fpha Declared A Total Of 41.607 Fee Acres To Waa. The Remaining 85.644 Fee Acres Were Utilized By Fpha For Student/Veterans Housing Purposes At Leland Stanford Jr. University (Stanford Village) Beginning 15 March 1946. The Waa Disposed Of A Total Of 42.533 Acres As Follows: On 21 November 1947, Waa Quitclaimed 0.88 Acres To The San Mateo County Missionary

DIBBLE GENERAL HOSPITAL (Continued) **1024903729**

Church Extension Society Of The Methodist Church. On 29 September 1948, Waa Quitclaimed Two Parcels Containing 5.237 Acres And 5.646 Acres, Respectively, To Sequoia Union High School District, Redwood City, Ca. On 29 July 1948, Waa Quitclaimed 2.76 Acres To The Menlo Park Sanitary District. On 2 May 1949, Waa Quitclaimed 25.21 Acres To The City Of Menlo Park. On 19 April 1949, Waa Quitclaimed 0.91 Acres And 1.89 Acres, Respectively, To The City Of Menlo Park.

Feature Description:	The Citizens Committee Of San Francisco Offered To Procure For The War Department A One Year Lease Rent Free, Of Approximately 25,000 Acres Of Land In The Vicinity Of Palo Alto, California, For Army Training Purposes. Construction Of Camp Fremont Began Before Leases Were Acquired On 25 July 1917. The Site Consisted Of Four Major Units: Camp Fremont; The Base Hospital And A Remount Depot; Rifle Range, Artillery Range, Machine Gun And Pistol Range; And Maneuvering Area. According To The Completion Report Of Camp Fremont Dated 31 May 1919, Two-Hundred And Thirty Eight Leases, Licenses, Or Right-Of-Way Easements Were Made With Multiple Landowners Covering Approximately 67,391.98 Acres In Menlo Park And Palo Alto. Camp Fremont Was One Of Sixteen Mobilization Camps Put Up To Train A National Army For World War I. The Main Purpose Of The Camp During World War I Was To Build Fighting Teams For A Military Expedition To France And Included Bayonet Practice, Hand Grenade Training, Rifle Practice, Trench Warfare, And Gas Chamber Practice. A Rifle Range, Machine Gun Range, Pistol Range, Grenade Course And Bayonet Range Were Built And Used Extensively In Division Training. A Notice Of Cancellation Of Certain Leases Was Issued On 30 December 1918 And Implemented 31 January 1919. The Proceedings Of The Board Of Claims Convened At Camp Fremont On 27 February 1919. The Claims That Arose Out Of The Occupancy Of Lands For Camp Fremont Cantonment Site Were Heard And Reported Upon By 27

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/05/2025

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

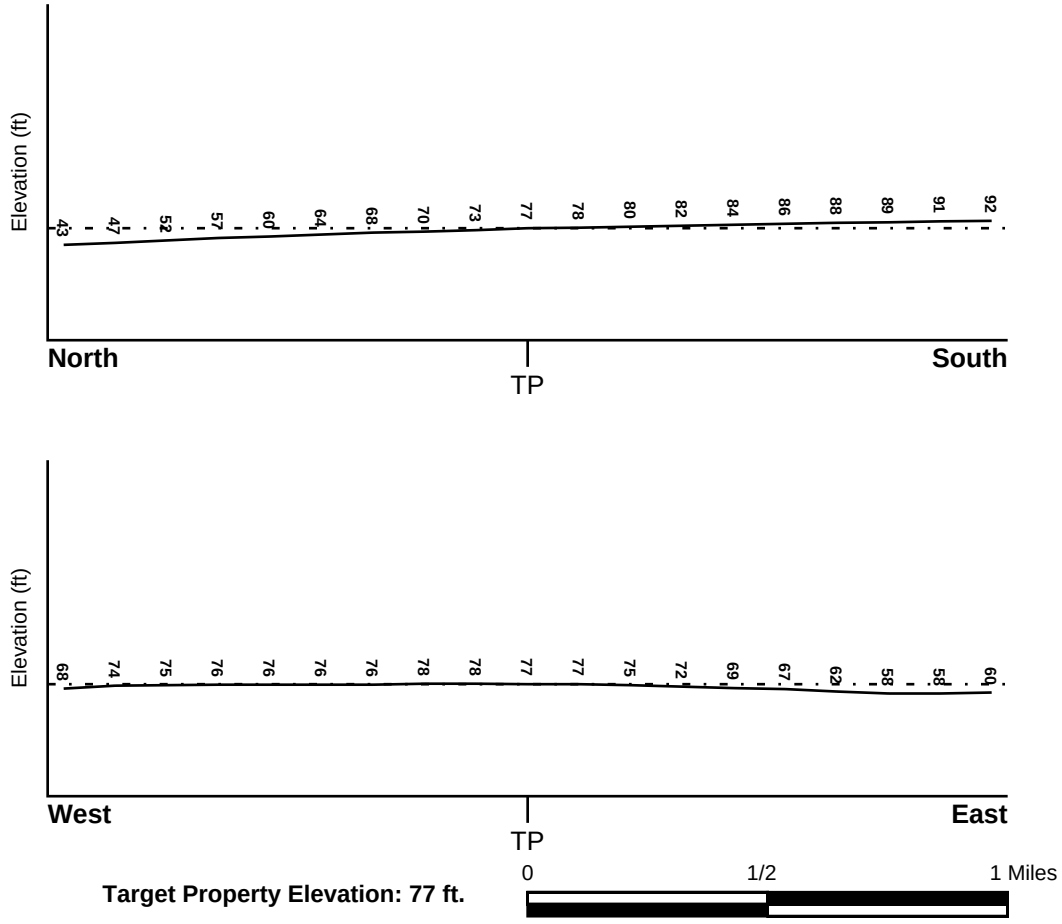

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 77 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

PALO ALTO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Botella

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	16 inches	59 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Historical Topo Map Report

02/10/25

Site Name:

505689
800 Oak Grove Avenue
Menlo Park, CA 94025
EDR Inquiry # 7894522.4

Client Name:

AEI Consultants
2500 Camino Diablo
Walnut Creek, CA 94597
Contact: Christian Cagonot

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 394359
Project: 505689

Coordinates:

Latitude:	37.45186 37° 27' 7" North
Longitude:	-122.187229 -122° 11' 14" West
UTM Zone:	Zone 10 North
UTM X Meters:	571887.62
UTM Y Meters:	4145310.65
Elevation:	77.00' above sea level

Maps Provided:

2021	1961
2018	1953
2015	1948
2012	1947
1999	1943
1994	1902

RE: 553 - Public Records Act Request Form - 800 Oak Grove

1 message

Kneier, Michelle <MKneier@menlofire.gov> Mon, Sep 29, 2025 at 3:43 PM
To: "clook.env@gmail.com" <clook.env@gmail.com>

Dear Mr. Look,

The Menlo Park Fire Protection District is in receipt of your records request pursuant to the California Public Records Act, Government Code §§ 7920.000, *et seq*. (the "Act"), dated September 15, 2025. You have requested the following records:

- Hazardous materials, underground/aboveground storage tank, permit, inspections, and fire records for 800 Oak Grove Avenue and 1201-1235 (odds) Crane Avenue

The District conducted a search for records responsive to your request and have found none. Accordingly, we have no records to produce in response to your request.

Sincerely,

Michelle

Michelle Kneier, CMC

Clerk of the Board/Assistant to the Fire Chief

Menlo Park Fire Protection District | 170 Middlefield Road | Menlo Park, CA 94025

(650) 688-1441 | (650) 323-9129 FAX

mkneier@menlofire.org | www.menlofire.org

Mission Statement: To protect and preserve life and property from the impact of fire, disaster, injury and illness.

Please do not feel obligated to reply outside of your normal work schedule

SAN MATEO EHS <myehs@smcgov.org> Mon, Sep 15, 2025 at 11:14 AM
To: "clook.env@gmail.com" <clook.env@gmail.com>

Hi ,

Your request for the public records has been submitted with the following tracking number **00016115**. Please note it can take up to 10 days from the date of when the request was received to access public records. To track the request status, contact our office by phone at (650) 372-6200 or email envhealth@smcgov.org.

Thank you,
San Mateo Environmental Health Services
Email: envhealth@smcgov.org
Phone: (650) 372-6200

APPENDIX F

QUALIFICATIONS

CLINTON LOOK

ASSOCIATE CONSULTANT

EDUCATION

- B.A. Environmental Studies and Economics - University of California, Santa Cruz, California

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Look has worked in the environmental services industry since 2013 and provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Records Research and Risk Assessments, Regulatory Database Reviews, and Historical Records Reviews. Mr. Look has performed over 700 Phase I Environmental Site Assessments, Environmental Transaction Screens, Records Research and Risk Assessments, Regulatory Database Reviews, and Historical Records Reviews on various residential, commercial, industrial, and agricultural properties for a wide range of Lenders including Fannie Mae, Freddie Mac, and HUD.

PROJECT EXPERIENCE

Project experience for Mr. Look includes:

- **Phase I ESA** - Project manager for an active Superfund site in Mountain View, CA which was being redeveloped
- **Phase I ESA** - Project manager for an active Superfund site in Milpitas, CA which had been redeveloped into a commercial shopping center. The project included the collection of drinking water samples
- **Phase I ESA** - Project manager for a commercial shopping center in San Leandro, CA which was an active Cleanup Site due to a past dry cleaner. Was able to identify an additional dry cleaner as another source of contamination as a REC.
- **Phase I ESA** - Project manager for a CVS Pharmacy in Tulsa, OK and was able to identify a previous on-site gas station that previous reports were unable to identify.

Megan Salcido

National Client Manager, Due Diligence

EDUCATION

- BA- Environmental Studies, Brown University, Providence, RI

CERTIFICATIONS

- EPA Accredited Asbestos Building Inspector

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Salcido has been in the environmental industry since 2014 and provides project management and oversight to ensure compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Real Estate Transaction Screens, Database Reviews, and other similar environmental assessments. She has successfully completed assessments on a variety of residential, agricultural, commercial and complex industrial sites. Ms. Salcido is accustomed to all aspects of Due Diligence Property Assessments and the needs and requirements of a variety of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), and customized client formats.

PROJECT EXPERIENCE

Project experience for Ms. Salcido includes:

- Phase I Environmental Site Assessments
- Limited Environmental Site Assessments
- Environmental Transaction Screens
- Records Research with Risk Assessments
- Regulatory Database Reviews
- Historical Records Reviews
- ACM, Radon, LBP, and drinking water sampling

In addition, prior to joining the environmental consulting industry, Ms. Salcido spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

Justin Hertz

Project Engineer

EDUCATION

- Bachelor of Science, Mechanical Engineering, Loyola Marymount University

CERTIFICATIONS

- OSHA 40- Hour HAZWOPER

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Hertz has approximately one year of experience in the environmental consulting industry. His project experience in environmental consulting includes soil, groundwater and soil investigations, remediation activities, indoor air monitoring and sampling, authoring of technical reports, vapor intrusion mitigation system sampling, peer reviews, and general project management and oversight. Additionally, Mr. Hertz has experience with Property Condition Assessments (PCA's) from his summer internship in 2021.

PROJECT EXPERIENCE

Project experience for Mr. Hertz includes:

- Conduct site-specific reports including Phase II Environmental Site Assessments, quarterly groundwater monitoring, health and safety plans, and soil management plans.
- Design and implement scope of work for Phase II Subsurface Investigations including project planning and execution, cost estimates, coordinating and scheduling subcontractors, and municipal/State/federal regulatory permitting and compliance.
- Evaluate laboratory analytical reports and compare to applicable screening levels.
- Site assessment techniques include logging and classifying subsurface soil based on Unified Soil Classification System; soil, groundwater, soil vapor, and ambient air collection; and groundwater and soil vapor well installation and development.
- Review technical reports and analytical data to assess validity of conclusions and quality of the work performed.
- Construction phase observation of Engineering Controls at significant milestones

Mr. Hertz has served as project engineer for several Phase II's at AEI and former employers.

ROW	Right-of-Way
RP	Responsible Party
RR	Replacement Reserve
RTU	Rooftop Unit
RUL	Remaining Useful Life
SDS	Safety Data Sheet
SEDI	Statement of Energy Design Intent
SEER	Seasonal Energy Efficiency Ratio
SEL	Scenario Estimated Loss
SEMS	Superfund Enterprise Management System
SEP	Statement of Energy Performance
SF	Square Footage, or Square Feet
SIR	Savings to Investment Ratio
SL	Scenario Loss
SP	Subject Property
SQG	Small Quantity Generator
SRA	Seismic Risk Assessment
ST	Short Term
SUL	Scenario Upper Loss
SUP	Special Use Permit
SVOC	Semi-Volatile Organic Compound
SY	Square Yard
TCE	Trichloroethylene, or Trichloroethene
TE	Thermal Efficiency
TPH	Total Petroleum Hydrocarbons
TPHd / TPH-d	Total Petroleum Hydrocarbons (diesel range)
TPHg / TPH-g	Total Petroleum Hydrocarbons (gasoline range)
TPHo / TPH-o	Total Petroleum Hydrocarbons (oil range)
TPO	Thermoplastic Polyolefin Roof Membrane
TRPH	Total Recoverable Petroleum Hydrocarbons
TSD	Treatment, Storage, and Disposal
UBC	Uniform Building Code
USDA	United States Department of Agriculture
USGS	United States Geological Survey
UST	Underground Storage Tank
V	Vacant
VAV	Variable Air Volume Box
VCP	Voluntary Cleanup Program
VOC	Volatile Organic Compound
VSQG	Very Small Quantity Generator
WDO	Wood Destroying Organism
ZAR	Zoning Analysis Report
